Adoption Resolution: Pickens County

A RESOLUTION TO ADOPT THE

**Pickens County Joint Comprehensive Plan 2023-2027
Including the Municipalities of Jasper, Nelson, and Talking Rock**

Whereas, the Georgia Planning Act of 1989 requires local governments to develop and maintain a comprehensive plan to retain their Qualified Local Government status and eligibility for State permits, grants, and loans; and

Whereas, the *Pickens County Joint Comprehensive Plan 2023-2027 including the Municipalities of Jasper, Nelson, and Talking Rock* is now complete; and

Whereas, such **Joint Comprehensive Plan Update** is approved by the Georgia Department of Community Affairs as meeting Georgia's Minimum Planning Standards and Procedures (effective October 1, 2018); and

Whereas, the second and final public hearing on the draft plan was held on April 20th, 2023, at the Pickens County Administration Building in Jasper, Georgia;

Now Therefore Be It Resolved, that the Board of Commissioners of Pickens County hereby officially adopts the *Pickens County Joint Comprehensive Plan 2023-2027 including the Municipalities of Jasper, Nelson, and Talking Rock*.

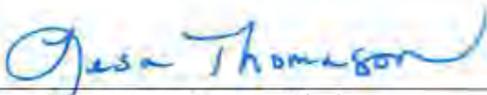

Resolved, this 18th day of May, 2023.

Introduction

Pickens County and the Cities of Jasper, Nelson, and Talking Rock have joined together in an effort to meet the challenges ahead; working together as citizens, elected officials, professional staff, business leaders, and property owners, they have prepared the *Pickens County Joint Comprehensive Plan Update 2023-2027*.

Why We Plan

For Pickens County and the Cities of Jasper, Nelson, and the Town of Talking Rock, the 2023-2028 Joint Comprehensive Plan represents both a shared cooperative vision and individual action steps for community success. The comprehensive plan describes the traits and values of each municipality, and balances future growth and development with these values, for growth that is respectful to local cultural attitudes and the scenic natural beauty of the area. The plan provides a predictable environment for local businesses and industry, investors, taxpayers, and the general public, to ensure a vibrant, resilient, and healthy community. The plan discusses the surveyed preferences of the local citizenry, perceptions of strengths and weaknesses, development type preferences, local needs and opportunities, and future work program items.

The Joint Comprehensive Plan also reflects the State of Georgia's commitment to its communities' success, by promoting and helping provide for a vibrant and healthy future for each community. In 1989, the Georgia Planning Act established a requirement for local governments to create a joint comprehensive plan according to set standards and procedures (*Standards and Procedures for Local Comprehensive Planning; March 1, 2018*) to maintain Qualified Local Government status (QLG) and eligibility for state grants, loans, and permits. The joint comprehensive plan and five-year community work program also demonstrate the importance of local projects to funding agencies such as the Appalachian Regional Commission and the Economic Development Administration.

Plan Requirements and Elements

This update to the Joint Comprehensive Plan has been prepared in accordance with the Georgia Planning Act of 1989 and the Rules of Georgia Department of Community Affairs, Chapter 110-12-1, Minimum Standards and Procedures for Comprehensive Planning (effective October 1, 2018). This plan contains the following required elements for Pickens County, City of Jasper, City of Nelson, and the Town of Talking Rock:

- Community Vision and Goals – A summary used to lay out a road map for the community’s future, developed through a very public process involving community leaders and stakeholders making key decisions about the future of the community and its direction.
- Report of Accomplishments – A report on each work program item from the 2018 – 2022 Joint Comprehensive Plan Update and the status of completion. Items assessed as “Underway” are automatically moved to the 2023 – 2027 Joint Comprehensive Plan update, along with activities that were postponed.
- Community Needs and Opportunities – Input provided by stakeholders, members of the public, and government leaders, which reflects current conditions of the County and its Municipalities, and what can be improved upon or enhanced.
- Land Use/Future Development Map and Narrative – Identified and mapped boundaries of sub-areas, districts, or neighborhoods described by character areas. Character area categories include, but are not limited to, the following: Residential, commercial, industrial, agriculture/forestry, and conservation. Along with the Future Development Map, there is a written narrative/description with pictures and illustrations for each character area.
- Community Work Program – Specific activities the community plans to undertake during the next five years.
- Broadband Service – The most recent element required by the State of Georgia for all governments. Its intent is to assess current conditions and to identify improvements needed to increase internet connectivity locally and state-wide. On May 5, 2022, Pickens County and the municipalities of Jasper, Nelson, and Talking Rock adopted a resolution to amend the Joint Comprehensive Plan to include a Broadband Element (2018-2028), which was reviewed in this update.

Public Hearings and Stakeholder Meetings

The initial public hearing was held on July 21st, 2022, at the Pickens County Administration Building in the City of Jasper. The legal advertisement for the public hearing was published in the local paper of record, the Pickens Progress, on July 7th, 2022 (Appendix B). At the public hearing, the 2023-2028 Joint

Comprehensive Plan Update process for Pickens County, the City of Jasper, the City of Nelson, and the Town of Talking Rock, was discussed. Following the initial public hearing, each local government appointed residents having local knowledge, technical expertise, and community commitment to serve as stakeholders.

These stakeholders met three times to cooperatively discuss the future for Pickens and each municipality.

The first meeting was held on October 18, 2022, at the Pickens County Administration Building in the Commissioners' Meeting Room (Appendix B). A Strengths, Weaknesses, Opportunities, and Threats (SWOT) analysis was conducted. The SWOT results and stakeholder comments were used to develop a Community Survey. The second stakeholder meeting was held at the Chattahoochee Technical College Appalachian Campus on November 1, 2022, to discuss the draft Community Survey questions that would be used to gather public input. The Community Survey was launched November 8, 2022 (Appendix A). The survey responses, as well as the Environmental

Planning Criteria and the Coosa-North Georgia Water Plan, were discussed at the third meeting, held on February 20th, 2023, at the Pickens County Administration Building in Jasper (Appendix B).

On April 20, 2023, a second public hearing was held to allow public comment on the draft Joint Comprehensive Plan Update. The hearing was held at the Pickens County Administration Building in the City of Jasper. The public hearing was advertised in the Pickens County Progress on March 9, 2023 (Appendix B).

Economic Development

Actively promote and pursue new and innovative businesses to diversify and strengthen our local economy, while simultaneously investing in and retaining a high-quality environment for our existing businesses.

- 1. Pickens County and its cities will support an on-going, coordinated economic development program resulting in a diversified economic base, which will raise income levels.
- 2. We will encourage re-investment in older, declining commercial corridors.
- 3. We will support and assist existing businesses and industries to grow and expand in the county and cities.
- 4. We will enhance the historical, aesthetic, and economic vitality of our downtowns and other existing commercial areas to create a unique atmosphere for shopping, entertainment, and cultural activities.
- 5. We will support the development and promotion of tourism opportunities that utilize our mountain resources, marble mining heritage, and other historic events and places.

Figure 1. Downtown Jasper.

Housing

Promoting a diversified housing stock for our current and future residents of all socioeconomic tiers while protecting the character of existing neighborhoods from inappropriate development.

Encourage infill housing within unfinished residential developments as well as neighborhood revitalization, especially in areas where blighted properties are common.

- 1. We will support affordable housing opportunities to ensure that all those who work in the community have a viable option to live here.
- 2. We will stimulate infill housing development in existing neighborhoods.
- 3. We will encourage development of housing opportunities that enable residents to live close to their places of employment.

4. We will support the development of housing opportunities and choices that allow people upward mobility from rental dependence to home-ownership.
5. We will support opportunities for “aging in place” and other housing needs.

Infrastructure and Facilities

1. We will continuously plan and develop an adequate and economical supply of water and wastewater service to meet the growth and development needs of the county and incorporated areas.
2. We will continually evaluate public water and wastewater service demands, and program system improvements in areas of the county and cities where development is planned.
3. We will support the development of private wastewater treatment facilities in planned communities where appropriate.
5. We will ensure that new development does not cause a decline in existing levels of service for the community’s residents and employers.
6. We will limit development within the county to areas that can be reasonably served by public infrastructure.
7. We will ensure that public facilities and services needed to accommodate future development are provided concurrent with new development.
8. We will coordinate the provision of public facilities and services with land use planning to promote more compact nodal development in areas identified on the Future Development Map.
9. We will consider and support all alternative finance mechanisms (impact fees, special improvement districts, SPLOST, grants, etc.) necessary to provide needed public infrastructure and services.
10. We will support the development of neighborhood parks as well as larger county parks.
11. We will continually evaluate fire protection needs and program system improvements where needed.

Transportation

1. Providing a variety of walkable neighborhoods with sidewalks, greenway trails, and bike lanes in appropriate locations.

2. An inclusive community that offers a variety of public transportation opportunities for its residents, with special attention given to those disadvantaged by age, income, or special needs.
3. We will continually improve the transportation system to provide for the safe and efficient movement of people and goods within the county and cities and with adjoining counties.
4. We will target transportation improvements to support desired development patterns for the community (recognizing that ready availability of transportation creates demand for and development in adjacent areas.)
5. We will design and reconstruct roadways using context sensitive design considerations that enhance community aesthetics and minimize impacts on the environment and our historic resources.
6. We will plan our new and/or reconstructed roadways to include consideration of multiple functions, including pedestrian facilities, parking, bicycle routes, public transit (if applicable) as well as local vehicular circulation.
7. We will promote connectivity of our road network (such as fostering a grid network of streets, multiple connections between subdivisions) in the non-rural areas of the county.
8. We support the creation of a community-wide greenway or multi-use path network for pedestrians and cyclists.

Figure 2. Downtown Jasper Pedestrian Crossing.

Natural and Cultural Resources

1. Embrace our history by supporting the preservation of historic resources and neighborhoods for the coming generations to enjoy.
2. Strongly enforce codes and ordinances to ensure our community remains clean, comfortable, nice, peaceful, and most of all family-friendly.

Figure 3: Historic Tate Mansion in Pickens County

3. Continue to support our technical college that, through its attractive programs and an enriching educational environment, produces a skilled workforce for our community and region.
4. We will support Federal and State protection measures that preserve water quality and endangered species habitat.
5. We will encourage the preservation of fragile mountain ecology and scenic views.
6. We will ensure safe and adequate water supplies through protection of ground and surface water resources.
7. We will promote the benefits of open space and tree preservation in all developments.
8. We will support the preservation of important historic resources in the county.

Figure 4: Grandview Lake in Pickens County

Community Facilities and Services

1. Become community rich with neighborhood parks and trail systems that provide recreational opportunities for our residents and visitors.
2. Research and pursue resources related to water and wastewater service areas to better plan for needed expansions regarding service areas or system capacity where it is found to be feasible and prudent.

Figure 5: Photo from Hinton Fest

Land Use

Guiding future development with informed land use plans that take into account the protection of our natural resources, reduce sprawling development, and determine where future growth is or is not suitable by considering the Smart Growth goals below:

- **Healthier, Safer Communities**
 - A central goal is to improve the quality of neighborhoods where we live. Our efforts will make our communities healthier, safer, more convenient, more attractive, and more affordable.
- **Protecting the Environment**
 - Neighborhoods designed to reduce our dependence on automobiles also reduce our impact on the environment. By creating streetscapes that encourage walking and biking, we create opportunities for individuals to reduce their carbon footprint.

Reducing environmental impacts may also occur through promotion of recycling throughout the community and strong enforcement of best management practices for erosion and sedimentation control.

- **Better Access, Less Traffic**
 - Mixing land uses, clustering development, and providing multiple transportation choices helps us to encourage healthier lifestyles, manage congestion, reduce pollution, and save energy.
- **Thriving Cities, Suburbs, and Towns**
 - By guiding development to areas already served by water and/or wastewater service, we maximize our investments in transportation, schools, libraries, and other public services. Our public dollars can serve the community where people live today.
- **Shared Benefits**
 - Building a comprehensive transportation system and locating jobs and accessible housing within reach of each other expands opportunities for all income levels.
- **Lower Costs, Lower Taxes**
 - Taking advantage of existing infrastructure keeps taxes down. Convenient transportation choices also reduce our household transportation costs, leaving families with more money for other needs.
- **Keeping Open Space Open**
 - Protecting our natural resources creates healthier air and cleaner drinking water. From forests and farms to wetlands and wildlife, let us pass on to our children the landscapes we love.

Our Smart Growth goals will be implemented via the following principles:

1. Provide a variety of transportation choices.
2. Mix land uses.
3. Create a range of housing opportunities and choices.
4. Create walkable neighborhoods.
5. Encourage community and stakeholder collaboration.
6. Foster distinctive, attractive communities with a strong sense of place.
7. Make development decisions predictable, fair and cost effective.
8. Preserve open space, farmland, natural beauty and critical environmental areas.
9. Strengthen and direct development towards existing communities.
10. Take advantage of compact building design and efficient infrastructure design.

Intergovernmental Coordination

1. We will seek opportunities to share services and facilities with neighboring jurisdictions when mutually beneficial.

2. We will work jointly with neighbors to develop solutions on multi-jurisdictional issues such as watershed protection, stormwater management and environmental protection.
3. We will share information with other jurisdictions when making decisions that are likely to impact them.
4. We will provide input to other jurisdictions when they are making decisions that are likely to impact our communities.
5. We will coordinate with the Pickens County Board of Education in regard to decisions to build new schools and the use of schools as community facilities.
6. Local public safety officials will work cooperatively with Emergency Management Agency (EMA) staff to administer the Pickens Hazard Mitigation Plan. The EMA is the local arm of the Federal Emergency Management Agency (FEMA) and Georgia Emergency Management Agency (GEMA), which are part of the Office of Homeland Security.

City of Nelson Vision Statement

The City of Nelson will retain its traditional small community roots while continuing to evolve into a dynamic, active town adjacent to the fast-growing suburbs of Cherokee County by utilizing the following implementation strategies:

- Work with the Chamber of Commerce to promote a variety of commercial and industrial uses depending on location and demand.
- Work cooperatively with Pickens County and Cherokee County officers to maintain a safe community with clean streets and properties and structurally sound residences. If desired, consider contracting with service providers for an increased level of code enforcement.
- Continually maintain and increase parks & recreation facilities as well as community center facilities.

Figure 6: City limits sign in Nelson

Figure 7: Nelson's nature trailhead

- Work with Cherokee Water & Sewer Authority representatives to plan for continual maintenance and, where possible, upgrades to existing water lines.
- Plan for whether or not future annexations and rezonings for higher uses (residential to commercial or residential to industrial as examples) may be appropriate. Consider whether or not, depending on ability to install an adequate septic system, rezonings for increased residential density may be appropriate.
- Continually maintain and, where appropriate, add sidewalks throughout the community.

Figure 8: Baseball Field at Nelson's City Park

Town of Talking Rock Vision Statement

Talking Rock will remain a rural town that retains its historical characteristics. The downtown area, including the popular park along Talking Rock Creek, will continue to be a dynamic, scenic destination for residents and visitors by adhering to the following implementation strategies:

- Work with property owners to improve the septic systems in the downtown area so that a greater range of businesses can thrive, including the potential for one or more restaurants.

Figure 9: Historic caboose in Talking Rock's town center

- Work with the Pickens County Economic Development office and Chamber of Commerce to continue to develop and promote tourism opportunities.
- Provide assistance to property owners to preserve and rehabilitate historical buildings.
- Develop and implement a streetscape plan (lighting, landscaping, sidewalks, pavilion or stage, etc.) in the downtown area to accommodate festivals and other events.
- Refurbish railroad cars for greater use as a tourist attraction.
- Support and promote positive community events at the park building, fire station, area churches, and other nearby facilities.
- Work cooperatively with business representatives and landowners for development and redevelopment for agri-business and agri-tourism in all areas of the community.
- Support and promote continual maintenance and expansion of the park.
- Support and promote redevelopment of properties near Talking Rock Creek while ensuring that actions are considerate of creekbank maintenance, stormwater best management practices, federally-designated floodplain areas, etc.

Pickens County Overview

Geography

Pickens County is located in the foothills of the Appalachians, less than an hour from downtown Atlanta on the Interstate 575/Highway 515 corridor. In addition to its three incorporated municipalities of Jasper, Nelson, and Talking Rock, Pickens County includes unincorporated communities such as Tate, Marble Hill, and Hinton. The County was created by land derived from Cherokee and Gilmer Counties.

History

Pickens County, founded in 1853, is a community rich in history ranging from the Cherokee Indians to the Industrial Revolution and much more. Its namesake was Andrew Pickens, a Revolutionary War hero. Pickens County's history primarily revolves around the marble industry and railway. The County sits on a sea of the sought-after stone; most of it is the Georgia white variety, but rare pink Etowah marble is also found. This marble has been mined in Pickens County since the 1830's; it forms the Lincoln Memorial, the United States Capitol Building, and tombstones of service members and veterans of the U.S. Military, and is used in pharmaceuticals, agriculture, and cosmetics. Pickens County marble has been the building material of choice for structures in the County as well, such as the historic Tate House, the Pickens County Courthouse, and the historic Tate Elementary School, the only school in the U.S. built of marble.

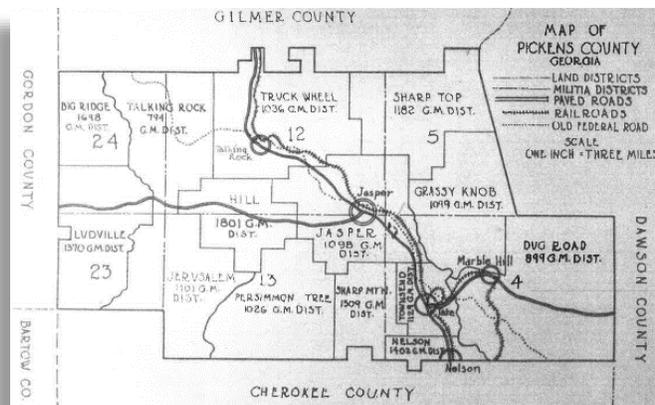

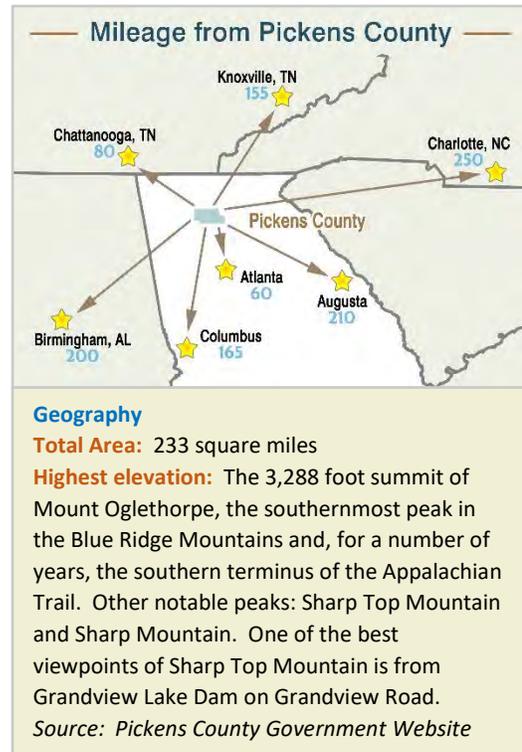

Figure 13: Historic map of Pickens County

Educational Assets

Pickens County boasts strong community assets such as its healthcare systems and award-winning public schools. The nation’s Head Start program was, in fact, pioneered in Pickens County. Upon graduation, students may learn employable skills at Chattahoochee Technical College’s Appalachian Campus in Jasper, or go just a few miles away to earn college degrees at such quality institutions as Reinhardt University or the University of North Georgia.

Figure 14: Chattahoochee Tech located in Jasper, Photo courtesy of Pickens Chamber of Commerce

Healthcare System

Piedmont Mountainside Hospital anchors the area’s healthcare system and contributes to the community’s focus on wellness. Pickens County ranked as the 32nd healthiest of Georgia’s 159 counties by the Robert Wood Johnson Foundation’s County Health Rankings for 2017. Pickens County residents are also served by the Pickens County Health Department, which ensures that even the neediest citizens can receive quality, low cost or no cost healthcare.

Figure 15: Piedmont Mountainside Hospital

Other Community Amenities

Although much of Pickens County would be classified as rural character, great places to shop, dine, and lodge can be found with only a brief commute. Social events and festivals such as *Jeep Fest* and the *Marble Fest* tend to draw rather large crowds from around the region and state. Given the abundance of natural land in Pickens County there are many locations that provide great locations for passive recreation opportunities to hike, bike, camp, and fish.

City of Jasper Overview

Geography

Perched on a ridge a little east of the geographic center of Pickens County sits the City of Jasper. Since the City's humble beginnings, it has expanded its boundaries immensely. This growth is primarily attributed to the commercial and industrial development made possible by the railway and, more recently, State Route 515. Due to Jasper's placement on the ridge, one can enjoy a view of the surrounding mountains from almost anywhere in the city.

History

Founded in 1857 as the County's seat, the City of Jasper was named after the Revolutionary War hero Sergeant William Jasper. As with most historically thriving communities, the railroad brought with it an opportunity for commerce that had not previously existed. The railroad was the City's conduit for importing equipment and supplies as well as exporting the heavy marble products from the County's mines and milling operations. As the county seat, Jasper became the central business district within Pickens County—facilitating both commercial and residential development. Jasper's overall growth can be greatly attributed to the creation and capacity of its water and wastewater utilities. As the use of the railroads decreased in recent decades, creation of the Appalachian Regional Highway (State Route 515) has allowed economic prosperity to continue in the City of Jasper.

Figure 20: Historic Kirby-Quinton Cabin restored and relocated to downtown Jasper

Figure 21: Fully functional historic Jasper water tower

Other Community Amenities

Jasper is by far the largest and most dynamic city within Pickens County boasting a busy historic downtown, diverse residential housing stock, and ever-growing commercial corridor. As stated previously, much of the growth and development in Jasper was made possible by the City's water and wastewater infrastructure. As the County seat, Jasper is home to many assets including Chattahoochee Technical College and Piedmont Mountanside Hospital, and is the location of the annual Marble Festival. Jasper also has several recreational assets such as its main city park located on Pioneer Road, Peace Park, and Lee Newton Park which offers a pond, two playgrounds, obstacle course, grills, tennis courts, restrooms, and walking trails.

Summary of Land Use

There are more diverse land uses within the City of Jasper than anywhere else in Pickens County. Land use character varies from the city's historic downtown, historic and modern residential neighborhoods, industrial, and modern "big box" commercial development along or near State Route 515. The availability of public water and wastewater utilities created opportunities for increased density and high-intensity uses not found in most areas of Pickens County. By promoting its utilities, the City of Jasper has the ability to continue to extend its corporate boundaries as prospective development occurs. The analytic methodology and character area style of land use planning for the City of Jasper followed the same process as Pickens County.

Figure 22: Jasper's City Park, located on Pioneer Road

Figure 23: Peace Park, located in downtown

Figure 24: Historic Marker interpreting the Old Pickens County Jail in downtown Jasper

City of Nelson Overview

Geography

The City of Nelson straddles Pickens County's southern border with Cherokee County and includes portions of both. The City's incorporated boundaries span beyond Pickens' borders into Cherokee County creating a dual jurisdictional city. South on old Highway 5 lies the City of Ball Ground, with unincorporated Tate to the north. The north end of I-575 and south end of SR 515 are at the county line southwest of Nelson.

History

John Nelson, early landowner, farmer, and rifle maker, is the namesake of the City of Nelson. Nelson is served through its downtown by the Georgia Northeastern Railroad, and along its Main Street is the former route of SR 5. In 1883, a railroad line built from Atlanta through the valleys and mountain passes of Pickens County to Tate and Nelson promulgated the development of large marble quarries. One of the largest marble veins in the world is in Pickens County; it runs at least four miles long. It is a half-mile deep, and almost that wide in places. Over 60 percent

Figure 25: Marble being shipped via rail from Blue Ridge Marble Co.

of the monuments in Washington D.C. are made from Pickens County marble quarried in Nelson. Many stone cutters and other workers who migrated from Italy and Scotland settled in Nelson to work in the area's marble industry. Today, the Georgia Northeastern Railroad operates between Tate and the CSX Interchange at Elizabeth (Marietta, Georgia) five days a week. The Georgia Marble Rail Lines at Tate, Marble Hill, and the Blue Ridge Scenic Railroad at Blue Ridge, Georgia are also operated by GNRR.

Truly an international city, the Georgia Marble Company brought approximately 50 Italian families to Nelson because of their skills in marble carving and sculpting. They worked side by

side with other Nelson residents to craft some of the most widely recognized structures in America and beyond. Some of these include headstones at Arlington National Cemetery, the East Front of the U.S. Capitol Building, the Lincoln Memorial, the Russian Embassy, the New York Stock Exchange building, the Federal Reserve Bank, and St. Peters Cathedral in the Loop, Chicago. The Structural Division in Nelson was formed early in the industry's history to handle the many requests for structural marble. At the Nelson facility the marble was/is shaped into panels, columns, floor tiles and all special items specified by the architect. The Structural Division has seen many architectural styles come and go over the past century, and can fabricate any type of design, old or new.

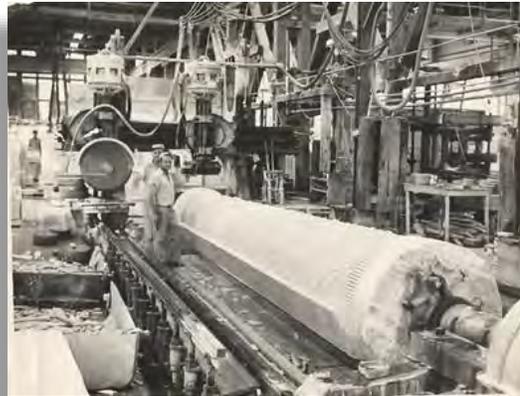

Figure 26: Marble lathe inside Blue Ridge Marble Co.

Other Notable Amenities

Nelson's City Park and baseball field, nature trail, and Marble Museum are currently its most notable amenities. The Marble Museum is located in Nelson City Hall, and includes a year-round exhibit of fine marble and the history of marble mining in Pickens County. All historical photos included in this document were provided by Nelson's Marble Museum.

Town of Talking Rock Overview

GEOGRAPHY

The Town of Talking Rock is nestled in the foothills of the North Georgia Mountains between the cities of Ellijay and Jasper in Pickens County. Happily, the third-smallest town in the State of Georgia has changed very little since its beginning in 1883, when the train was the lifeline of the town.

HISTORY

Talking Rock's history is rich with stories about the Trail of Tears, the Civil War, the railroad, and the Great Depression. The origin of the town's name is unclear, and there are many interesting stories regarding its derivation. Some believe that it's from the noise of the water rolling over the rocks in our beautiful creek, while others like the story of folks sitting for a spell on a rock to have a talk with a neighbor. Still others believe that the name has Native American origins. The railroad played a vital part in the lives of the residents by providing a means for shipping cotton grown in the community, mail delivery, and travel to other parts of the state. The once busy depot saw an average of four trains a day. In more recent years the town has purchased two historic rail cars which rest on a former spur track in front of the town hall and parallel to the modern railway. The town's plan is to restore the railcars with the purpose of interpreting transportation related to the town's history. The town's historic schoolhouse, seen in figure 28, has been restored and is now another component of the vintage aesthetics of the town center.

Figure 28. Talking Rock historic schoolhouse

Figure 29. Talking Rock Brewery

Other Notable Amenities

While it may lack a bustling central business district, the Town of Talking Rock's town center has several notable assets such as the general store, a landmark antique shop, and a large passive recreation park adjacent to Talking Rock Creek which draws visitors from across the area. Talking Rock is also the location of the annual Heritage Days Festival that draws an impressive crowd year after year.

Demographics

Population

Pickens County is approximately 233 square miles in size and includes three municipalities: the City of Jasper, the City of Nelson, and the Town of Talking Rock. The most populous of these cities, Jasper, serves as the County Seat of Government. Pickens County is surrounded by Gordon County to its west, Gilmer County to its north, Dawson County to its east, and Cherokee County to its south. Dawson and Cherokee Counties are outside the Northwest Georgia Regional Commission; Dawson County is in the Georgia Mountain Regional Commission, while Cherokee County is part of the Atlanta Regional Commission.

The 2020 Decennial Census showed that Pickens County’s population growth outpaced both that of the State of Georgia and the Northwest Georgia region; the County’s population increased by 11.4% from 29,431 to 33,216. The State of Georgia’s population increased by 10.4% during this period, while Northwest Georgia increased by 5.8%.

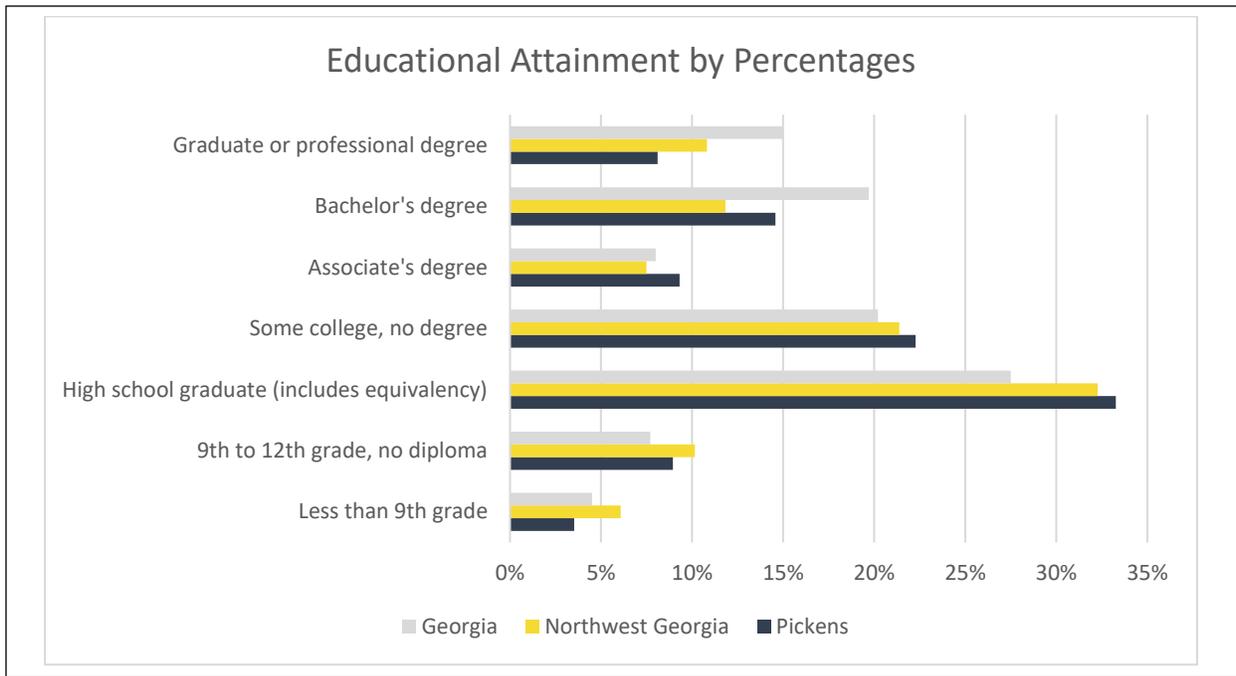

Education

Educational attainment is important for each community of the Northwest Georgia Region, as it provides for greater employment opportunities, attracts businesses, and increases the overall quality of life of its residents. Among those 25 years and older, Pickens County has a higher percentage of persons with a high school equivalent degree and at least some postsecondary education (88%), than the Northwest Georgia Region (83%), and the state of Georgia (90%).

Pickens County has a higher percentage of those with post-secondary college education, in both the category of “Some College and No Degree” and for “Associate Degree” than the region and the state. Part of Pickens County’s success in this area is due to the presence of the Chattahoochee Technical College Appalachian Campus. Those 25 or older living in Pickens County also outperform the state totals in percentage of individuals with “Bachelors’ Degree,” but are below that of the Northwest Georgia region. Pickens County trails the state and the region for those achieving a graduate degree or professional degree.

Educational Attainment for those 25 and Older							
	Less than 9th grade	9th to 12th grade, no diploma	High school graduate (includes equivalency)	Some college, no degree	Associate's degree	Bachelor's degree	Graduate or professional degree
Bartow	3,156	6,631	25,475	16,408	5,396	9,630	4,448
Catoosa	1,474	3,709	15,177	11,598	3,941	7,292	3,459
Chattooga	1,847	2,899	6,570	3,058	1,093	1,039	626
Dade	674	1,389	4,088	2,230	1,016	1,260	498
Fannin	801	1,595	6,836	4,328	2,013	2,551	1,864
Floyd	4,198	6,474	21,804	13,563	5,338	7,906	6,057
Gilmer	1,411	2,178	8,149	4,513	1,796	2,950	1,971
Gordon	3,290	5,258	13,419	8,024	2,569	3,358	2,795
Haralson	1,024	2,583	7,422	4,622	1,191	2,188	1,326
Murray	2,899	4,480	9,105	5,358	1,943	1,967	857
Paulding	2,980	7,259	32,882	28,898	9,788	17,299	8,386
Pickens	824	2,095	7,787	5,212	2,179	3,411	1,895
Polk	2,143	3,227	10,832	5,962	2,166	2,204	1,349
Walker	2,551	5,663	16,670	10,555	3,984	5,768	3,578
Whitfield	9,644	9,610	20,683	12,739	3,617	6,983	4,067

When education totals are broken down further by municipality within Pickens County, the highest percentage of those 25 and older achieving a graduate or professional degree is seen in the City of Nelson. This may be due to Nelson’s boundary extending into Cherokee County where a higher demand for professional degrees would be seen.

Educational Attainment of Adults Ages 25 or older in 2020						
Location	High school graduate or equivalency	Some College	Associates degree	Bachelor's degree	Graduate or Professional	
City of Jasper	6.1%	37.1%	18.2%	11.1%	3.1%	
City of Nelson	2.5%	29.6%	19.6%	14.2%	5.3%	
Town of Talking Rock	7.8%	22.1%	27.3%	7.8%	2.6%	

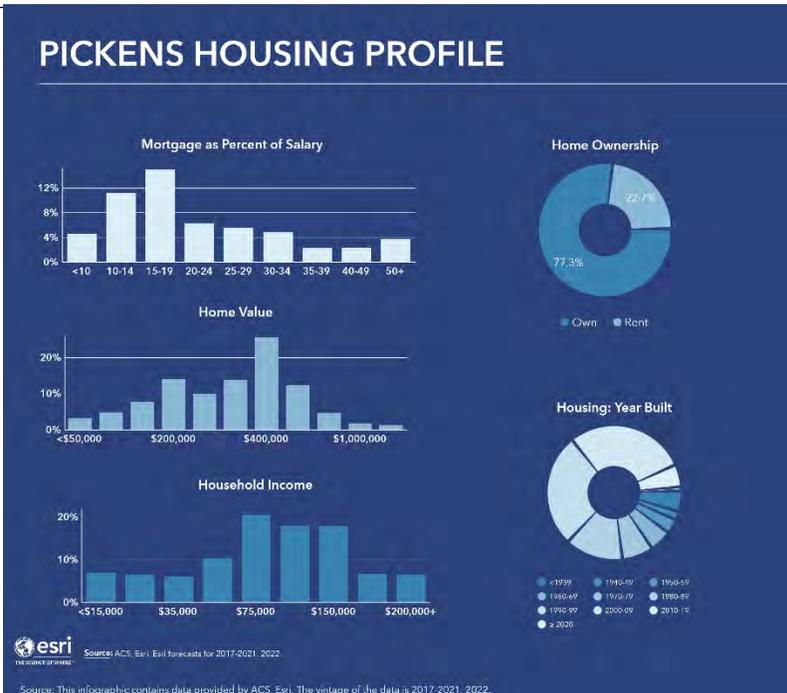

Housing and Economics

Pickens County's population is growing at a faster rate than the region and state. It is adding housing at a higher rate than neighboring Bartow County, but much less than Cherokee and Dawson Counties. The rate of additional housing units appears to be increasing. Between 2010 and 2020, Pickens County added only 1,200 new units, but has added 400 units between 2020-2022. The housing vacancy rate is decreasing in Pickens County and in surrounding counties.

Census 2020 PL 94-171 Profile

Location	Total Housing Units			Annual Rate of Change in Total Housing Units	Average Household Size		Total Housing Vacancy			Annual Rate of Change In Housing Vacancy
	2010 Count	2020 Count	2022 Estimate	2010-2020	2010	2020	2010 Count	2020 Count	2022 Estimate	2010-2020
Bartow County	39,819	42,435	43,593	0.64%	2.77	2.69	4,041	2,390	2,651	-5.12%

Murray County	15,979	16,038	16,064	0.04%	2.8	2.7	1,899	1,320	1,312	-3.57%
Pickens County	13,692	14,896	15,333	0.85%	2.57	2.51	2,401	1,776	1,843	-2.95%

Home ownership is strong in Pickens County, with over 70% of homes owned rather than rented; the majority of housing stock was built in 1970 or later. For most homeowners, their mortgage is less than 30% of their salary. Most housing values range from \$200,000 to \$400,000. Median household incomes in the County vary, from Jasper's MHI of \$33,570, to Nelson's MHI of \$66,111, and the County's MHI of \$68,365, which exceeds all surrounding counties except Cherokee.

Location	Median Household Income
City of Jasper	\$33,570
City of Nelson	\$66,111
Town of Talking Rock	No data

Location	Median Household Income
Cherokee County	\$84,817
Dawson County	\$72,260
Gilmer County	\$57,376
Gordon County	\$48,662
Pickens County	\$68,365

Pickens County’s unemployment rate fell to 2.5% in 2022, from a high of 4.8% during 2020. With a labor force of 16,022 and an employed population of 15,629, there are workers in Pickens County available for employment.

Labor Statistics for Pickens County (2017-2022)				
Year	Employed	Labor Force	Unemployed	Unemployment Rate
2022	15,629	16,022	394	2.5%
2021	15,099	15,533	434	2.8%
2020	14,210	14,927	717	4.8%
2019	14,977	15,457	480	3.1%
2018	14,671	15,219	548	3.6%
2017	14,464	15,117	653	4.3%

Pickens Progress Survey Results

The public survey gathered a total of 1,180 complete responses, with a completion rate of 84%. Full survey results are provided in Appendix B. The first series of questions asked respondents' place of residence, age, employment status, and about business ownership and location and internet availability. The remaining questions discussed perceptions of the community; for instance, their preferred type of housing development. These questions also allowed survey respondents to select "Other," then to provide further information.

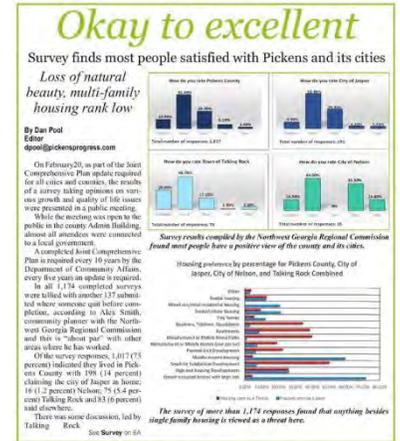

By location, 73.2% of survey respondents lived in Pickens County, 14.3% resided in Jasper, 1.2% lived in Nelson, 5.4% lived in Talking Rock, and 6% lived elsewhere. Survey takers were allowed to rate their place of residence as Excellent, Good, Okay, or Fair.

Of the 1,180 respondents, a majority of individuals (38%) were between the age of 35 to 54. The second largest age group (30%) were between ages 55 to 69. One in five (18%) of survey takers were between the age of 18-34. One in ten (13%) of those who responded were age 70 or older. Less than one percent of respondents were 17 or under.

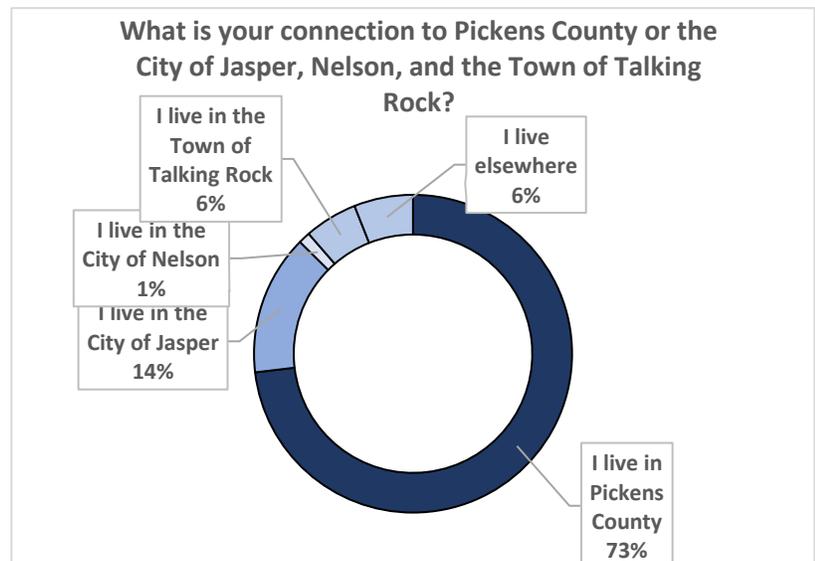

As for employment status, 58.3% of participants were employed, while 23.2% were retired, 10.3% were self-employed, 4.5% were stay-at-home parents or caregivers, and less than 2% were students (both employed and unemployed).

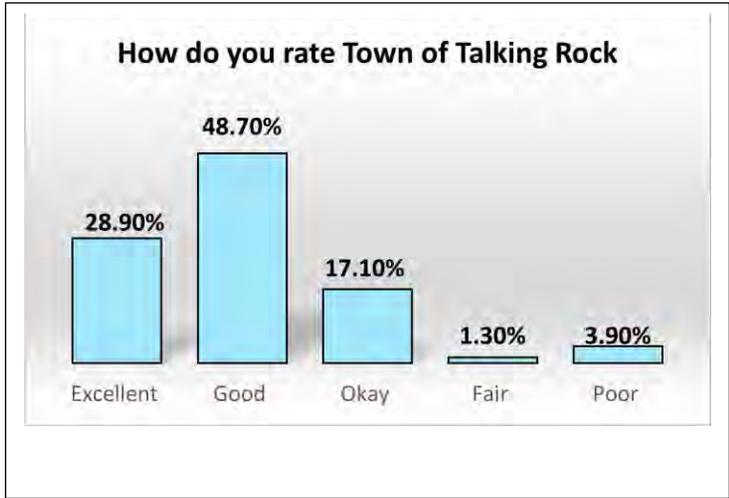

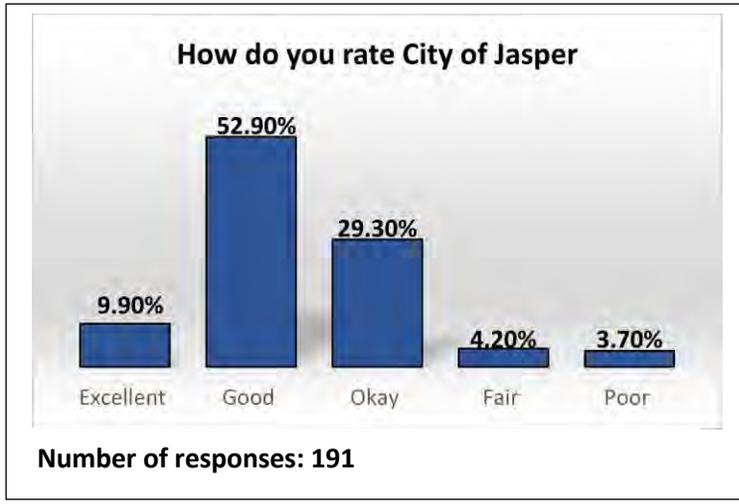

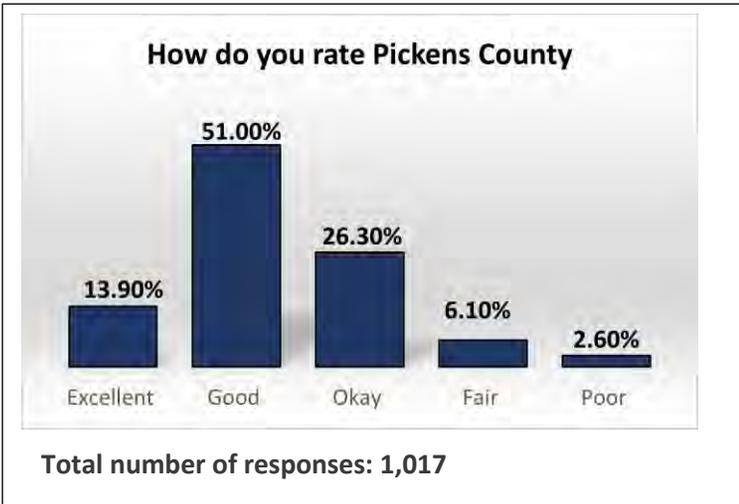

More respondents reported their place of employment as outside Unincorporated Pickens County (37.3%) than within Unincorporated Pickens County (31.6%) or Jasper (29%). One in five (17.5%) owned a business; these businesses were located in Unincorporated Pickens County (52%), outside the County (22%), or in Jasper (20%).

Question 11 and 12 gauged internet availability, with 63.8% of businesses owners and 63.8% of residents stating they had internet access with adequate speeds, while 2.3% stated that they had no internet access at all.

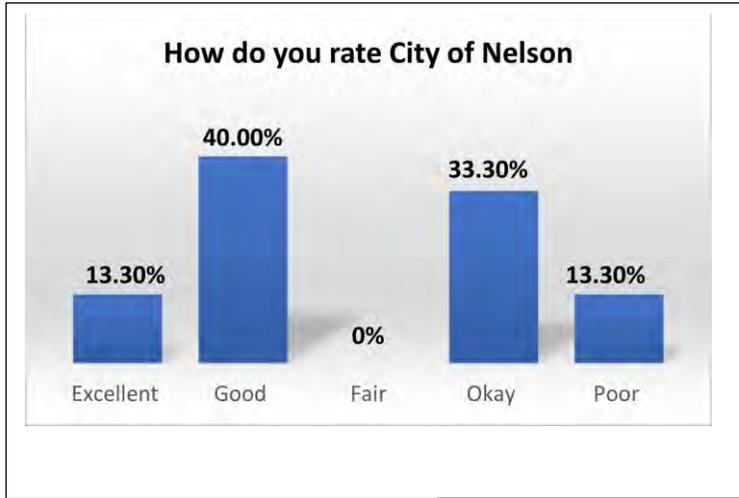

What age group do you represent?	
17 or Under	0.30%
18-34	18.00%
35-54	38.10%
55-69	30.60%
70 or Older	12.90%

Number of responses: 76

Number of responses: 15

The remaining questions addressed strengths of the community, threats to the community, preferred development density and housing types, and types of projects desired.

Strengths

Respondents were asked to select 5 choices from a list of 16 traits that the Stakeholder Committee identified as strengths of the community. Responses valued Scenic views and natural beauty (78.9%); Smalltown atmosphere and sense of community (75.2%); Proximity/access to Highway 515/I-575 (35.9%); Local heritage (21.4%); Public safety (12.7%); Parks and recreation (9.9%); and Local school systems and higher education(9.8%).

Survey Question #13. What are the strengths of where you live?	
Smalltown atmosphere and Sense of community	75.20%
Parks and Recreation	9.90%
Local Heritage	21.40%
Proximity/access to highway 515/575	35.90%
Scenic views and Natural beauty	78.90%
Tourism	1.80%
Agri-tourism	3.70%
Local School System and Higher Education	9.80%
Healthcare system	6.30%
Sidewalks	0.80%
Sewer and Water Infrastructure availability	4.60%
Retail	1.20%
Airport	0.80%
Public Safety	12.70%
Public Services	2.50%
Other	7.00%

Weaknesses and Threats

Of fourteen items listed, the highest concern or threat was the loss of natural and agriculture resources (31.3%); followed by lack of water and wastewater infrastructure availability (30.8%); and water and wastewater infrastructure condition (26.6%); workforce availability (24.3%) and losing workforce to surrounding municipalities (24.2%); too many tourists (19.6%).

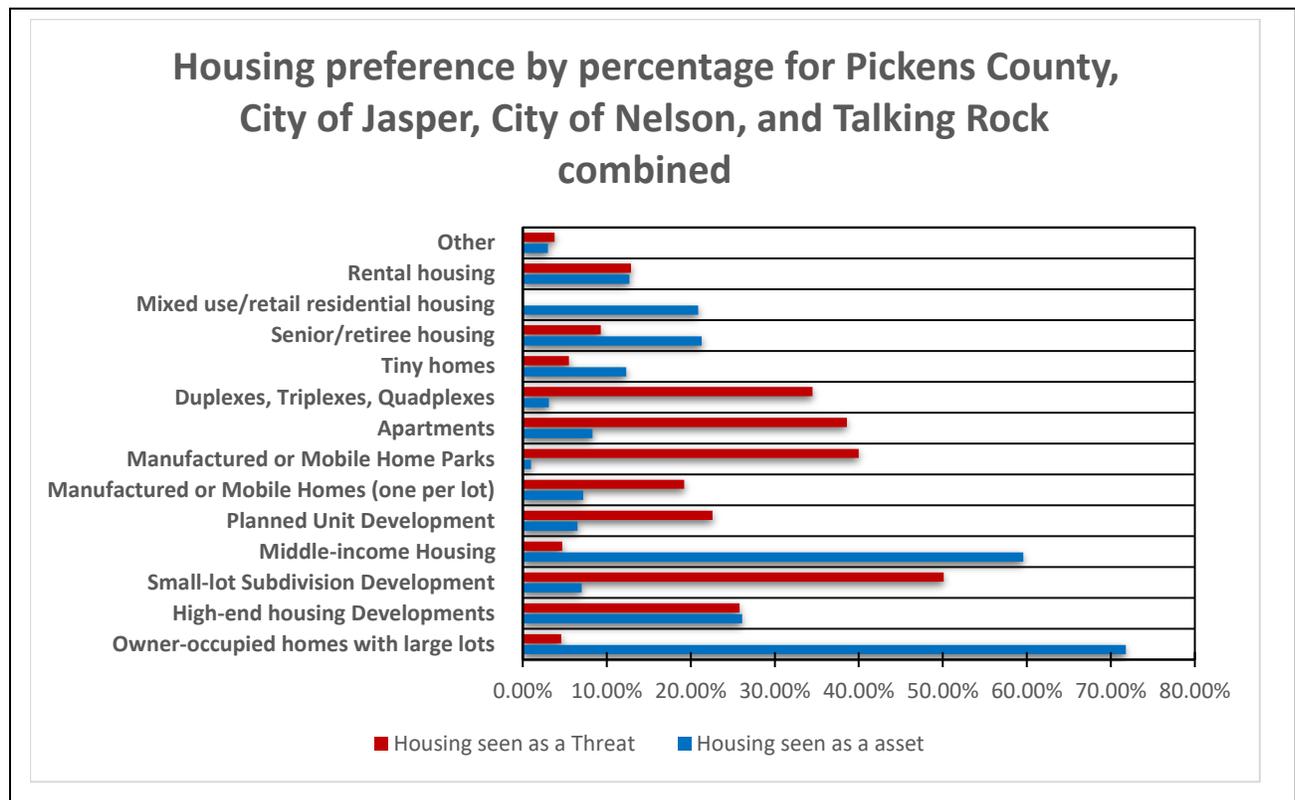

Survey Question #14. What are the weaknesses of where you live?	
Youth leaving	17.10%
Water and Sewer Infrastructure Availability	30.80%
Water and Sewer Infrastructure Condition	26.60%
Lack of Workforce	24.30%
Losing Workforce to Surrounding Counties and Municipalities	24.20%
Lack of Housing Options	23.10%
Loss of Natural Resources and Agriculture	31.30%
Aging Population	16.30%
Inadequate Ordinances	10.40%
Proximity and Access to Highway 575/515	4.20%
Lack of Sidewalks and Bike lanes	13.70%
Too Many Tourists	19.60%
Not Enough Tourists	6.30%
Other	18.60%

Future Growth

Questions 17 and 18 gauged public interest in types of projects, growth, and housing choices for the future. Projects most needed were Small business development (48.4%), Sewer and water improvement projects (43.5%), Local retail development (41.6%), and Broadband availability (30.8%).

The final survey questions, questions 19 through 22, regarded housing preference. The Stakeholder Committee predicted that scenic views and small town atmosphere would be a local strength. The most popular housing options were Owner-occupied homes with large lots (71.8% an asset) and Middle-income housing developments (59.6% an asset). High-end housing development was seen by 26.1% as an asset and 25.8% as a threat. Housing types considered a threat were Small-lot subdivision developments (50.1%), Manufactured or mobile home parks (40%), and Multifamily options (apartments, duplexes, triplexes, quadplexes) (38.6% and 34.5%).

Future Growth and Needed Projects	Percent
Small Business Development	48.3%
Sewer and Water Improvements	43.5%
Commercial	11.0%
Manufacturing	10.0%
Local Retail	41.6%
Tourism	10.9%
Broadband Availability	30.8%
Sidewalk Improvements	14.8%
Public Parks	39.1%
Government Facilities	3.2%
Other	11.0%

Broadband

Introduction

Access to high-speed Internet has become a necessity for businesses and residents. In 2015, the Federal Communications Commission (FCC) defined high-speed internet, or broadband, at 25 megabits per second for download, (downstream) and 3 megabits per second for upload (upstream). The State of Georgia used this definition as a benchmark for high-speed Internet service by enacting the “Achieving Connectivity Everywhere (ACE)” Act in the spring of 2018. ACE created the Georgia Broadband Development Initiative (GBDI) to establish high-speed internet service statewide, even to the most rural areas. Pickens County, Jasper, Nelson, and Talking Rock would like to participate in the Broadband Ready Community program because they recognize the need to facilitate better Internet connectivity for all residents. Therefore, this broadband element is included in the comprehensive plan, and work program items have been added for each government.

- The first item is a commitment to pass a broadband ordinance covering the process of providing broadband to all residents, and to signal that Pickens County has taken steps to reduce obstacles to broadband infrastructure investment.
- The second item is to apply for the Broadband Ready Community Designation.

GBDI Mapping Methodology

The GBDI model (*see map on pg. 40*) is location-based. This means that the target broadband service must be available to more than 80% of locations in a census block to be served. Census blocks that did not meet this definition are delineated as 'Unserved'. The map depicts access, not subscription, to broadband. Broadband data is provided by the various Internet Service Providers of Georgia. Location data are from commercially available sources.

Current Service Areas

According to the GBDI map on page 40, there are a total of 3,482 unserved locations (17%) in Pickens County. There are 16,933 locations that are currently served.

Investment in Unserved Areas

Broadband infrastructure investment decisions are business-case based. They must provide a sustainable and positive ROI for providers to expand into unserved areas. The GBDI planning team partnered with local governments and providers on a plan to address unserved areas. Recommended strategies or policies must either lower broadband investment costs or provide financial assistance to broadband in unserved areas so that they can be served and become economically self-sustaining.

Access to Funding

The capital cost to provide broadband services to all unserved areas in Georgia is estimated at more than one billion dollars. The deployment of broadband to unserved areas statewide will require significant access to funding. While a statewide grant program will make an impact on some unserved areas, the widescale change could require a broad spectrum of funding incentives and mechanisms.

Public-Private Partnerships

Public-private partnerships (P3) could play a critical role in bringing sufficient broadband to unserved areas. The legislation currently includes the use of P3 models on GDOT rights-of-way of Georgia interstates. These partnerships could take a variety of forms, and could include coapplying for funding, working with providers to create carrier-neutral locations and facilities, providing greater access to rights-of-way, providing incentives to providers to lower costs, and/or creating efficiencies to accelerate broadband deployment. Pickens County, Jasper, Nelson, and Talking Rock will appoint a Broadband Committee made up of local leadership, as well as private broadband providers, in order to strategically determine which unserved areas will be eligible and competitive to apply for broadband funding assistance.

Broadband Model Ordinance

To assist local governments with the process of developing a useful local ordinance to encourage broadband investment and expansion, GBDI worked in collaboration with local governments and providers to develop a model ordinance. The purpose of the model ordinance is to demonstrate that the local government has taken steps to reduce obstacles to broadband deployment. The model ordinance has already been adopted by several communities in Georgia. Pickens County and the municipalities of Jasper, Nelson, and Talking Rock have adopted, or will adopt, the Broadband Model Ordinance as an action step to ensure that broadband deployment is not hindered in the community.

Federal Broadband Programs

The **USDA Community Connect Program** exists to provide financial assistance in the form of grants to eligible applicants that will provide, on a “community-oriented connectivity” basis, broadband service that fosters economic growth and delivers enhanced educational, health care, and public safety benefits.

The **USDA ReConnect Program** is designed to bring internet service to parts of rural America that have been traditionally hard to reach by providing grants, loans, or grant/loan combinations to entities seeking to deploy broadband services in unserved or severely underserved regions. Within the USDA ReConnect funding application, projects can be awarded as many as 20 State Activity Points. The Georgia Broadband Office is offering technical assistance to USDA applicants by providing the Georgia Broadband Development Initiative Plan and a letter of support from the Governor.

Both the USDA Community Connect and ReConnect programs base the applicant’s eligibility on several factors including the Federal Communication Commission's (FCC) 477 Broadband Map.

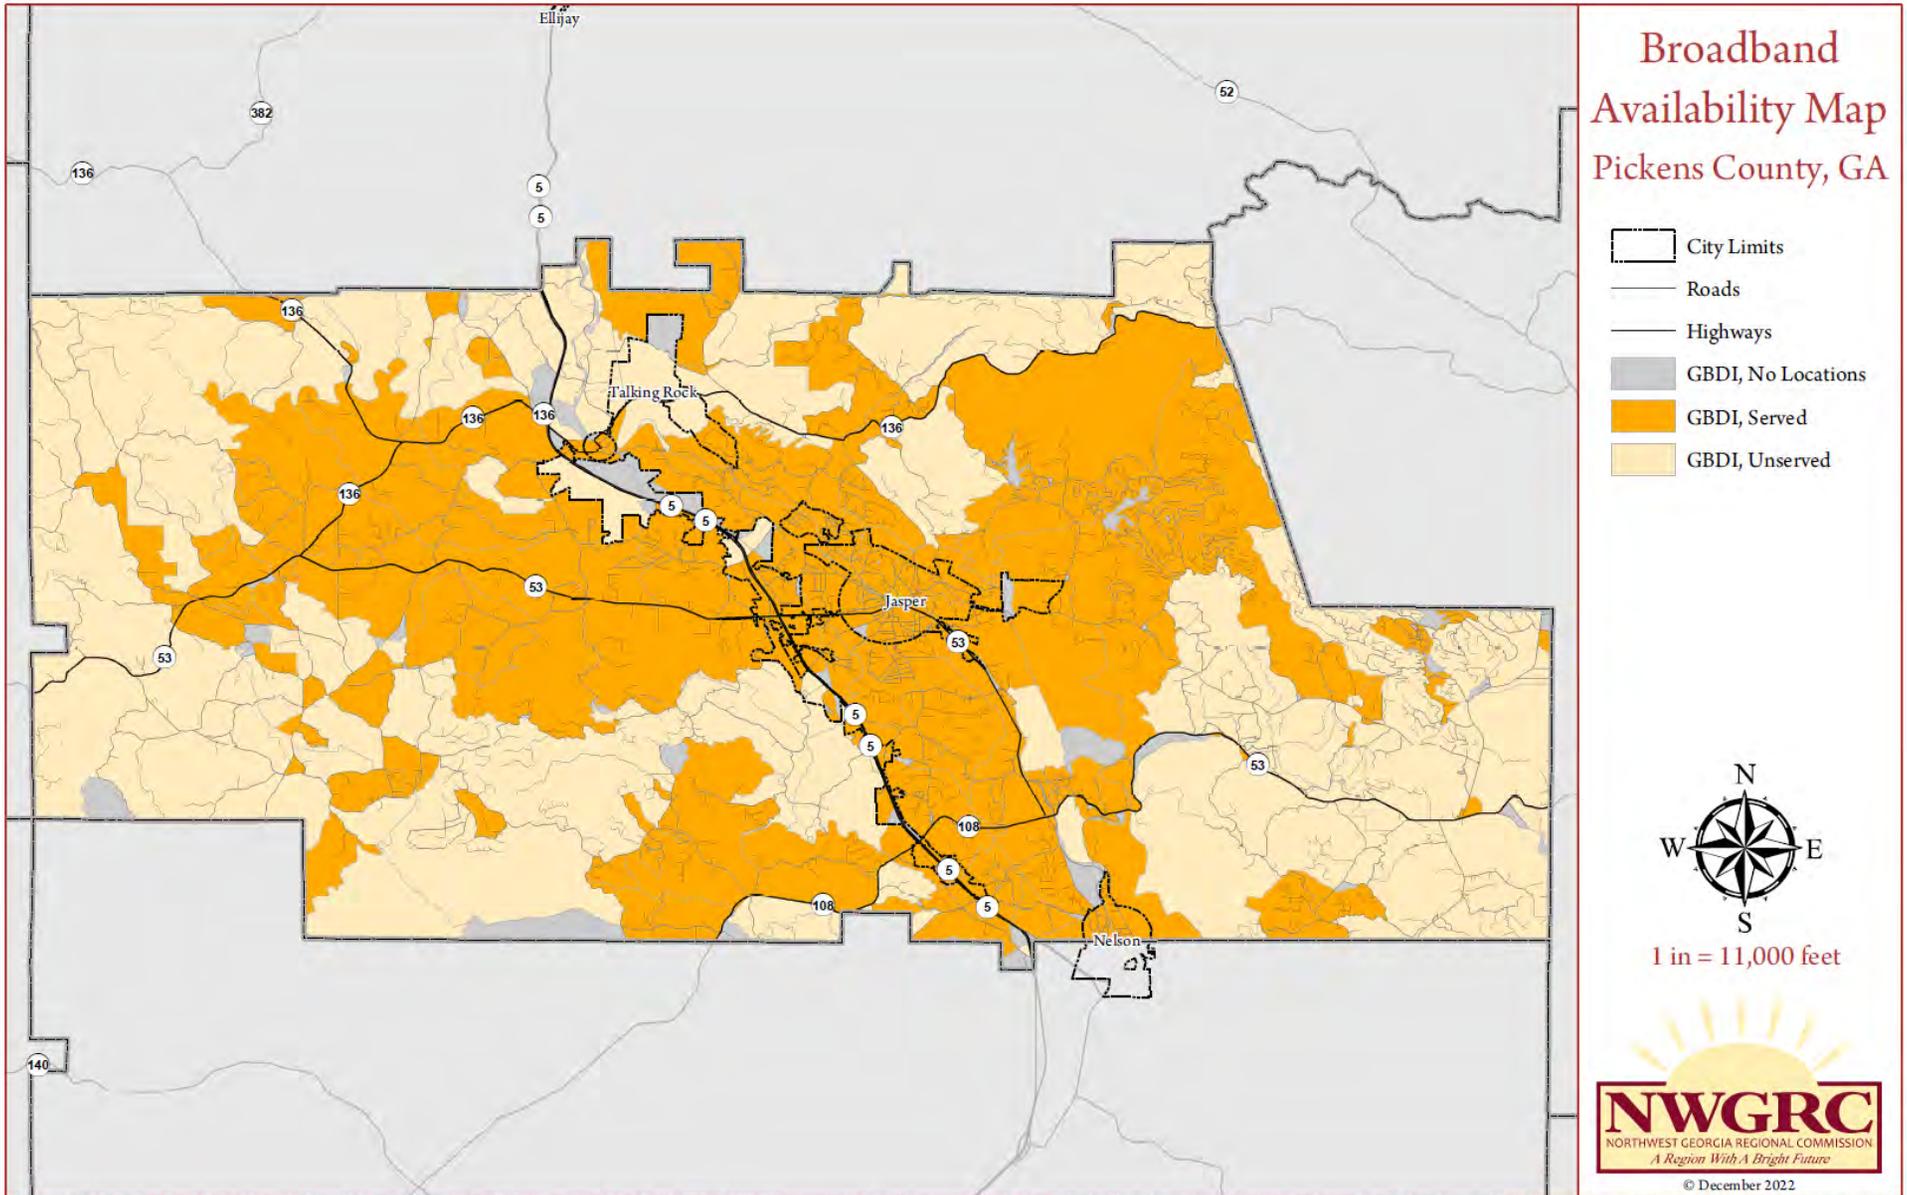

FCC Mapping Methodology

The FCC Form 477 Broadband mapping model is based on census block resolution. This means that if the target broadband service is available to at least ONE location (residential or business) in a census block, the block appears “Served.” Populated census blocks that did not meet this definition are delineated as “Unserved.”

Unserved Areas of Focus

According to the FCC 477 Broadband Map, the amount of served locations within Pickens County is significantly greater than the GBDI mapping model. A close look at the FCC 477 map shows several significant areas as unserved or no locations. The highest concentration of unserved areas is the entire

far western side of the County. There are also notable unserved areas in and around the Town of Talking Rock and the unincorporated area of Marble Hill. The Pickens County Broadband Committee will assess both the FCC 477 and GBDI Broadband maps in order to determine the most effective strategy for funding infrastructural deployments into the unserved areas. Funding assistance will, most certainly, expedite the deployment of broadband infrastructure in the significantly unserved areas.

This is a product of the Northwest Georgia Regional Commission Geographic Information System Services, 503 West Wough Street, Dalton, Georgia 30720, (706)272-2300, www.nwgrc.org. This map is a representation of features displayed and does not constitute a legal representation of any one feature. This product may not be used or reproduced without the NWGRC logo, name, and disclaimer being displayed.

Land Use

The predominant land use throughout Pickens County continues to be rural in nature, which is due primarily to the lack of interstate access, mountainous terrain, current agricultural practices, and limited water and wastewater infrastructure. This overall rural character, however, is also the prevailing trait throughout the northwest Georgia region for many of the same reasons. Areas of greater population density throughout the county are mostly centralized within, or surrounding, Pickens' three municipalities, due to water and wastewater infrastructure availability. These areas of higher population density are also where commercial activity is concentrated. Unincorporated areas within the County were developed as large planned communities- Big Canoe and Bent Tree- both are higher-density residential development with amenities to serve their residents. Moderate population density and commercial land use are found along the County's arterial corridors like State Route 515, and Highways 108, 136, and 53. There are several unincorporated communities throughout the County, which display traits of a Crossroad Community- namely, the Tate, Blaine, Marble Hill, and Hinton Communities. Commercial/industrial activity in Pickens County is generally found along the primary corridors such as State Highways 515, 108, 136, and 53.

Figure 31: View of Sandy Bottom Farms from the Tate Mansion

Figure 33: Vacant store near the City of Nelson

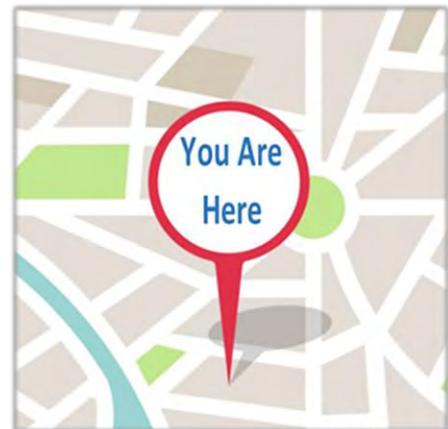

Figure 32: Imerys Marble processing plant in the Marble Hill Community

Figure 34: Panoramic view of Sharp Top Mountain in Pickens County

Land Use Analysis Methodology

This land use analysis relied heavily on GIS to identify and map current conditions, with a base map of the county's watersheds and ground water recharge areas sourced from Georgia DNR Environmental Criteria. Development of land and provision of services via infrastructure are heavily influenced by the contour of the land which varies greatly throughout Pickens County's mountainous terrain. Wastewater and drinking water systems optimize downslope flow; land development is less expensive on flat land, a rare commodity in Pickens County; and central travel corridors often follow ridge lines.

Arguably, the most significant challenge for Pickens County's future, not unlike state and global challenges, is the management of its water. As previously stated, access to drinking water will limit the County's growth; management of wastewater and stormwater can be costly and passing these expenses along to businesses, residents, and tourists increases the cost of living and of conducting business. The land use conversation revealed the need to continue to direct future growth to areas with water and wastewater infrastructure in place, while encouraging future development to be conscious of its impact. By prioritizing new development on vacant lots with water/wastewater access, and prioritizing redevelopment in established residential and commercial centers, the County government and future residents will benefit from cost savings while minimizing impact on natural resources. Unplanned development patterns can exacerbate traffic woes and destroy natural amenities prized by residents. As a result, the following character areas reflect strategies which leverage existing infrastructure and established neighborhoods while accommodating growth in more natural or rural expanses through moderation and character-specific approaches.

This Land Use Plan supports the Community’s Smart Growth Goals identified previously:

- PROTECT AND PRESERVE NATURAL RESOURCES- Protecting the Environment
- TARGET GROWTH- Keeping Open Space Open
- LEVERAGE AND PROMOTE EXISTING AND NEW ASSETS- Thriving Cities, Suburbs, and Towns
- CREATE CONNECTIONS- Better Access, Less Traffic, and Shared Benefits
- MAINTAIN FISCAL VIABILITY- Lower Costs, Lower Taxes

Overview of Character Area Planning

The Comprehensive Plan uses future development maps with character areas to describe and plan land use in the county. Character area planning combines form and function to define distinct areas in a community and move the community toward its vision. The goal is to identify overall patterns of development, not just individual land uses on a lot-by lot basis. A character area has unique traits, holds potential to develop into a unique area through planning and guidance, or must be cared for in special ways because of its particular development issues. Character area planning considers geographical features, like floodplains and existing greenspace, when planning future development. The Comprehensive Plan also follows the Transect Model, where character areas run the gamut from the least developed, most rural area, “Greenspace/Conservation,” to the most developed “Industrial” areas. Future development maps graphically guide managers in planning commercial, industrial, residential, and recreational development with geography and existing land uses in mind.

Figure 35: Pickens County High School

Pickens County Character Areas

ARTERIAL COMMERCIAL CORRIDOR

Vision

A major transportation corridor, State Highway 515 and its surrounding parcels promote the free and efficient flow of traffic and goods, and serves as an attractive gateway to Pickens County.

Narrative

Within unincorporated Pickens County, State Highway 515 is the community's regional commercial corridor, containing a mix of highway oriented businesses, large scale auto dealers, big box retailers, the Piedmont Mountainside Hospital, multifamily residential, the Pickens County Airport, and the Airport Technology Business Park. Future development adjacent to the hospital may include medical facilities, hotels, senior care facilities, retail, and dining services. State Highway 515 provides an easy means of access to the area from surrounding communities whose inhabitants want to shop, dine or enjoy other amenities. The success of this area depends upon the ability of the local governments to cooperate and coordinate in planning its development. The full-service general aviation Pickens County Airport is located near the intersection of Highway 515 and Highway 53. It has a 5,000- foot runway and offers 24-hour fueling, flight planning and hangar storage for private and business aircraft. It provides support for law enforcement, military training, Civil Air Patrol, flight training, aerial photography and surveys. A 17-acre expansion is slated for commercial aircraft hangar development to attract businesses requiring access to airport facilities. The runway accommodates general aviation traffic, including typical business jet aircraft. Local general aviation airports are

Piedmont Mountainside Hospital

Development located at the Hwy. 53 and 515 intersection.

Looking north on Hwy. 515

recognized engines of business and economic development. The airport's planned expansions include the extension of the runway to 5,500 feet, the leasing of parcels for commercial hangars,

the adding of T-hangars for private aircraft storage, the expanding of on-field businesses offering aircraft maintenance and related services, and the construction of a new terminal facility. The Pickens County Airport is poised to attract new business and generate enhanced economic activity for the community.

Development Patterns

The development pattern should seek to:

- Improve traffic flow and minimize traffic congestion at intersections by promoting inter-parcel access and development of a system of connecting streets and/or frontage roads between major intersections.
- Accommodate a mix of uses serving both local and regional markets.
- Provide adequate buffers between commercial uses and adjacent residential areas.

Primary Land Uses

- Primary land uses would include a mixture of retail, restaurants, services, offices, and institutional uses. High-density residential and/or senior residential may be appropriate. Proposals for industrial development would be reviewed on specific proposals presented, not on a speculative basis. Land uses for properties in unincorporated Pickens will include NC or HB land use districts.

Implementation Strategies

- Review and modify, if necessary, County buffer requirements between commercial and residential areas.
- Extend water and wastewater services, where necessary, to growth areas of the corridor.
- Explore incentives for existing development to retrofit to updated design standards.

Quality Community Objectives to be pursued

- Sense of place
- Growth preparedness
- Regional cooperation
- Regional identity

BENT TREE AND BIG CANOE

Vision

Bent Tree and Big Canoe are unique, creative, and imaginative places providing a mix of uses resulting in live, work, play arrangements and lifestyles while preserving the County's scenic and unique environmental resources.

Narrative

Bent Tree and Big Canoe are planned, multi-use developments, and are home to permanent, as well as seasonal, residents. These developments include homes and facilities dating from the 1970s to the present, and have not yet been fully built-out. Bent Tree and Big Canoe are recognized throughout Georgia and beyond as quality developments that contribute to the high quality of life of Pickens County. Each community has hundreds of residences, scenic mountain views, and beautiful water features. Although the majority of Big Canoe is in Pickens County, a significant portion is located in Dawson County. Due to the significance of these developments, Bent Tree and Big Canoe may influence the development of nearby areas. An example is a commercial cluster near the north entrance of Big Canoe. There may also be significant conservation areas present, such as the Potts Mountain area on Steve Tate Highway.

Figure 36: Entrance at Bent Tree

Figure 37: Scenic View from within Bent Tree

Development Patterns

The development pattern should seek to:

- Preserve rural character, scenic views and environmentally-sensitive resources. Cluster residential development in a conservation subdivision design that incorporates significant amounts of open space and natural conservation areas.
- Preserve natural hydrology and drainage ways.
- Limit grading and clearing.

Figure 38: Covered Bridge inside Big Canoe

- Preserve sufficient tree canopy during project development and building construction.
- Carefully design new roadway construction to minimize scenic and environmental impacts.
- Utilize natural features for stormwater management.
- Provide a mix of housing types to meet the diverse needs of the population.
- Incorporate traditional neighborhood design offering a mix of neighborhood commercial, civic, institutional and public gathering places within walking distance of residential areas. Assure that all public facilities and services (roads, utilities, fire protection, recreation, solid waste, etc.) are adequate to accommodate the community's future needs.
- Ensure planning within the gates of Bent Tree and Big is coordinated with applicable covenants and association approvals.

Figure 39: Example of an entrance at Big Canoe

Primary Land Uses

- Mixed residential uses and densities (dependent upon wastewater services)
- Neighborhood commercial.
- Civic and institutional uses.
- Parks and recreation
- Open space and greenways.

Implementation Strategies

- Review and revise, if necessary, the County's Suburban Residential Private Community (SRPC) land use (zoning) district.
- Review the County's development regulations related to planned communities, and revise if necessary.
- Encourage use of Conservation Subdivision principles.
- Utilize *Stormwater Better Site Design Standards* from the Georgia Stormwater Management Manual to conserve natural areas, reduce impervious surfaces, and integrate innovative stormwater treatment in site planning and design.
- Work cooperatively with Bent Tree and Big Canoe representatives to design signage and landscaping to improve gateway corridors to these communities, i.e. along Cove Road and Steve Tate Highway.

- Work cooperatively with representatives of new developments near these communities, such as new commercial and redeveloped commercial on Steve Tate Highway, to encourage quality design features in architecture and site design.

Quality Community Objectives to be pursued

- Heritage preservation
- Sense of place
- Open space and wildlife preservation
- Environmental protection

CROSSROAD COMMUNITIES

Vision

Blaine, Hinton, Marble Hill, and Tate will remain low-density crossroads communities, presenting both residential and commercial opportunities. Each community has unique features that will be preserved.

Blaine: *The clearly defined roadbed of the Old Federal Road, and the site of Fort Newnan, an Indian removal fort, will be preserved, marked, and interpreted as significant Cherokee heritage sites, along with the adjacent cemetery. The old Blaine Store and the Masonic Lodge will remain important community landmarks, and will continue to serve the community.*

Hinton: *Hinton will continue to serve the surrounding area as a rural village center composed of a variety of low-intensity residential, commercial, and agricultural uses while accommodating growth. The agricultural and residential uses define Hinton's character while the need for a commercial core and the intersection create the location.*

Marble Hill: *This area of Southeast Pickens County will retain its historic significance of marble quarrying and will continue to grow with new development and redevelopment of single-family housing with a variety of price ranges.*

Tate *is a model of the quintessential small southern village. The community includes commercial retail and services; medical facilities; churches; a historic school; and a historic train depot anchored by a crossroads and surrounding traditional neighborhood.*

Narrative

Each community features unique historic landmarks to preserve, as well as potential for growth and development fitting the nature and need of the community.

Blaine, near the site of the Cherokee village of Sanderstown, is centered near the dual intersections of Hwy. 136/ Swan Bridge Rd, and Hwy. 136/Antioch Church Road. Low-density development, woods, and fields, and the old Blaine Store are defining features, as is the clearly-defined deep linear roadbed of the Old Federal Road (the Trail of Tears), which runs alongside Hwy. 136.

Figure 40. Blaine Store near Hwy 136 and Swan Bridge Road intersection

Figure 41: Part of Georgia's Old Federal Road in the Marble Hill area

Marble Hill, along with Nelson and Tate, have historic roots in the history of the area’s marble quarries. The area includes roads referencing the community’s heritage related to religious institutions (Four Mile Church Road) and historic routes (Lawson Federal Road). The area’s variable topography and variety of land cover create its picturesque nature. State Highway 53 serves as the main arterial route through the area, and includes industrial, commercial, and other uses. Yellow Creek Road also serves as a major collector route connecting East Pickens with North Cherokee County.

Hinton is the center of a rural area at the intersection of Hwy. 53/ Carver’s Mill Rd/ Hwy. 136/ Bradley Rd, and is defined by open spaces and agricultural uses. The commercial uses in Hinton supply farm goods and general merchandise to residents. Aesthetically unique and interesting buildings (primarily the Feed & Seed, and the old store) define its character. Hinton is a model of a rural, agricultural village center. The Hinton fire station, community center, and nearby churches anchor the area.

Tate is the historic center of marble production in Georgia and has experienced a resurgence due to projects such as the renovation of the public depot and of privately-owned historic buildings. The Tate community retains a great deal of picturesque charm and historic character. Renovations of older homes and maintenance of an active community group have been vital to maintaining its unique character. The depot and rail line are resources for possible tourism and event promotion.

Development Patterns

The development pattern should seek to:

- Preserve historic resources including the Blaine Store, the bed of the Old Federal Road, and the site of Fort Newnan, along with the associated cemetery, as defining features of the area.
- Maintain the low-density development pattern, and conserve open space.
- Maintain historic building setbacks, low-density residential pattern, and open space characteristics.

Hinton stores

Church facilities at Hinton.

Figure 42: Historic Tate Methodist Church along Highway 53

Primary Land Uses

- Low-density, single-family residential (ER, RR, SR county land use districts)
- Agriculture (AG, SA county land use districts)
- Neighborhood commercial (NC county land use district)
- Commercial along Highway 53, Highway 108 (HB, NC county land use districts) with the possibility of industrial (I county land use district)
- Institutional uses (Schools, churches, cemeteries, medical clinic, etc.)

Implementation Strategies

- Coordinate with property owners to define the parameters of Fort Newnan and the associated cemetery; protect them, along with the roadbed of the Old Federal Road; and, promote them as significant Cherokee heritage sites.
- Recognize the location of historic Sanderstown, and recommend that developers acknowledge the possibility of Indian burial sites and significant archaeological remains.
- Continually maintain and, when necessary, upgrade county water lines.
- Plan new community parks that may include playground equipment, a walking area, and/or other facilities.
- Repair existing sidewalks, and install new sidewalks where needed.
- Work cooperatively with business representatives and landowners for development and redevelopment.
- Support and promote area community events, in coordination with community groups, using facilities such as the renovated Tate Depot.
- New commercial development should be agriculture-related and/or neighborhood focused retail or services unless located on Highway 53, where various commercial uses may be acceptable.
- Work cooperatively with the Chamber of Commerce to encourage tourism related to its historical marble quarry character.
- Maintain standards limiting size and height for new freestanding signs, especially on all local (non-State designated) roads.

Figure 43: Historic Tate Gymnasium

Figure 44: Yellow Creek Fire Station in the Marble Hill area

- Consider new gateway/corridor landscaping, signage, etc. welcoming visitors from Dawson County and Cherokee County.
- Assist owners of historic properties (Tate House, etc.) with acquiring grant funding for preservation and enhancement.
- Work with Pickens County Fire personnel regarding the possible relocation of the Tate fire station.

Quality Community Objectives

- Heritage preservation
- Sense of place
- Open space preservation
- Growth preparedness

Figure 45: Commercial area near Highway 108 and Highway 53 intersection

Figure 46: Historic Tate Mansion along Highway 53

EAST PICKENS CONSERVATION AREA

Vision

The county's most significant scenic views and environmentally sensitive area are preserved to maintain the County's image as the "Gateway to the Mountains."

Narrative

This area includes the high mountain ridges, steep slopes and stream valleys of eastern Pickens County. The higher elevations within the area qualify as "Protected Mountains" under the Georgia Mountain Protection Act. Many of the streams and lakes contain endangered fish species, whose habitats can be negatively impacted by development activity. Because of its scenic qualities, this area is an attractive

location for second home/retiree developments as well as permanent resident homes. Concerns about development in the area include: Water quality impact due to erosion from home construction and road construction; Loss of trees; Impacts on scenic views; and new commercial retail, which may not be appropriate in this area of low-intensity development. The intent of this character area is to maintain scenic views, tree cover, and water quality that contribute to the community's character as the "Gateway to the Mountains." Since 2000, thousands of acres in East Pickens have been saved for conservation green space by nonprofits as well as the county government. Public, private, and nonprofit (open to public) trails are present in the area. Numerous residents have stated that the area's scenic views, wildlife, and outdoor activities are contributing factors to the community's quality of life. When asked where residents would take out-of-town visitors, many residents stated that they would show visitors scenic spots on, and adjacent to, Burnt Mountain Road, Cove Road, Grandview Road, and Monument Road. In

addition to scenic areas and conservation green space, tourism-related businesses and retreat centers are present.

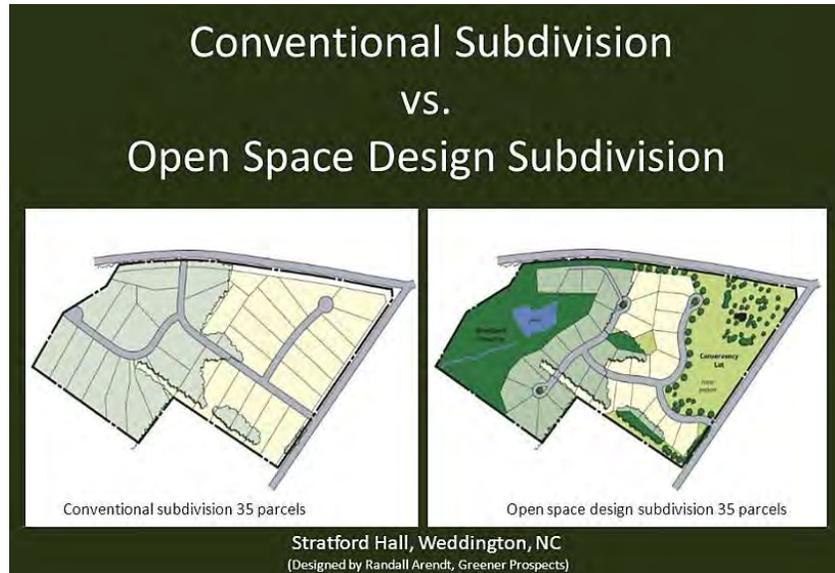

Development Pattern

The development pattern should seek to:

- Protect steep slopes, scenic views and environmentally sensitive areas by maintaining low-density development.
- Encourage conservation subdivision design for new residential development that incorporates significant amounts of open space and natural conservation areas.
- Connect new conservation subdivisions to create the opportunity for a countywide network of greenways.
- Limit grading and clearing.
- Preserve natural hydrology and drainage ways.
- Preserve existing trees and sufficient canopy cover during development activity.
- Carefully design roadway construction to minimize scenic and environmental impacts.
- Utilize natural features for stormwater management

Primary Land Uses

- Greenway and Conservation Areas (county AG land use district)
- Undeveloped land left in a natural state
- Low-intensity single-family residential (county SA, ER, RR land use districts)
- Trails (ensure hiking, equestrian, non-motorized bike trails uses do not conflict with one another)
- Tourism-related businesses, event centers, and other facilities requiring conditional use approval

Implementation Strategies

- Maintain large lot size requirements for properties that do not use conservation / open space design development.
- Provide incentives to encourage use of Conservation Design Subdivision principles.
- Utilize Best Management Practices for any land disturbance activities, including tree harvesting and utility construction
- Utilize *Stormwater Better Site Design Standards* from the Georgia Stormwater Management Manual to conserve natural areas, reduce impervious surfaces and better integrate stormwater treatment in site planning and design
- Promote the use of conservation easements and conservation tax credits by landowners to preserve environmentally sensitive land.
- Utilize the Georgia Land Conservation Program as a source of grants, low interest loans and tax incentives for preservation of open space.
- Continually maintain city and county water lines serving the East Pickens area.
- Promote the East Pickens area as a senior retirement destination, and work cooperatively with senior development representatives on new development proposals.
- Work cooperatively with private and nonprofit groups with proposals for land conservation.
- Maintain standards for small freestanding signs – as an example, new freestanding signs on local (non-State) roads in East Pickens should not exceed 10 feet in height and should not exceed 32 square feet in area.
- Plan for addition of educational signs in the Burnt Mountain overlook area informing visitors of the area’s historic (original start of the Appalachian Trail), environmental, and scenic significance.

Quality Community Objectives to be pursued:

- Sense of place
- Open space preservation
- Environmental protection
- Growth preparedness

FOOTHILLS CROSSROADS

Vision

This crossroads area is developed as a village center that provides a variety of commercial services in support of surrounding residential development. Development contributes to the rural scenic and mountain architectural characteristics of the area.

Narrative

This crossroads community is a commercial area serving residents of the Marble Hill and Big Canoe areas. The population will continue to increase as will the demand for convenience goods and services. The surrounding area is characterized by rural scenic views with foothill mountain characteristics.

Figure 47: Foothills Shopping Center

Development Patterns

The development pattern should seek to:

- Provide a range of businesses to serve the Marble Hill and East Pickens area (retail, restaurants, institutional facilities, offices, services, etc.)
- Establish sidewalks and bike paths connecting the commercial center to future residential developments.
- Limit the size and height of signs – as an example, freestanding signs over 15 feet tall and over 50 square feet in area may be excessive on the two-lane roads in this area.
- Landscape parking lots for new developments to provide shade and reduce impervious surfaces.
- Preserve the beautiful rural quality of the surrounding area.
- Encourage compatible architectural styles that maintain local characteristics in place.
- Reduce driveway cuts on Steve Tate Highway, SR 53, and Yellow Creek Road by promoting inter-parcel access and connecting roads.

Primary Land Uses

- Mixed land use consisting of commercial retail and services, offices and low density residential off the main roads (county NC and HB districts on main roads such as Steve Tate Highway and Hwy 53; county ER, RR, and SR districts for properties on adjacent smaller roads)

- Public and semi-public institutional uses (Schools, churches, and civic uses.)

Implementation Strategies

- Develop a neighborhood park for the area to include playground equipment, walking areas, and/or other facilities desired by residents.
- Work cooperatively with private and/or nonprofit groups who may wish to add signage in the Foothills area directing visitors to nearby places such as Big Canoe, churches, Gibbs Gardens, etc.
- Continually maintain and perform necessary upgrades to county water lines serving the Foothills area.
- Encourage new multi-use paths for use by pedestrians, cyclists, golf carts, etc.
- Work cooperatively with business representatives to consider tourism-related uses in this scenic mountain area.

Quality Community Objectives to be pursued

- Sense of place
- Open space preservation
- Appropriate businesses
- Growth preparedness

RURAL RESIDENTIAL

Vision

The Rural Residential area represents “traditional” rural Pickens County. While the rest of Pickens County is growing rapidly, this area should retain its less-developed, rural, open space characteristics, and maintain them for future generations.

Narrative

The Rural Residential area includes western and northern Pickens County; it consists of predominantly rural, less-developed land suited for agricultural, forestry and large-lot residential uses. Development should respect the county’s farming and forestry tradition and maintain its rural characteristics. This area lacks extensive public water, roads, and other public services necessary for more intense development. If subdivision of land for residential purposes occurs in this area, environmental (floodplain, steep slope, stormwater, etc.) and infrastructure should be carefully reviewed.

Figure 48: Typical agricultural and residential development in Rural Pickens County

Development Pattern

The development pattern should seek to:

- Protect farmland, open space, and environmentally sensitive areas through low-density development.
- Preserve the economic viability of agriculture, livestock production and forestry activities.
- Limit grading and clearing.
- Preserve natural hydrology and drainage ways.
- Carefully design roadway alterations and new road construction to minimize scenic and environmental impacts.
- Preserve rural character, viewsheds, and natural features/resources.
- Utilize natural features for stormwater management.
- Accommodate low-intensity uses.

Figure 49: Antioch Church in Pickens County

Primary Land Uses

- Agricultural (AG, SA county land use districts)
- Forestry (AG county land use district)
- Low density single-family residential (ER, RR county land use districts)
- Recreational facilities
- Convenience goods and service establishments at strategic locations along major collector and arterial roads, especially State routes (NC, HB county land use districts)

Figure 50: Remnants of a former dwelling along Pleasant Union Road in Pickens County

Implementation Strategies

- Utilize Best Management Practices for land disturbance activities, including tree harvesting and utility construction.
- Utilize *Stormwater Better Site Design Standards* from the Georgia Stormwater Management Manual to conserve natural areas, reduce impervious surfaces and better integrate stormwater treatment in site design.
- Promote the use of conservation easements and conservation tax credits by landowners to help preserve viable farmland.
- Utilize the Georgia Land Conservation Program as a source of grants, low interest loans and tax incentives for preservation of agricultural land.
- Support and promote positive community events at community centers such as fire stations area churches, and other facilities.
- Work cooperatively with business representatives and landowners for development/redevelopment to support agri-business and agri-tourism.
- Continually maintain and, where necessary, upgrade water lines serving the area.

Figure 51: Twin Mountain Lake in Pickens County

Quality Community Objectives to be pursued

- Sense of place
- Open space preservation
- Environmental protection
- Heritage preservation

SUBURBAN RESIDENTIAL

Vision

This area is envisioned to become an extension of the broader Jasper community. Quality of life is enhanced by improved street connectivity, sidewalks, and trails (pedestrian, bike, golf cart, etc.) to provide alternative ways to get to parks, schools, and neighborhood commercial areas.

Narrative

These are areas around the City of Jasper that have some development and/or potential to develop further. The area can be generally described as west of SR 515 to east of SR 53 (Jasper-Tate section), and north/south from Philadelphia Road to south of SR 108. These areas typically consist of single-family residences, at different price points, served by a system of curvilinear streets and cul-de-sacs. Interspersed throughout the area are schools, a county park, a golf course and scattered commercial uses. Some agricultural uses are also found in the area. The residential areas have typically developed in a leap-frog fashion and tend to lack street connectivity, adding to traffic congestion on collector roads. The area contains significant tracts of vacant land with development potential. Without intervention, these areas are likely to evolve with low pedestrian orientation, larger lot residential areas with scattered civic buildings and various street patterns. This area contains a developed public water system, some wastewater utilities, a good road network and other community services, all of which can be economically utilized and cautiously extended to potential infill areas. Mixed-use, higher-density residential development opportunities should be encouraged and optimized in this area, minimizing low-density sprawl development patterns seen elsewhere in the county. Encouraging infill development would reduce jobs-to-housing travel distances and commute times. Residential development should offer a range of choices related to size, cost, and housing types, in order to increase the

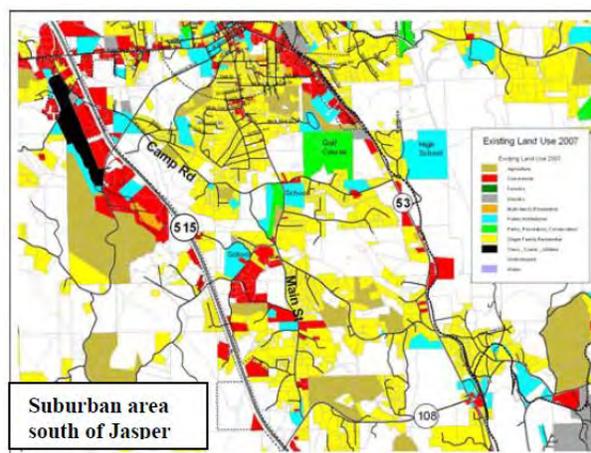

Figure 52: A variety of housing options should be available to offer workforce housing

availability of attainable housing within the county. Traditional neighborhood development patterns are encouraged including compact development, mixed residential uses within walking distance, and community amenities such as schools, parks and neighborhood commercial centers.

Development Patterns

The development pattern should seek to:

- Provide a system of streets to improve connectivity between subdivisions and the existing road network.
- Incorporate sidewalks, traffic calming measures, golf cart paths, and biking facilities to provide safe, alternative ways of travel within and between neighborhoods, and to improve connectivity to schools, parks, and neighborhood commercial areas.
- Accommodate infill development that compliments the style, scale, and setbacks of existing residential areas.
- Preserve existing mature trees during the development process.
- Preserve open space and greenway opportunities.
- Accommodate a mix of residential uses.
- Encourage neighborhood commercial uses at strategic locations along collector roads (S. Main Street/Refuge Road, Camp Road, and State Routes 53 and 108).

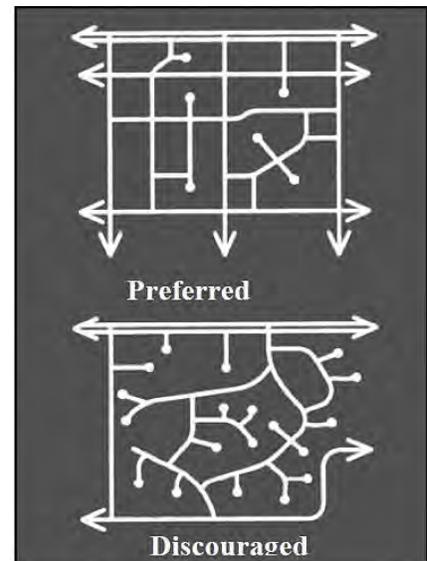

Figure 53: Example of preferred street design

Primary Land Uses

- Mixed residential uses and densities (dependent on wastewater availability).
- Parks and passive recreation areas.
- Civic and semi-public institutional uses
- Neighborhood commercial

Implementation Strategies

- Develop a plan to improve/expand/extend public water and wastewater systems to potential infill development areas. Continually maintain existing city and county water lines in the area.
- Assess the need and location of additional sidewalks, trails and bike route facilities and develop a plan for implementation.
- Amend development regulations to require sidewalks in all new developments.

- Expand/renovate Roper Park, and investigate possible new park properties.
- Provide incentives to encourage use of “Conservation Design” principles for new subdivision development.
- Revise City of Jasper ordinances to accommodate higher-density and mixed-use residential development in the incorporated areas.

Quality Community Objectives to be pursued

- Sense of place
- Transportation alternatives
- Traditional neighborhood development
- Infill development
- Housing choices
- Growth preparedness

Jasper Character Areas

EAST JASPER GATEWAY CORRIDOR

Vision

This eastern gateway to the City presents a favorable impression to visitors by maintaining the current mix of uses complemented by improved landscaping and other streetscape amenities.

Narrative

This section of the Burnt Mountain Road – Cove Road corridor in the city limits of Jasper includes the Appalachian Campus of Chattahoochee Technical College, Jasper City Hall, park facilities, public housing, multi-family housing, a library, and commercial uses. This corridor is the eastern entrance to the city.

Figure 54: Chattahoochee Technical College campus in Jasper

Development Patterns

The development pattern should seek to:

- Accommodate a variety of activities on the Chattahoochee Technical College campus, including community events and college-specific activities.
- Maintain the current mix of existing uses and encourage quality redevelopment of buildings and sites.
- Improve sidewalk conditions along the corridor and extend sidewalks to provide better connections between adjoining residential neighborhoods, Peace and Perrow Parks, and library.
- Add landscaping on public properties and on rights-of-way (where appropriate and not conflicting with site visibility and utilities) to provide shade and reduce impervious surfaces. Encourage improvement of commercial developments to include added landscaping.

Primary Land Uses

- Public and institutional uses
- Multi-family residential
- Neighborhood commercial uses.

Implementation Strategies

- Expand downtown streetscape improvements along Burnt Mt. Road to the Cove Road intersection.
- Determine the feasibility of establishing a roundabout at the intersection of Burnt Mt. Road and Cove Road to replace the current 3-way stop.
- Plan for Jasper gateway improvements at the Burnt Mt. Road and Cove Road intersection for added landscaping and possible signage.
- Review and, where appropriate, revise the Jasper commercial design standards for contributing quality new and redeveloped commercial structures.
- Review and, where appropriate, revise the Jasper development regulations for increased landscaping and sidewalks for new and redeveloped commercial sites.
- Continually maintain and upgrade Jasper water and wastewater lines serving the area.
- Complete an assessment and evaluation of the current Jasper city park facilities and, where appropriate, redevelop and/or upgrade the area.
- Work cooperatively with business representatives on possible new and redeveloped commercial structures and sites.

Figure 55: Example of a roundabout for consideration

Quality Community Objectives to be pursued

- Infill development
- Sense of place
- Transportation alternatives

HISTORIC DOWNTOWN JASPER

Vision

The Jasper Downtown area retains its strong sense of place and unique historic characteristics, and remains a viable community focal point for both residents and visitors.

Narrative

Historic downtown Jasper includes the Central Business District as well as surrounding areas on both sides of Hwy. 53; it contains a blend of commercial businesses, professional offices, the Courthouse, and a few historic residential properties. This area has consistent development patterns including traditional building facades, buildings close to the street, and use of sidewalks. Most of the buildings represent historic architecture, giving the downtown a strong sense of place. Public art is displayed at various points highlighting the marble resources mined in the nearby Tate and Marble Hill communities. Maintaining the historic integrity of the downtown will be important to retain its sense of place; signage, exterior changes to buildings and new construction should honor the existing character. Encouraging a strong mix of uses, including commercial (restaurants, services, office, retail), as well as residential (above or behind commercial), will be important for economic vitality. Coordinating downtown events throughout the year helps to make this area dynamic and active.

Pickens County Courthouse

Development Patterns

The development pattern should seek to:

- Retain and enhance existing building stock through maintenance and rehabilitation consistent with historic characteristics.
- Maintain a mix of uses that continues to attract both residents and visitors.
- Encourage mixed uses within buildings such as residential development of underutilized second floors, and sidewalk dining.

Figure 56: View of Jasper's downtown Main Street

- Continue to make downtown a focal point for community activities, public art displays, and festivals.
- Maintain a strong connection with adjoining neighborhoods via sidewalks and other pedestrian amenities.

Primary Land Uses

- Mixed commercial including retail, professional offices and services.
- Civic/institutional
- Residential on upper floors as well as behind and adjacent to commercial structures.
- Parks, public gathering places.

Implementation Strategies

- Investigate the feasibility of establishing a Historic District.
- Seek designations such as the Better Home Town and Main Street programs available through the Georgia Department of Community Affairs.
- Expand downtown streetscape improvements theme to West and East Church Streets, as well as other side streets.
- Expand parking opportunities.
- Improve gateway landscaping and signage entering downtown from all directions.
- Continually maintain and upgrade Jasper water and wastewater lines serving downtown.
- Encourage entrepreneurial creativity with uses and facilities downtown. Be flexible in working cooperatively with businesses and others on new ideas for downtown, including new development/redevelopment.

Figure 57: View of sidewalks and streetscapes in downtown Jasper

Figure 58: View of historic downtown Jasper

Quality Community Objectives to be pursued

- Heritage preservation
- Sense of place
- Housing choices

Figure 59: Historic Wood Bridge in downtown Jasper

JASPER ARTERIAL COMMERCIAL CORRIDOR

Vision

A major transportation corridor, State Highway 515, and its surrounding parcels, promotes the free and efficient flow of traffic and goods; it serves as an attractive gateway to the City of Jasper.

Narrative

Within the City Limits of Jasper, State Highway 515 is the community's regional commercial corridor; it contains a mix of highway-oriented businesses, large scale auto dealers, big box retailers, the Piedmont Mountainside Hospital, multifamily residential, the county airport, and the Airport Technology Business Park. Future development adjacent to the hospital may include medical facilities, one or more hotels, senior care facilities, retail, and dining services. State Highway 515 provides an easy means of access to the area from surrounding communities whose inhabitants want to shop, dine or enjoy other amenities. The success of this area depends upon the ability of the city and county governments to cooperate and coordinate planning for this area. In this corridor, too, is the Pickens County Airport, located west of the intersection of Highway 515 and Highway 53; it has a 5,000- foot runway and is a full-service general aviation airport offering 24-hour fueling and flight planning. It has hangar storage for private and business aircraft, and supports law enforcement, military training, Civil Air Patrol, flight training, aerial photography, and surveys. A 17-acre extension of airport property is designed for commercial aircraft hangar development to attract businesses whose operations rely on access to airport facilities. The runway accommodates general aviation traffic, including typical business jet aircraft. Local general aviation airports are recognized engines of business and economic development. With the extension of its runway to 5,500 feet, construction of commercial hangars, the planned addition of T-hangars for private aircraft storage, expansion of on-field businesses offering aircraft maintenance and other services, and plans to construct a new

Piedmont Mountainside Hospital

Development located at the Hwy. 53 and 515 intersection.

Looking north on Hwy. 515

terminal facility, the airport is poised to attract new business and generate enhanced economic activity for the community.

Development Patterns

The development pattern should seek to:

- Improve traffic flow, minimize traffic congestion at intersections by promoting inter-parcel access, and develop connecting streets and/or frontage roads between major intersections.
- Accommodate a mix of uses that serves both local and regional markets.
- Provide adequate buffers between commercial uses and adjacent residential areas.

Primary Land Uses

- A mixture of primarily retail, restaurants, services, offices, and institutional uses. High-density residential and/or senior residential may be appropriate. Proposals for industrial development would be reviewed based on a specific proposal rather than on a speculative basis (for properties in unincorporated Pickens, NC or HB land use districts)

Implementation Strategies

- Review and modify, if necessary, City buffer requirements between commercial and residential areas.
- Review and modify, if necessary, City standards for new commercial developments, including exterior finish materials, roof pitch, signage, and landscaping.
- Prepare a plan to develop a system of connecting streets, frontage roads, and other inter-parcel connectivity along the corridor to minimize excessive driveway cuts directly on the Highway.
- Extend water and wastewater services, where necessary, to growth areas of the corridor.
- Explore incentives for existing development to retrofit to updated design standards.

Quality Community Objectives to be pursued

- Sense of place
- Growth preparedness
- Regional cooperation
- Regional identity

JASPER TRADITIONAL NEIGHBORHOOD

Vision

Jasper's traditional neighborhoods provide a variety of housing choices in close proximity to the downtown and other commercial corridors. Accessibility is improved with continual maintenance and additions to the existing network of sidewalks and trails (pedestrian, bike, and/or golf cart).

Narrative

Jasper's traditional neighborhoods contain older housing stock and traditional development patterns. These areas consist of moderate to well-maintained single-family and scattered multi-family housing. Density is higher due to the presence of wastewater services. These neighborhoods are typically served with a grid system of streets and have shallower building setbacks. The neighborhoods are thought of as "in-town" due to their proximity and accessibility to the downtown. A few of the closer neighborhoods contain sidewalks, providing accessibility to the downtown. Vacant tracts of land are still available. New development and redevelopment may include cluster detached single-family homes, condos, townhouses, senior housing, and/or apartments.

A variety of housing is available in Jasper's traditional neighborhoods.

Development Patterns

The development pattern should seek to:

- Maintain existing homes and character defining features such as drives, walls, landscaping, and tree cover.
- Promote building rehabilitation that is in keeping with a building's existing architectural style and scale, and that of neighboring homes.
- Accommodate in-fill development complementing the scale, setbacks and style of adjacent homes.
- Increase pedestrian connectivity between neighborhoods, downtown, schools, parks, and other activity centers.
- Accommodate senior housing, which can be integrated into the existing development pattern and can benefit from close proximity to downtown and other streets' commercial uses.

Primary Land Uses

- Mixed residential uses with a variety of densities (cluster detached single-family homes, condos, townhouses, senior housing, and/or apartments).
- Civic, institutional uses
- Neighborhood commercial on arterial and major collector routes, at significant intersections
- Parks, recreational areas

Implementation Strategies

- Create and adopt new residential architectural design standards to ensure compatibility between old and new development.
- Repair existing sidewalks; install new sidewalks where needed.
- Add and improve paths and multi-use trails.
- Plan for acquisition of new land to increase parks and recreation offerings in Jasper. New park(s) may include playgrounds, ballfields, trails, tennis courts, and/or other facilities.
- Pursue Federal and State grants and other programs to rehabilitate and upgrade houses where needed.
- Encourage senior housing opportunities in close proximity to daily shopping, health, and recreation needs.
- Prepare and adopt senior housing design standards that encourage “aging-in-place;” these address home and site features that are more functional for seniors.
- Review and/or revise Jasper’s regulations regarding residential development and redevelopment.
- Review and/or revise Jasper’s zoning regulations regarding residential development and redevelopment.
- Upgrade Jasper’s water and wastewater infrastructure.

Figure 60: Traditional Neighborhood dwellings near downtown Jasper

Quality Community Objectives

- Heritage preservation
- Sense of place
- Traditional neighborhoods
- Infill development
- Housing choices

NORTH JASPER CORRIDOR

Vision

This northern gateway to the city presents a favorable impression to visitors by maintaining this as a viable commercial corridor and industrial area.

Narrative

This area consists of North Main Street and areas to the east along the railroad, within the city limits of Jasper. A mix of residential, commercial and institutional uses are located along the road approaching the downtown area. The majority of the industrial uses and more intense commercial uses, including Pioneer Industrial Park, are adjacent to the railroad to the east. North Main Street is the primary northern entrance into Jasper. Since Hwy. 515 opened and became the primary north-south corridor through the county, traffic volumes on North Main have diminished. A number of vacant tracts are scattered throughout the corridor. Inconsistent building setbacks, architecture and materials, mixed signage size and height, and a lack of landscaping characterize the corridor. A number of residential subdivisions lie adjacent to the corridor with limited street connectivity to North Main Street.

Figure 61: View along North Main approaching downtown Jasper. Note poorly defined driveway entrances.

Development Patterns

The development pattern should seek to:

- Preserve the diverse industrial base and fill in vacant tracts within the industrial park.
- Provide adequate buffers between industrial areas and adjacent residential areas.

- Provide sidewalk connections between North Main Street and adjacent residential areas.
- Increase landscaping throughout the area to provide shade, reduce impervious surfaces, buffer parking areas, and improve the appearance of individual sites and the entire corridor.
- Clearly define driveway cuts and entrances.
- Provide a mix of uses along North Main Street to serve populations north of the City.

Figure 62: Typical industrial Structure located in Pioneer Industrial Park.

Primary Land Uses

- Industrial
- Various commercial (offices, retail, services, etc.)
- Public and institutional uses

Implementation Strategies

- Seek grants to fund desired streetscape improvements such as improved or extended sidewalks, landscaping, lighting and underground utilities.
- Improve inter-parcel access and street connectivity to adjoining neighborhoods.
- Review and/or revise Jasper’s commercial design standards for contributing quality new and redeveloped commercial structures.
- Review and/or revise Jasper’s development regulations requiring sidewalks and increased landscaping for new and redeveloped commercial sites.
- Continually maintain and/or upgrade Jasper water and wastewater infrastructure.
- Work cooperatively with business representatives to attract new commercial and industrial developments.

Quality Community Objectives to be pursued

- Infill development
- Transportation alternatives

SOUTH JASPER GATEWAY CORRIDOR

Vision

This southern gateway to the city presents a favorable impression to visitors by maintaining this as a viable commercial corridor while improving overall streetscape aesthetics.

Narrative

Jasper's East Church Street corridor is south of downtown along State Highway 53. This corridor was once the primary commercial highway leading into Jasper from the south; following construction of the four-lane Hwy. 515 west of the city, no significant number of new buildings have been constructed along the corridor. However, there has been some redevelopment and reuse of existing buildings in recent years. The area includes a mix of older commercial establishments, scattered residential uses, the County Administrative Offices, and other public uses. Deep building setbacks, inconsistent building architecture and materials, mixed size and height of signage, and a lack of landscaping characterize the corridor. The railroad borders the eastern side of the corridor. A number of vacant tracts are located to the rear of the commercial uses; these could be developed for multi-family or other higher density residential development. The presence of some sidewalks and proximity to downtown present the potential for pedestrian scale development.

Figure 63: Recommendations for this corridor include vegetative streetscapes, underground utilities, and improved pedestrian infrastructure

Development Patterns

The development pattern should seek to:

- Maintain viability as a commercial corridor, while enhancing overall street appearance through landscaping, sign control, and pedestrian scale lighting.
- Improve sidewalk connections along the corridor and with adjoining residential neighborhoods.
- Landscape parking lots to provide shade and reduce impervious surfaces.

- Encourage upgrades to the appearance of existing older commercial buildings with façade improvement or new architectural elements.
- Encourage shallow setbacks and quality construction for new development.
- Accommodate a mix of uses that primarily serves the local market demand versus a regional market demand.
- Encourage multi-family or other high density residential development on vacant tracts behind the commercial uses.

Primary Land Uses

- Retail, offices, restaurants, and other commercial services
- Industry
- Multi-family or other high density residential
- Public and other institutional uses

Implementation Strategies

- Seek grants to fund desired streetscape improvements such as improved or extended sidewalks, landscaping, lighting and underground utilities.
- Improve inter-parcel access and street connectivity to adjoining neighborhoods.
- Review and/or revise Jasper’s commercial design standards for contributing quality new/redeveloped commercial structures.
- Review and/or revise Jasper’s development regulations for sidewalks and added landscaping for new and redeveloped commercial sites.
- Continually maintain and upgrade Jasper water and wastewater infrastructure.
- Work cooperatively with business representatives on possible new commercial and multi-family developments.

Quality Community Objectives to be pursued

- Infill development
- Transportation alternatives
- Housing choices

WEST JASPER GATEWAY CORRIDOR

Vision

The Highway 53/ West Church Street corridor connects downtown Jasper to State Highway 515. As the gateway to the City of Jasper, this corridor serves as an extension of downtown, providing a mixture of uses to serve residents and visitors alike.

Narrative

The Highway 53/ West Church Street corridor between Hwy 515 and historic downtown Jasper is the primary entrance to the city. This corridor is characterized by a mix of uses, numerous curb cuts that impede traffic flow, and a lack of landscaping and other streetscape amenities. A mix of signage size and heights also dominate the landscape. The corridor is also proposed for major widening in the near future. To draw people from Hwy. 515 into downtown, as well as serve surrounding neighborhoods, new development/ redevelopment along this corridor should be inviting, attractive and contain a mix of uses. This can be done by a combination of incentives and requirements to improve landscaping, street lighting, landscaping, signage, and sidewalks. Improved public signage will help direct and inform visitors about downtown businesses and facilities.

Development Patterns

The development pattern should seek to:

- Encourage the continued transition of this corridor into a commercial mixed-use link between the core of historic Jasper and the dynamic commercial/retail node on Hwy 515 at the intersection with Hwy 53.
- Encourage and/or require new and redeveloped buildings to have masonry exterior finish materials.
- Minimize traffic congestion by promoting inter-parcel access and developing a system of connecting streets to link downtown Jasper with areas surrounding the corridor and Hwy. 515.

- Limit the size and height of signs— as an example, freestanding signs over 20 feet tall and over 100 square feet in size may be excessive on this two-lane road.
- Incorporate streetscape enhancements such as underground utilities, sidewalks, landscaping and decorative streetlights to make it more pedestrian friendly.
- Continually maintain and/or upgrade water and wastewater capacity in this area.
- Parking lots should be adequately landscaped to provide shade, and reduce impervious surfaces.
- Accommodate a mix of institutional, medical, office, restaurant, retail, and service uses.

Primary Land Uses

- Retail, restaurants, offices, and other services.
- Institutional uses
- Multi-family residential and senior residential where appropriate

Implementation Strategies

- Review and/or revise signage at/ near the intersection with Hwy. 515 and along the corridor to direct the traveler to downtown Jasper.
- Strategically extend the existing grid network along the corridor to provide new access to and connections between existing roads.
- Extend sidewalks on both sides of the road the entire length of the corridor.
- Modify Jasper’s sign ordinance to limit height, size and location of freestanding signs.
- Revise Jasper’s landscaping regulations to enhance tree installation/ replacement requirements.
- Adopt architectural standards requiring masonry facades to improve the quality and aesthetics of commercial development.
- Consider parking lot lighting requirements for Jasper with maximum height standards and style requirements that will reduce light pollution.
- Plan and sign alternative routes for trucks and other through-vehicles to bypass West Church Street (i.e., A.W. Lawson Boulevard and Philadelphia Rd.) If the proposed West Church Street

widening project is not feasible or will not be completed in the next five years, consider improving the alternate routes with wider shoulders and other road enhancements.

Quality Community Objectives to be pursued

- Infill development
- Sense of place
- Transportation alternatives
- Growth preparedness

Nelson Character Areas

INDUSTRIAL

Vision

This area is envisioned to retain its industrial and manufacturing character for many years to come. Properties within this character area are largely responsible for Nelson’s history, and will continue to be a part of its future, providing job opportunities, tax revenue, and a way of life for the community.

Figure 64: Skilled workforce inside Blue Ridge Marble Co.

Narrative

Although most of the industrial properties within Nelson have existed for many decades, they continue to produce their products consistently and on a large scale. The Industrial character area includes sites with higher intensity manufacturing, assembly, and processing activities. Impacts associated with industrial properties may include noise, particulate matter, vibration, smoke, dust, gas, fumes, odors, or radiation, which are not required to be contained on-site.

Development Patterns

- Encourage buffers between industrial structures/uses and residential areas

Primary Land Uses

- Industrial
- Park/Recreation/Conservation

Implementation Strategies

More detailed sub-area planning:

- Have mix of small and large industry appropriately buffered from residential developments

New or revised local development regulations:

- Require percentage of open space on site

Incentives:

- Tax breaks for incubators and small business for reuse and site cleanup

Public Investments:

- Install high-speed internet, provide alternative access roads

Infrastructure Improvements:

- Maintain and upgrade roads and install traffic lights; improve utilities.

Quality Community Objectives

- Infill development
- Sense of place
- Transportation alternatives
- Regional identity
- Heritage preservation
- Open space preservation
- Environmental protection
- Growth preparedness
- Appropriate businesses
- Employment options

NELSON SUBURBAN RESIDENTIAL

Vision

This area is envisioned to become an extension of the more recently developed Nelson community. Quality of life is enhanced by improved street connectivity, sidewalks, and trails (pedestrian, bike, golf cart, etc.) to provide alternative access to parks and neighborhood commercial areas.

Narrative

These are areas around the City of Nelson that have some development and have the potential to develop further. These areas typically consist of single family residences at different price points served by a system of curvilinear streets and cul-de-sacs.

This area contains a developed public water system but no wastewater utilities, and a good road network and other community services that can accommodate infill areas.

Encouragement of infill development would reduce jobs-to-housing travel distances and commute times. Residential development should offer a range of housing choices related to size, cost, and housing types in order to increase the availability of affordable housing within the city. Traditional neighborhood development patterns are encouraged, including compact development and mixed residential uses. They should be within walking distance of one another as well as community amenities such as schools, parks and neighborhood commercial centers.

Figure 65: A variety of housing options should be available to offer workforce housing

Development Patterns

The development pattern should seek to:

- Provide a system of streets to improve connectivity between subdivisions and to the existing road network.
- Incorporate sidewalks, traffic calming measures, golf cart paths, and biking facilities. This provides safe, alternative travel within, and between,

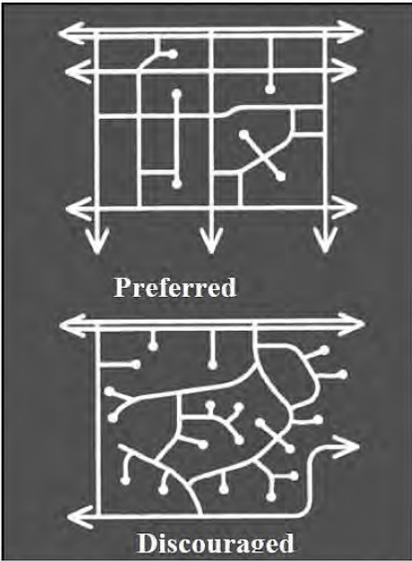

Figure 66: Example of preferred street design

neighborhoods and improves connectivity to schools, parks, and neighborhood commercial areas.

- Accommodate infill development that compliments the scale, building setbacks, and the style of existing residential areas.
- Preserve existing mature trees during the development process.
- Preserve open space and greenway opportunities.
- Encourage neighborhood commercial uses at strategic locations along collector roads.

Primary Land Uses

- Single-family residential uses
- Parks and passive recreation areas
- Civic and semi-public institutional uses
- Neighborhood commercial

Implementation Strategies

- Develop a water system master plan that includes improvements/ expansion to serve infill development areas.
- Develop a plan to assess the feasibility of additional sidewalks, trails and bike route facilities.
- Amend regulations to require all new developments to provide sidewalks.
- Provide incentives to encourage use of “Conservation Design” principles for new subdivision development.

Quality Community Objectives to be pursued

- Sense of place
- Transportation alternatives
- Traditional neighborhood development
- Infill development
- Housing choices
- Growth preparedness

Figure 67: Entrance of Laurel Lake community

Figure 68: Example of density and design within the Laurel Lake community. Note the lack of pedestrian

Figure 69: Cul-de-sac within Laurel Lake Community

NELSON TRADITIONAL NEIGHBORHOOD

Vision

Nelson’s traditional neighborhoods include a variety of housing choices in close proximity to the town center and other commercial corridors. Accessibility is improved with additions to the existing network of sidewalk and trails.

Narrative

Nelson’s traditional neighborhoods contain older housing stock and traditional development patterns. These areas consist of moderate to well-maintained single family housing. Density is low due to the lack of wastewater utilities. These neighborhoods are typically served with a grid system of streets and have shallower building setbacks. The neighborhoods are regarded as “in-town” due to their proximity and accessibility to the town center. Vacant tracts of land are still available. New development and redevelopment may include cluster detached single-family homes; townhouses; and senior housing.

Development Patterns

The development pattern should seek to:

- Maintain existing homes and character defining features such as drives, walls, landscaping, and tree cover.
- Promote building rehabilitation that is in consistent with a building’s existing architectural style and scale, and that of neighboring homes.
- Accommodate in-fill development complementing the scale, setbacks, and style of adjacent homes.
- Increase pedestrian connectivity between neighborhoods, the town center, parks, and other activity centers.
- Accommodate senior housing, which can be integrated into the existing development pattern, and can benefit from close proximity to the downtown area and other streets containing commercial uses.

Figure 70: Historic single family detached residence in Nelson

Figure 71: Historic single family detached residence.

Primary Land Uses

- Mixed residential uses with a variety of densities (cluster detached single-family homes, townhouses, and senior housing).
- Civic, institutional uses
- Neighborhood commercial on arterial and major collector routes, especially at significant intersections
- Parks, recreational areas

Implementation Strategies

- Repair existing sidewalks and install new sidewalks where needed.
- Improve and increase multi-use paths and trails (pedestrian, bike, and/or golf cart).
- Pursue federal and state grants and other programs to rehabilitate/ upgrade houses, where needed.
- Encourage senior housing opportunities in close proximity to daily shopping, health and recreation needs.
- Prepare and adopt senior housing design standards to encourage “aging-in-place” addressing functional home and site features directed toward senior needs.
- Review and/or revise Nelson’s regulations regarding new and infill residential development.

Figure 72: Example of good pedestrian infrastructure serving a traditional style residential neighborhood in Jasper

Quality Community Objectives to be pursued

- Heritage preservation
- Sense of place
- Traditional neighborhoods
- Infill development
- Housing choices

NELSON TOWN CENTER

Vision

The Nelson Town Center area retains its strong sense of place and unique characteristics, and remains a viable community center for both residents and visitors.

Narrative

Nelson's town center includes the Central Business District as well as surrounding areas on both sides of Kennesaw Avenue; it contains a blend of commercial businesses, professional offices, and a few historic residential and industrial properties. This area has a blend of development patterns including non-traditional building facades, and lack of sidewalks. The commercial buildings lack historic architecture. Encouraging a mix of uses, including commercial (restaurants, services, office, retail), and residential, will be important for long range economic vitality and sense of community.

Figure 73: Nelson City Hall along Kennesaw Avenue

Development Patterns

The development pattern should seek to:

- Retain and enhance existing building/housing stock with appropriate maintenance and rehabilitation.
- Promote a mix of uses to attract both residents and visitors.
- Develop the downtown as a focal point for community activities, public art displays, and festivals.
- Create a strong connection with adjoining neighborhoods via sidewalks and other pedestrian amenities.

Figure 74: Example of a commercial structure along Kennesaw Avenue near Nelson's City Hall

Primary Land Uses

- Mixed commercial including retail, professional offices and services.

- Civic/institutional
- Single-family detached residential
- Parks, public gathering places.

Implementation Strategies

- Install streetscape improvements to create a more pedestrian friendly environment.
- Improve gateway landscaping and signage entering downtown from all directions.
- Encourage entrepreneurial creativity with uses and facilities in the town center. Be flexible in working with businesses and others on new ideas for downtown, including new development and redevelopment and mixed-use.

Figure 75: Example of walkable town center residential development (downtown Jasper)

Quality Community Objectives to be pursued

- Heritage preservation
- Sense of place
- Housing choices

Talking Rock Character Areas

TALKING ROCK RURAL RESIDENTIAL

Vision

The Rural Residential area represents “traditional” rural residential development. While surrounding areas are growing rapidly, this area should retain its less-developed, rural, open space characteristics for future generations.

Narrative

The Rural Residential area includes an eastern area in Talking Rock which is adjacent to rural residential areas in Pickens County. It consists of predominantly rural, less-developed land suited for agricultural, forestry and large-lot residential uses. Development should respect the farming and forestry tradition, and maintain rural characteristics. This area lacks the advanced infrastructure (public water, roads, public services) needed to support more intense development. If residential subdivision occurs, environmental impacts (floodplain, steep slopes, stormwater, etc.) and infrastructure needs (private wells versus public water lines, septic system considerations, road conditions, etc.) should be carefully reviewed.

Figure 76: Rural Residential on Hwy 136

Development Pattern

The development pattern should seek to:

- Protect farmland, open space, and environmentally sensitive areas by maintaining low density development.
- Preserve the economic viability of agriculture, livestock production and forestry activities.
- Limit grading and clearing.
- Preserve natural hydrology and drainage ways.
- Carefully design roadway alterations and construction to minimize scenic and environmental impacts.
- Preserve rural character, viewsheds, and natural features/resources.
- Utilize natural features for stormwater management
- Accommodate low-intensity uses

Primary Land Uses

- Agricultural (AG, SA county land use districts)
- Forestry (AG county land use district)
- Low-density, single-family residential (ER, RR county land use districts)
- Recreational facilities
- Convenience goods and service establishments at strategic locations along major collector and arterial roads, especially state routes (NC, HB county land use districts)

Implementation Strategies

- Utilize Best Management Practices for land disturbance activities, including tree harvesting and utility construction.
- Utilize *Stormwater Better Site Design Standards* from the Georgia Stormwater Management Manual to conserve natural areas, reduce impervious surfaces and better integrate stormwater treatment in site planning and design.
- Promote the use of conservation easements and conservation tax credits to help preserve viable farmland.
- Utilize the Georgia Land Conservation Program as a source of grants, low-interest loans, and tax incentives to preserve agricultural land.
- Support and promote positive public events at community centers such as fire stations, area churches, and other facilities.
- Work cooperatively with businesses and landowners to develop and redevelop agri-business and agri-tourism uses.
- Maintain and/or upgrade water lines serving the area as needed.

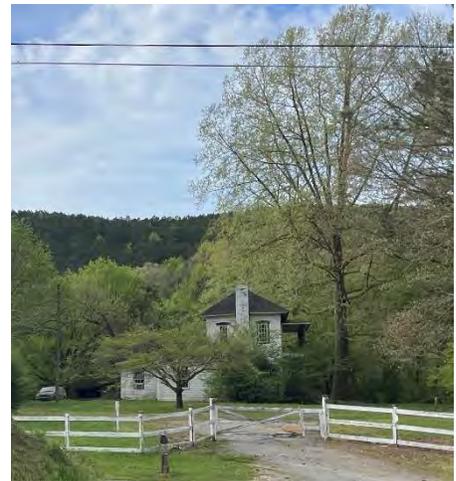

Figure 77: Rural Residential on Old Blairsville Hwy.

Quality Community Objectives to be pursued

- Sense of place
- Open space preservation
- Environmental protection
- Heritage preservation

TALKING ROCK SUBURBAN RESIDENTIAL

Vision

This area is envisioned to become an extension of the more recently developed Talking Rock community. Quality of life is enhanced by improved street connectivity, sidewalks, and trails (pedestrian, bike, golf cart, etc.) to provide alternative ways to get to parks, and neighborhood commercial areas.

Narrative

These areas around the Town of Talking Rock are sparsely developed with the potential to develop further. They typically consist of single family residences, at different price points, served by a system of county or state roads. Curvilinear streets and cul-de-sacs would be the preferred future design for new residential development in this area. This area contains a developed public water system, a good road network, and other community services that can be extended to potential infill areas; it is not served by wastewater utilities. Encouraging infill development would reduce jobs-to-housing travel distances and commute times. Residential development should offer a range of housing choices related to size, cost, and housing types, in order to increase the availability of affordable housing within the county. Traditional neighborhood development patterns are encouraged; compact development and mixed residential uses should be within walking distances of one another and community amenities such as schools, parks and neighborhood commercial centers.

Development Patterns

The development pattern should seek to:

- Provide a system of streets to improve connectivity between subdivisions and to the existing road network.

Figure 78: Suburban Residential, Talking Rock.

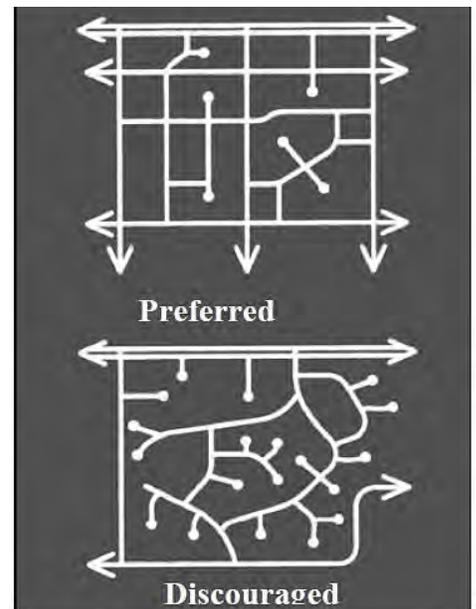

Figure 79: Example of preferred street design

- Incorporate sidewalks, multi-purpose paths, and traffic calming measures to provide safe, alternative means of travel within/ between neighborhoods, and improve connectivity to schools, parks, and neighborhood commercial areas.
- Accommodate infill development that is complementary to the scale, building setbacks, and the style of existing residential areas.
- Preserve existing mature trees during the development process.
- Preserve open space and greenway opportunities.
- Encourage neighborhood commercial uses at strategic locations along collector roads.

Figure 80: Example of a modern suburban community entrance

Primary Land Uses

- Single-family residential uses
- Parks and passive recreation areas
- Civic and semi-public institutional uses
- Neighborhood commercial

Implementation Strategies

- Develop a plan to improve/expand the water system to potential infill development areas.
- Develop a plan to assess placement of additional sidewalks, trails, and multiuse paths to connect residences to the town center.
- Consider amending development regulations to require all new developments to provide sidewalks.
- Consider providing incentives to encourage use of “Conservation Design” principles for new subdivision development.

Figure 81: Sidewalks can be extended from downtown to residential areas.

Figure 82: Example of density and design within the Suburban character area. Preferably with pedestrian infrastructure (sidewalks, etc).

Quality Community Objectives to be pursued

- Sense of place
- Transportation alternatives
- Traditional neighborhood development
- Infill development
- Housing choices
- Growth preparedness

Figure 83: Cul-de-sac design for the Suburban character area

TALKING ROCK TRADITIONAL NEIGHBORHOOD

Vision

Talking Rock's traditional neighborhoods provide a variety of housing choices in close proximity to the town center and other commercial highway corridors. Accessibility is improved with expansion of the existing network of sidewalks and multi-purpose trails..

Figure 84: Single family detached residence along Highway 136 in Talking Rock

Narrative

Talking Rock's traditional neighborhoods contain older housing stock and traditional development patterns. These areas consist of moderate to well-maintained single family housing. Density is low due to the lack of a wastewater utility. These neighborhoods are typically served with a grid system of streets and have shallower building setbacks. The neighborhoods are thought of as "in-town" due to their proximity and access to the historic town center. Vacant tracts of land are still available. New development and redevelopment may include detached single-family homes and townhouses.

Development Patterns

The development pattern should seek to:

- Maintain existing homes and historic character with defining features such as drives, walls, landscaping, and tree cover.
- Promote building rehabilitation that is in keeping with a building's existing architectural style and scale and that of the neighborhood, to retain the town's character.
- Accommodate in-fill development that complements the scale, setbacks and style of adjacent homes.
- Increase pedestrian connectivity between neighborhoods, the town center, parks, and other activity centers.

Figure 85: Traditional residential, Talking Rock

Primary Land Uses

- Mixed residential uses with a variety of densities (cluster detached single-family homes, and townhouses).
- Civic, institutional uses
- Neighborhood commercial on arterial and major collector routes, especially at significant intersections
- Parks, recreational areas

Implementation Strategies

- Repair existing sidewalks and install new sidewalks where needed.
- Improve and increase multi-purpose paths and trails.
- Pursue federal and state CHIP grants and other programs to rehabilitate/upgrade houses where needed.
- Consider adopting senior housing design standards to encourage “aging-in-place” that address home and site features that are more functional for senior citizens.
- Review and/or revise Talking Rock’s regulations regarding residential development and redevelopment.

Figure 86: Example of good pedestrian infrastructure serving a traditional style residential neighborhood in Jasper.

Quality Community Objectives to be pursued

- Heritage preservation
- Sense of place
- Traditional neighborhoods
- Infill development
- Housing choices

TALKING ROCK TOWN CENTER

Vision

The Talking Rock Town Center area retains its strong sense of place and its unique historic characteristics to remain a viable community center for both residents and visitors.

Narrative

Talking Rock's town center includes the Central Business District, as well as surrounding areas on both sides of Highway 136; it contains a blend of commercial businesses, professional offices, and a few historic residential properties. This area has a blend of development patterns including traditional building facades, and lack of sidewalks. The commercial buildings display historic architecture. Encouraging a mix of uses, including commercial (restaurants, services, office, retail) and residential will be important for long range economic vitality and sense of a community center.

Development Patterns

The development pattern should seek to:

- Retain and enhance existing building/housing stock with appropriate maintenance and rehabilitation.
- Promote a mix of uses to attract both residents and visitors.
- Develop the downtown as a focal point for community activities, public art displays, and festivals.
- Create a strong connection with adjoining neighborhoods via sidewalks and other pedestrian amenities.

Talking Rock Town Hall and Fire Station

This home is an example of several historical structures in Talking Rock.

Figure 87: Bluegrass band performing during the Town's annual Heritage Days Festival

Primary Land Uses

- Mixed commercial including retail, professional offices and services.
- Civic/institutional
- Single Family detached Residential
- Parks, public gathering places.

Implementation Strategies

- Fund streetscape improvements to create a more pedestrian friendly environment.
- Improve gateway landscaping and signage entering downtown from all directions.
- Encourage entrepreneurial creativity with uses and facilities in the town center. Be flexible in working cooperatively with businesses and others on new ideas for downtown, including new development and redevelopment.

Quality Community Objectives to be pursued

- Heritage preservation
- Sense of place
- Housing choices

Figure 88. Talking Rock historic caboose.

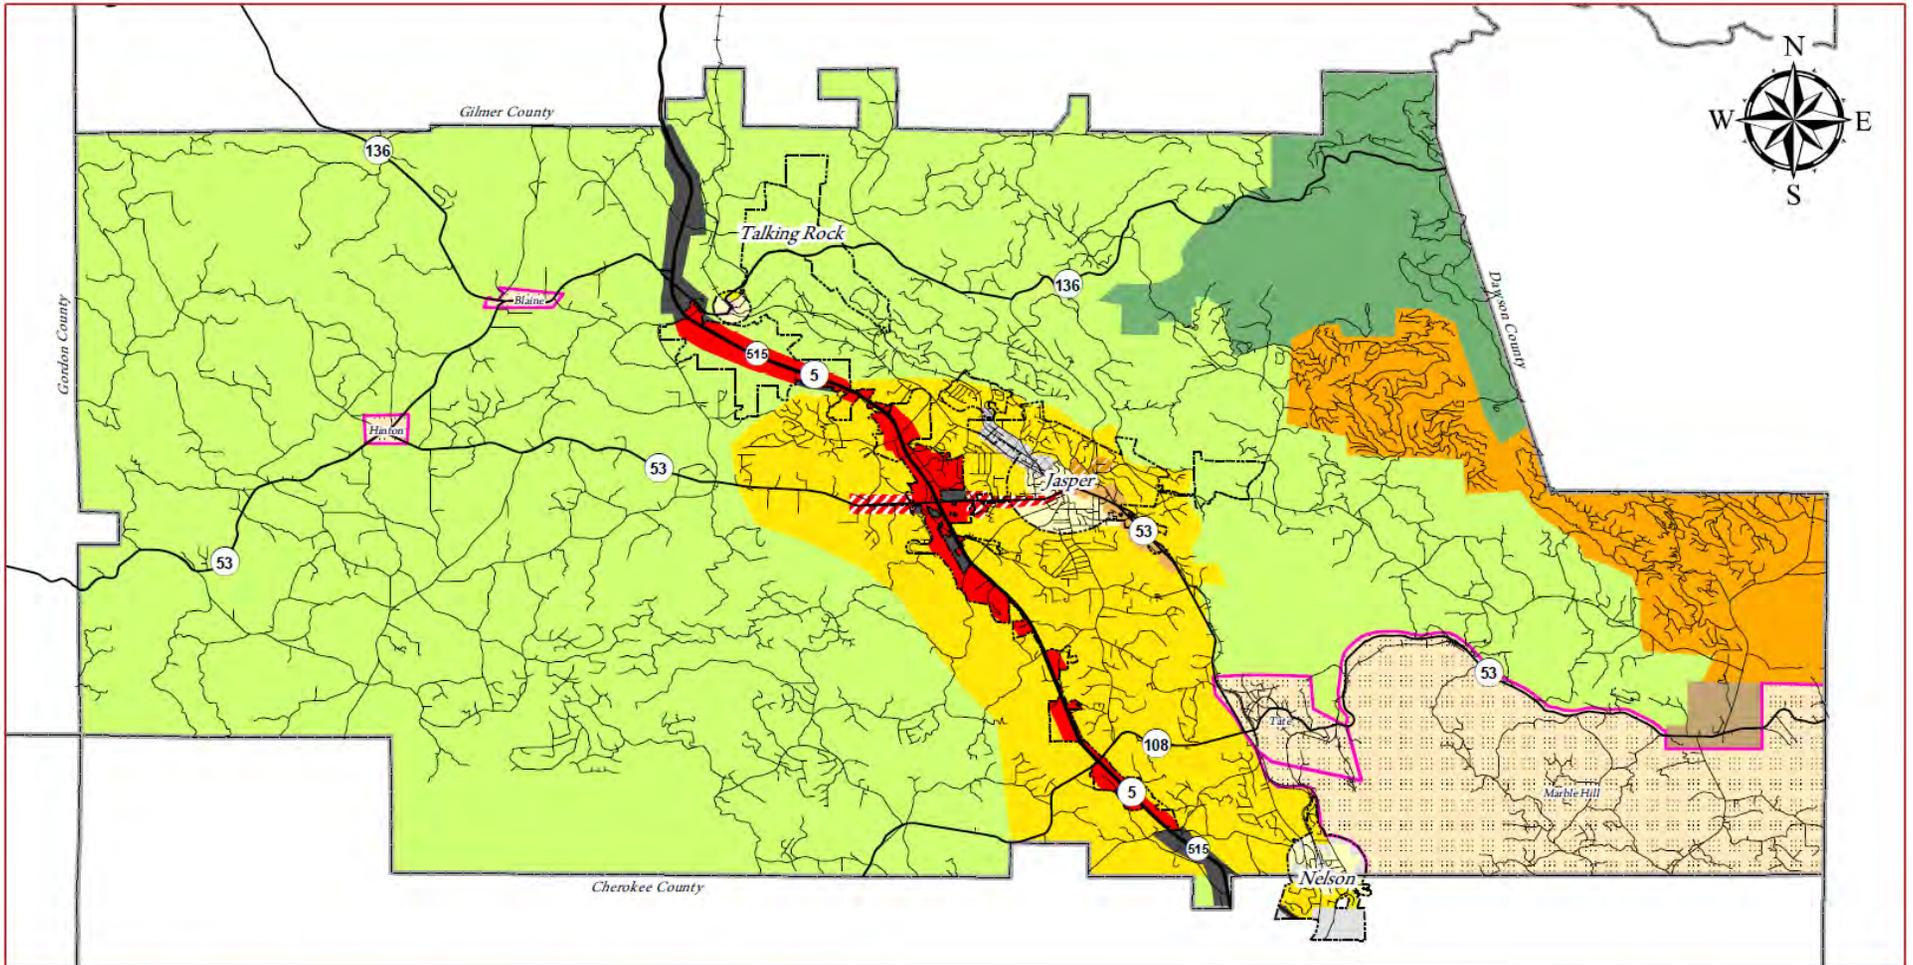

Figure 89. Talking Rock Park.

Future Development Maps

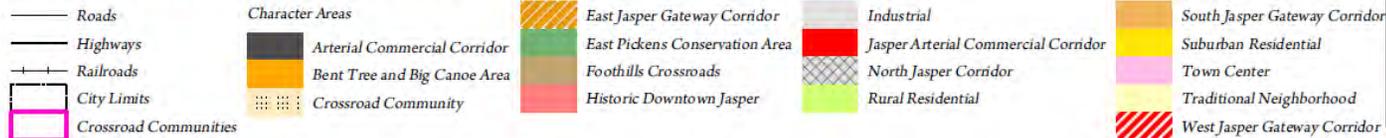

Included within the Land Use Element are Future Development Maps describing current and expected future development patterns within Pickens County and each municipality. The Future Development Map uses character areas to describe each community's development pattern as envisioned in the future. These character areas combine development pattern form and land use function to identify the unique features of an area. As described in the Georgia Department of Community Affairs' *Discovering and Planning Your Community Character Guidebook*, each area is identifiable based on development intensity and patterns, street design and layout, location, the extent of civic buildings and public spaces, and the location of natural features. Character areas describe the unique traits of the area, while the future development map is the visual representation of all areas for a community. This visual representation allows decision-makers to be consistent in advancing commercial, industrial, and residential growth while promoting recreational opportunities and preserving rural and agricultural lands.

The Future Development Map can be consulted to advise officials on appropriate zoning decisions that are consistent with the character of the area. The Future Development Map and accompanying character area descriptions are less specific than zoning district descriptions. Though zoning designation is identified by the district, zoning is still prescribed on a parcel-by-parcel basis. Character areas are more general, describing the overall development type and theme of an area.

Implementation Programs

Reports of Accomplishments

The Reports of Accomplishment show the results of past planning efforts. The status of each work program item can be found here. Since work programs are updated every five years, the items under consideration here are from the 2018-2023 Joint Comprehensive Plan work programs. Pickens County, the City of Jasper, the City of Nelson, and the Town of Talking Rock reviewed their previous work program and noted each work program item as completed, underway, postponed, or dropped.

Completed and dropped items were excluded from being carried over to the current work program. Projects that were underway or postponed were carried over to the current work program of the 2023-2028 Joint Comprehensive Plan. Those projects that were underway were given an estimated date of completion. Since this is a planning document and not a binding legal agreement, there is no penalty for postponing or dropping a project, but an explanation is required. Some items listed in the previous work program were identified as policy statements, if they had begun several years ago and were now a routine function of government. These items were either checked complete or were rewritten and carried over. Those rewritten items are identified in the explanation column for dropped or postponed projects in **green font**.

Joint Needs and Opportunities

Stakeholder input is an important component of the comprehensive planning process. Each government appointed a diverse group of citizens and local officials to advise the direction to be taken in the planning process. The first Stakeholder meeting for the Pickens, Jasper, Nelson, and Talking Rock Joint Comprehensive Plan was held on October 18, 2022, at the Pickens County Administrative Building. During this meeting, Stakeholders from each location discussed local needs and completed a Strength, Weakness, Opportunities, and Threats (SWOT) analysis. SWOT analysis is a brainstorming activity used to understand current conditions while also determining the future direction a community may wish to go. The SWOT analysis was conducted with Stakeholders writing on large poster-size paper strengths, weaknesses, opportunities, and threats for the following categories: Economic development, housing, transportation, natural/cultural resources, community facilities and services, and land use. The collective comments were then used to create a public survey. Needs and Opportunities were developed from the SWOT analysis and from the results of the survey. The public survey specified locals' perceptions of their community. The public participation received through the survey, stakeholder input, and local government direction, informed joint Needs and Opportunities which are coded to connect each Need or Opportunity with a specific project in the community work programs. The joint

Should city and county combine water/sewage systems?

Clayton Preble, standing, and Roger Schultz, seated to his right, lead a discussion on merging some operations of the county and city at a planning meeting last week.

Some say joint services would improve efficiency. Others say if it's not broke, don't try to fix it.

By Dan Paul
Editor
dnp@pickensprogress.com

Should the city of Jasper and Pickens County combine resources to form a joint water/sewage authority?

That question was the key discussion point of the Comprehensive Planning Session, December 12th at the County Admin building. The comprehensive plan update is required in all Georgia counties on a regular basis. Pickens is expected to begin drafting a revision to the current plan early next year to submit to the state by summer of 2018.

For the discussion among the 30 or so citizens and employees

of city governments and Pickens County the idea of a joint water/sewage authority provoked an array of differing opinions.

Clayton Preble, who is on the county planning commission but was speaking as part of a citizen study group, presented some basics on authorities and sought to get a consensus that the idea of a joint operation merits further consideration. He got that, but clearly not universal approval among those at the meeting.

Preble worked with Roger Schultz and Don House to gather and present some basic information on authorities. He stated that none of their group has any interest in an

San Diego ca 128

Needs and Opportunities listed below apply to Pickens County, Jasper, Nelson, and Talking Rock. Each community has specific Needs and Opportunities linked with their individual community work program.

Joint Needs and Opportunities

Economic Development

- Identify and address needs for industrial development and redevelopment, including
- Retain existing businesses and industries in both traditional and trending business sectors
- Recruit and locate businesses and industries based on assets such as the Airport, logistics, and available skilled workforce
- Create more jobs and economic opportunities in our community
- Expand/create more industry
- Increase commercial activity (retail, dining, etc.)
- Improve gateway signage to increase tourism
- Implement streetscaping, lighting, signage, and design projects to improve downtown visual appeal and ease of navigation
- Improve public access to information and the history of local communities, so to generate tourism and community pride.
- Create an environment that attracts tourism commercial retail developers/investors to the historic town center
- Improve the lack of adequate, available high-speed internet access in locations where either underserved or unserved by Broadband internet.
- Improve access to those traveling by flight into the Pickens County area

Housing

- Inventory number of houses and conditions to estimate future need
- Improve the range of affordable housing options for the county or respective city.
- Increase housing diversity appropriate for the county or respective city.
- Incentivize multi-family and single-family housing at appropriate densities for a variety of income and age groups
- Improve housing conditions for the county or respective city.
- Preserve, and rehabilitate where needed, existing housing stock

Community Facilities and Services

- Improve or repair recreation facilities and parks, and add new parks, open space, and green space
- Plan and provide for the extension of existing waterlines and water facilities to help provide public water services to citizens and business owners that currently rely solely on costly onsite wells.
- Develop additional local water reserves to increase current capacity.
- Plan for and provide emergency shelters for a variety of natural disasters; update and implement Hazard Mitigation Plan
- Plan for funding public service facilities, training, and operations, including fire facilities to improve coverage (high ISO rating in areas)
- Preserve safe living conditions by fully funding facilities and equipment needed by public services (fire, police, emergency providers)
- Increase water storage treatment capacity and infrastructure to serve areas where growth is desired and to meet future demands
- Increase wastewater treatment capacity and infrastructure to meet current and future demands for businesses and residents.
- Plan and provide for the extension of existing waterlines and water facilities to help provide public water services to citizens and business owners that currently rely solely on costly onsite wells.
- Build more trails that are accessible to all users
- Ensure streets, sidewalks, trails, and facilities are ADA compliant
- Improve both wayfinding and gateway signage visibility and availability, and improve accessibility to local resources for tourism.
- Stormwater improvements are needed to prevent damage to streets and housing
- Plan and provide for streetscape projects; improving the feel, look, and function of the downtown area
- Improve or repair public sites and parks, including landscaping, facilities, parking and access.
- Add new parks with open space and green space

Transportation

- Provide needed road improvements to increase visibility and safety, improve traffic flows and mitigate traffic congestion
- Implement streetscape improvements, including sidewalks, pedestrian crossings, median islands, striping, signage, lighting, and landscaping
- Mitigate the impact of traffic congestion

- Improve walkability and connections from the City Center to other areas of the City; use the Complete Streets approach to add bicycle and pedestrian facilities where possible

Natural and Cultural Resources

- Protect and preserve greenspace in Pickens County as it is an irreplaceable asset
- Promote private parks including Eagle's Rest, and STPAL Bike Park for citizens and tourists.
- Seek out best management practices for both water and environmental issues
- Make local history more visible and accessible for guests and residents
- Restore the riparian buffer and stabilize the creek bank, while also improving the aesthetics to local resources, such as parks

Land Use

- Review land development, land use ordinances, and code enforcement in order to ensure all codes/ordinances are not in conflict with that other codes/ordinances
- Update and administer local land use and development regulations to improve how the downtown area looks, feels, and functions.
- Ensure land use ordinances and maps are in compliance with current State law
- Improve public access to the City's zoning ordinances, maps, and procedures

Community Work Program

A Community Work Program is a list of specific projects a community plans to undertake over the next 5 years after the adoption of the plan. These listed items are associated with a specific need or opportunity identified from the community survey. The stakeholders, elected officials, and staff review the Needs and Opportunities, and the Community Work Programs. Local government officials have the final say in approving the content.

The work program itself is non-binding; there are no legal requirements that any project listed must be completed. Projects fall within the following categories: Economic development, housing, transportation, natural and cultural resources, community facilities and services, land use, and intergovernmental coordination. Those items that are underway or postponed from the previous work program (2018-2028 Joint Comprehensive Plan), as identified in the report of accomplishments, are carried over to the current work program. All projects are given an estimated timeline for completion, a cost estimate, and a potential funding source. The following is a list of potential funding sources referenced in the work programs.

Funding Source Agency	Funding Sources by Agency
Appalachian Regional Commission (ARC)	Multiple funding sources
Georgia Department of Community Affairs (DCA)	Community Development Block Grant (CDBG), Georgia Main Street Program
Georgia Environmental Finance Authority (GEFA)	Georgia Fund, Clean Water State Revolving Funds (CWSRF), Georgia Reservoir Fund
Georgia Department of Natural Resources (DNR)	Land and Water Conservation Fund (LWCF), Recreational Trail Program (RTP), Georgia Outdoor Stewardship Program (GOSP)
Georgia Department of Transportation (GDOT)	Transportation Alternatives Program (TAP)
Georgia Environmental Protection division (GAEPD)	319 Grant
Georgia Historic Preservation District	National Registry of Historic Places, Historic Preservation Fund
United States Department of Agriculture (USDA)	USDA Rural Development Water and Waste Disposal Loan and Grant Program
Local Government Funding	General Funds, Special Local Option Sales Tax (SPLOST)
Georgia Environmental Protection division (GAEPD)	319 Grant
Other	Grants and Loans, General funds

Pickens County Implementation Program

REPORT OF ACCOMPLISHMENTS, 2018-2022

Pickens County

WORK PROGRAM ACTIVITY	YEAR	STATUS				Explanation if postponed or dropped
		Complete	Underway; Projected Completion Date	Postponed	Dropped	

ECONOMIC DEVELOPMENT

Work cooperatively with business representatives for new industrial development and redevelopment in the Marble Hill and southeast Pickens area, including annual efforts to report on the Opportunity Zone in the area. Review and, where appropriate, revise allowed industrial uses in chapter 67 of the Pickens County Code of Ordinances.	2018-2022	X				Policy Statement; Ongoing, reoccurring administrative activity of Pickens County Government

		Complete	Underway; Projected Completion Date	Postponed	Dropped	
provision in worst-case scenarios. Continue day to day communication with various organizations. Coordinate positive efforts between the Chamber, county, and cities to promote economic development efforts for new developments, redevelopment, and existing business retention throughout the community.						

Pickens County Needs and Opportunities

Economic Development

ED-1	Expand/create more industry
ED-2	Improve the lack of adequate, available high-speed internet access in locations where either underserved or unserved by Broadband internet.

Housing

H1	Improve the range of affordable housing options.
H-2	Increase housing diversity appropriate for Pickens County.

Transportation

T-1	Provide needed road improvements to increase visibility and safety, improve traffic flows and mitigate traffic congestion
T-2	Implement streetscape improvements, including sidewalks, pedestrian crossings, median islands, striping, signage, lighting, and landscaping
T3	Improve access to those traveling by flight into the Pickens County area

Natural and Cultural Resources

NR-1	Make local history more visible and accessible for guests and residents
NR-2	Promote public and private parks including Eagle’s Rest, and STPAL Bike Park for citizens and tourists.
NR-3	Seek out best management practices for both water and environmental issues

Community Facilities and Services

CF-1	Improve or repair recreation facilities and parks, and add new parks, open space, and green space
CF-2	Plan for and provide emergency shelters for a variety of natural disasters; update and implement Hazard Mitigation Plan
CF-3	Plan for funding public service facilities, training, and operations, including fire facilities to improve coverage (high ISO rating in areas)
CF-4	Preserve safe living conditions by fully funding facilities and equipment needed by public services (fire, police, emergency providers)
CF-5	Develop additional local water reserves to increase current capacity.
CF-6	Increase water storage treatment capacity and infrastructure to serve areas where growth is desired and to meet future demands
CF-7	Improve both wayfinding and gateway signage visibility and availability, and improve accessibility to local resources for tourism.

Nelson Needs and Opportunities

Economic Development

ED-1	Identify and address needs for industrial development and redevelopment
ED-2	Retain existing businesses and industries in both traditional and trending business sectors
ED-3	Improve the lack of adequate, available high-speed internet access in locations where either underserved or unserved by Broadband internet.

Housing

H-1	Inventory number of houses and conditions to estimate future need
H-2	Improve housing conditions in Nelson
H-3	Preserve, and rehabilitate where needed, existing housing stock

Transportation

T-1	Implement streetscape improvements, including sidewalks, pedestrian crossings, median islands, striping, signage, lighting, and landscaping
T-2	Improve walkability and connections from the City Center to other areas of the City; use the Complete Streets approach to add bicycle and pedestrian facilities where possible

Community Facilities and Services

CF-1	Improve both wayfinding and gateway signage visibility and availability, and improve accessibility to local resources for tourism.
CF-2	Stormwater improvements are needed to prevent damage to streets and housing

Natural and Cultural Resources

NR-1	Make local history more visible and accessible for guests and residents
------	---

Land Use

LU-1	Review land development, land use ordinances, and code enforcement in order to ensure all codes/ordinances are not in conflict with other codes/ordinances
LU-2	Ensure land use ordinances and maps are in compliance with current State law; partner with neighboring governments for enforcement of codes and ordinances
LU-3	Improve public access to the City's zoning ordinances, maps, and procedures

4-Her Spotlight

Micah Newton Chosen as Georgia 4-H Ambassador

A straight shooter, Micah Newton will be a member of the 2023 4-H team for a year in addition to his involvement with the local 4-H program where he has excelled in the engineering project.

Submitted by Pickens County 4-H

Pickens County 4-H's Micah Newton, son of Matthew and Krista Newton, has been chosen as one of 15 Georgia 4-H Ambassadors. From across the state to be a Georgia 4-H STEM Ambassador, Micah's interests in Technology, Engineering, and Math are evident. Ambassadors are great representatives to learn and lead within their chosen discipline. Ambassadors in their hometowns support various youth activities and will spend the 2022-2023 academic year planning activities to share their knowledge with peers, invited children, and adults.

They will make a difference in their communities and represent Georgia 4-H Ambassadors to the 4-H Ambassadors are asked to create an annual action plan during their year of service.

Micah will showcase through an application process that started his interest in the area of STEM. Micah has demonstrated his dedication to STEM through his 4-H projects such as his studies in engineering and mechanics where he learned about the complex workings of a robot.

He interviewed applicants from Lakeland and Universal Area 4-H positions, including Micah's mother. The Georgia 4-H Engineering Challenge at Rock Eagle and taught STEM lessons at Cherokee County, near at Camp Wehberger. He expanded his knowledge in this field. Micah earned and completed several challenges of the U.S. Space and Rocket Center in Huntsville, Ala. home.

He was first made a member of the local 4-H program where he taught 4-H STEM lessons. His experience with in the area of engineering and robotics led him to first place at a District 4-H Robotics Competition earlier this year. It was due to his success that he has received a Pickens County Junior 4-H Achievement Scholarship.

Member of his project area, Micah enjoys participating in many local 4-H activities. In the past year he went to summer camp at Rock Eagle, completed 4-H at Home for the Holidays in Gilkes, and completed in the Northwest District Competition contributing to a successful year. Micah and his family plan to take their place in his community and demonstrate his commitment to STEM.

He has been a leader in our local program and last year was elected as Co-President of the local club. Micah enjoys his

many opportunities that the Pickens County 4-H program offers for volunteering and community service as well. A member of the 4-H club, Micah has proven to be a leader among his peers as well. With his understanding of both community and science

Micah Newton leads a small group in the local 4-H program where he taught STEM lessons.

as a Georgia 4-H Ambassador working to "make the best better", he is excited and ready to take on the 4-H challenge. If you would like to learn more about the Pickens County 4-H program, you can find our Facebook page at 4-Her Pickens County. It will have a young person discuss his or her 4-H experience. You can also contact the office to please at 866-253-8846. He is looking forward to starting his journey with the Pickens 4-H Club next year in August.

Public Meeting Notice

The Pickens County Economic Development and Community Development Commission of Commerce, Pickens County Chamber of Commerce, Pickens County Development Authority, and Pickens County Government Authority will hold a series of public meetings to receive comments and questions pertaining to the designation of the Pickens County Economic Development Authority and the 4-H term area for the American 4-H Club. Meetings will be held as follows:

- Route Description**
- At 5:00 pm on May 27 at US 98 development authority at 5:00 pm at 1200 West Main Street, Pickens, SC.
 - At 5:00 pm on May 28 at US 98 development authority at 5:00 pm at 1200 West Main Street, Pickens, SC.
 - At 5:00 pm on May 29 at US 98 development authority at 5:00 pm at 1200 West Main Street, Pickens, SC.
 - At 5:00 pm on May 30 at US 98 development authority at 5:00 pm at 1200 West Main Street, Pickens, SC.
 - At 5:00 pm on May 31 at US 98 development authority at 5:00 pm at 1200 West Main Street, Pickens, SC.

Public Meetings will be held on:

- Wednesday, July 20, 2022
5:00 pm - 7:00 pm - Pickens County Chamber of Commerce, 1200 West Main Street, Pickens, SC

5:00 pm - 7:00 pm - Pickens County Chamber of Commerce, 1200 West Main Street, Pickens, SC
- Sunday, July 24, 2022
5:00 pm - 7:00 pm - Pickens County Chamber of Commerce, 1200 West Main Street, Pickens, SC

PUBLIC HEARING NOTICE PICKENS COUNTY AND THE CITIES OF JASPER, NELSON, TALKING ROCK

UPDATE OF JOINT COMPREHENSIVE PLAN

Pickens County and the Cities of Jasper, Nelson, and Talking Rock are beginning a five-year update of their Joint Comprehensive Plan that was previously adopted in June of 2018. The plan update will be prepared according to the 2018 Minimum Planning Standards set by the Georgia Department of Community Affairs and the Georgia Planning Act of 1989. This initial public hearing is being held to explain the process for the plan preparation and the opportunities for public participation in the development of the updated plan. The affected governments intend to appoint citizens to participate as part of a Stakeholder Committee to work with planners for the plan preparation. In addition, broad citizen participation at every meeting related to the plan preparation is desirable and recommended.

The plan document, estimated for completion in draft for April 2023, will ultimately be submitted for review to the Northwest Georgia Regional Commission and the Georgia Department of Community Affairs. Plan approval by June 30, 2023 is required to maintain Qualified Local Government (QLG) status of each local government, per the Georgia Planning Act of 1989, allowing continued eligibility for State loans, grants, or permits for another five years.

The Public Hearing will be held on July 21, 2022 at 5:00 pm in Suite 168 at the Pickens County Government Building, 1266 East Church Street, Jasper, Ga 30143.

Tater Patch Players welcome two new faces to stage

Submitted by Tater Patch Players Theater

Tater Patch Players Theater is proud to welcome two new faces to our stage in our upcoming production, Notre-Dame. Micah Newton and his family have been invited to read from the book, Notre-Dame. He will be reading the book to the children in the audience.

After a 20-year career in education, he and his family moved to the area of Jasper, Ga. to enjoy the beauty of a new home. Micah has been a member of the Tater Patch Players Theater since he was 10 years old. He has been a member of the Tater Patch Players Theater since he was 10 years old. He has been a member of the Tater Patch Players Theater since he was 10 years old.

After seeing their home in the Middle Tennessee area, he and his family moved to the area of Jasper, Ga. to enjoy the beauty of a new home. Micah has been a member of the Tater Patch Players Theater since he was 10 years old. He has been a member of the Tater Patch Players Theater since he was 10 years old.

They loved the community, the city of Jasper, the beautiful scenery and many other amenities. Although they are now in the Tater Patch Players Theater, he is not sure to continue to read. They have been a member of the Tater Patch Players Theater since he was 10 years old. He has been a member of the Tater Patch Players Theater since he was 10 years old.

They are excited to see the Tater Patch Players Theater on stage. They have been a member of the Tater Patch Players Theater since he was 10 years old. He has been a member of the Tater Patch Players Theater since he was 10 years old.

They are excited to see the Tater Patch Players Theater on stage. They have been a member of the Tater Patch Players Theater since he was 10 years old. He has been a member of the Tater Patch Players Theater since he was 10 years old.

Shelter

the building until this is sorted out.

"When asked what they plan to do on March 15th, he said, 'Move out [of the downtown location]. Law says we have to move out, it's a court order.'"

Lovell said they do not have another place lined up for shelter residents. "We will try to find places for the ones that we can. We know we can't find places for all of them. The rest will be back in the street and Wednesday night is a freezing night."

Stancil said the county is not telling them they can't locate in the county, but they will hold them to the same standards they would any other applicant.

Stancil said he had initially been cooperative with the shelter leaders, but the shelter work order, not order

A document prepared by Pickens County government traces the route through permitting and approval the fire in Jesus shelter will need to follow. As of Tuesday, they had neither approved plans nor an approved septic system.

was not in a suitable location. He said they had first proposed a large building without nearby neighbors that Stancil thought might have been a good fit.

But Stancil said they are "well street" of what is needed for a certificate of occupancy with the Martin Road building and face a combination of septic, construction and land use codes preventing any quick fix or occupancy in the near future.

They need approved plans for both septic and the work inside before the stop work order will be lifted and they can resume construction. Only after final inspections can anyone move in.

"We don't let anyone move in while they are working on their house," Stancil said.

Stancil said despite what shelter leaders have claimed as a lack of cooperation from the county, the fire marshal and other county personnel have attempted to convey the specific issues "in e-mails, by phone and in person."

"We have made it [the code requirements] as plain as we can," he said. "We are not trying to pick on them."

He added that shelter sup-

Cross

downtown Ball Ground near the ballfields and back.

"He's not here, rain, shine, whatever," said neighbor Gene Hyde, who let me see where Bennett on the porch of his home that's along the route. "Every day he drives home from work and walks it's amazing."

Bennett was in jail for probation violations when God told him to build the cross. He said he was instructed to build it to specific dimensions, 8 ft. tall by 3 1/2 ft. wide, to carry it for a specific period of time, 40 days, and to walk through the middle of his hometown for four miles. The cross is made from 4x6s and weighs around 85 pounds.

The fire day was difficult, Bennett recalled. It took over three hours to walk the route, and the sharp edges of the wood dug into his shoulders. He added pads to soften the load, and his walk now takes around an hour-and-a-half.

"I'm doing this for my love of Christ and his love for me and for everybody," he said. "I want people to know how much He sacrificed for us. I'm doing this for Him because He wants me to."

Bennett, 39, has been in and out of jail for addiction, drugs, and has other personal incidents in his past. He was hospitalized for months after a serious car accident. His best friend died in a different car accident. He lost his entire support system in a short period of time. During one of his stints in jail, at his bottom, he cried out to God to take his life if this was all he was going to be for him.

That's when he was saved and "fell to my knees and wept like a baby."

"He's pulled me through

PUBLIC HEARING NOTICE
PICKENS COUNTY AND THE CITIES OF JASPER, NELSON, TALKING ROCK
UPDATE OF JOINT COMPREHENSIVE PLAN

Pickens County and the cities of Jasper, Nelson, and the town of Talking Rock have prepared a draft five-year update of their Joint Comprehensive Plan for 2023-2028 according to the 2018 Minimum Planning Standards set by the Georgia Department of Community Affairs, and by the Georgia Planning Act of 1989.

Accordingly, a joint public hearing is scheduled for the county and cities to accept comments on the draft Joint Comprehensive Plan Update for Pickens County and the cities of Jasper, Nelson, and the town of Talking Rock. The draft plan was prepared by Pickens County and the cities of Jasper, Nelson, and the town of Talking Rock with guidance from a Stakeholder Committee of public and private sector individuals. After the public hearing and receipt of public comment, the draft plan will be submitted for review by the Northwest Georgia Regional Commission and the Georgia Department of Community Affairs. Plan approval by June 30, 2023, is required to maintain Qualified Local Government (QLG) status for each local government per the Georgia Planning Act of 1989, allowing continued eligibility for State loans, grants, or permits for another five years.

The public hearing will be held on April 20, 2023 in the County Commissioner's Conference Room at 5:00 pm at the Pickens County Government Building, 1266 East Church Street, Suite 168, Jasper, Ga 30143.

Gateway to the mountains

Okay to excellent

Survey finds most people satisfied with Pickens and its cities

Loss of natural beauty, multi-family housing rank low

By Dan Pool
Editor
dpool@pickensprogress.com

On February 20, as part of the Joint Comprehensive Plan update required for all cities and counties, the results of a survey taking opinions on various growth and quality of life issues were presented in a public meeting.

While the meeting was open to the public in the county Admin Building, almost all attendees were connected to a local government.

A completed Joint Comprehensive Plan is required every 10 years by the Department of Community Affairs, every five years an update is required.

In all 1,174 completed surveys were tallied with another 137 submitted where someone quit before completion, according to Alex Smith, community planner with the Northwest Georgia Regional Commission and this is "about par" with other areas where he has worked.

Of the survey responses, 1,017 (73 percent) indicated they lived in Pickens County with 198 (14 percent) claiming the city of Jasper as home; 16 (1.2 percent) Nelson; 75 (5.4 percent) Talking Rock and 83 (6 percent) said elsewhere.

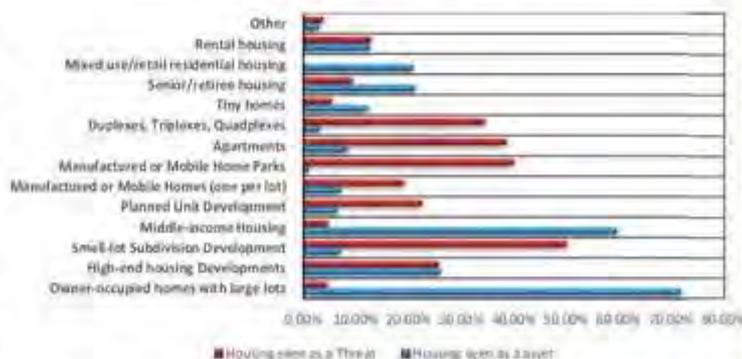

There was some discussion, led by Talking Rock

See **Survey** on 8A

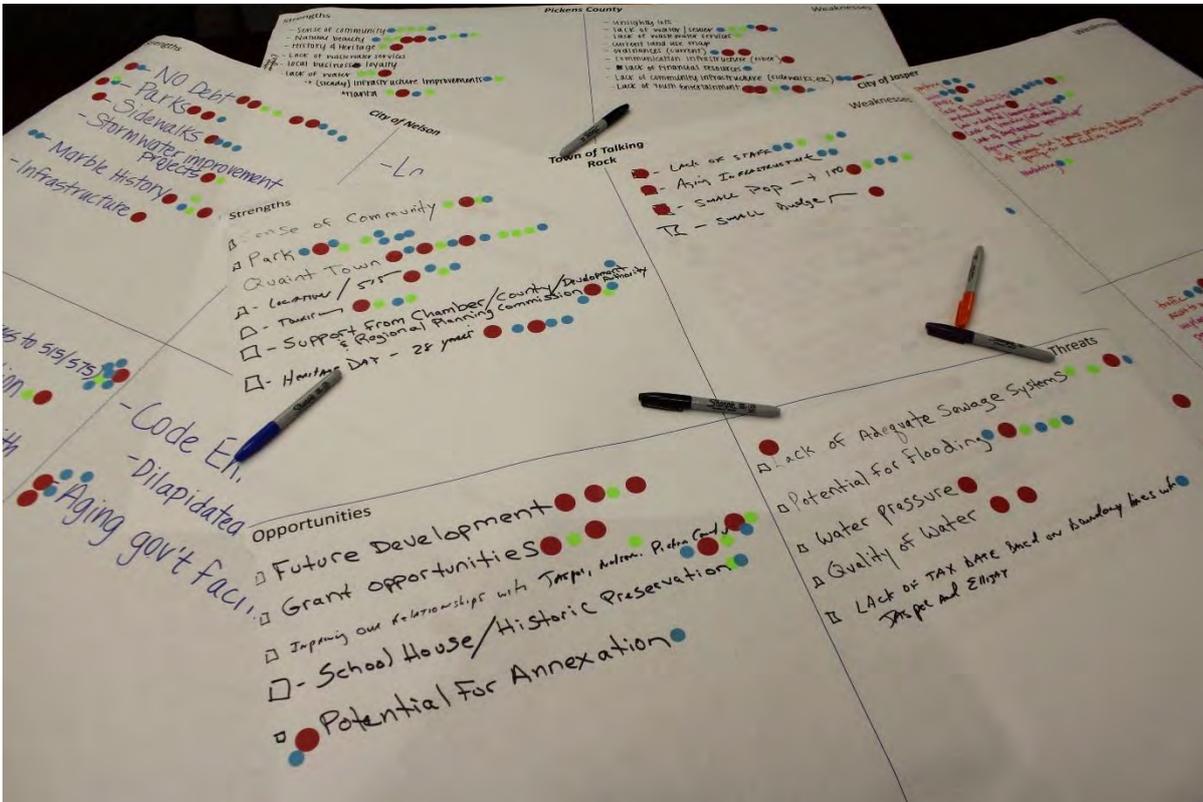

Survey results compiled by the Northwest Georgia Regional Commission found most people have a positive view of the county and its cities.

Housing preference by percentage for Pickens County, City of Jasper, City of Nelson, and Talking Rock Combined

The survey of more than 1,174 responses found that anything besides single family housing is viewed as a threat here.

Yes, but the speed is slow	34.0%	443
No internet available	2.2%	29
	Totals	1,304

13. What are the strengths of where you live (Unincorporated Pickens County, Jasper, Nelson, Talking Rock)? (Select ONLY 3)

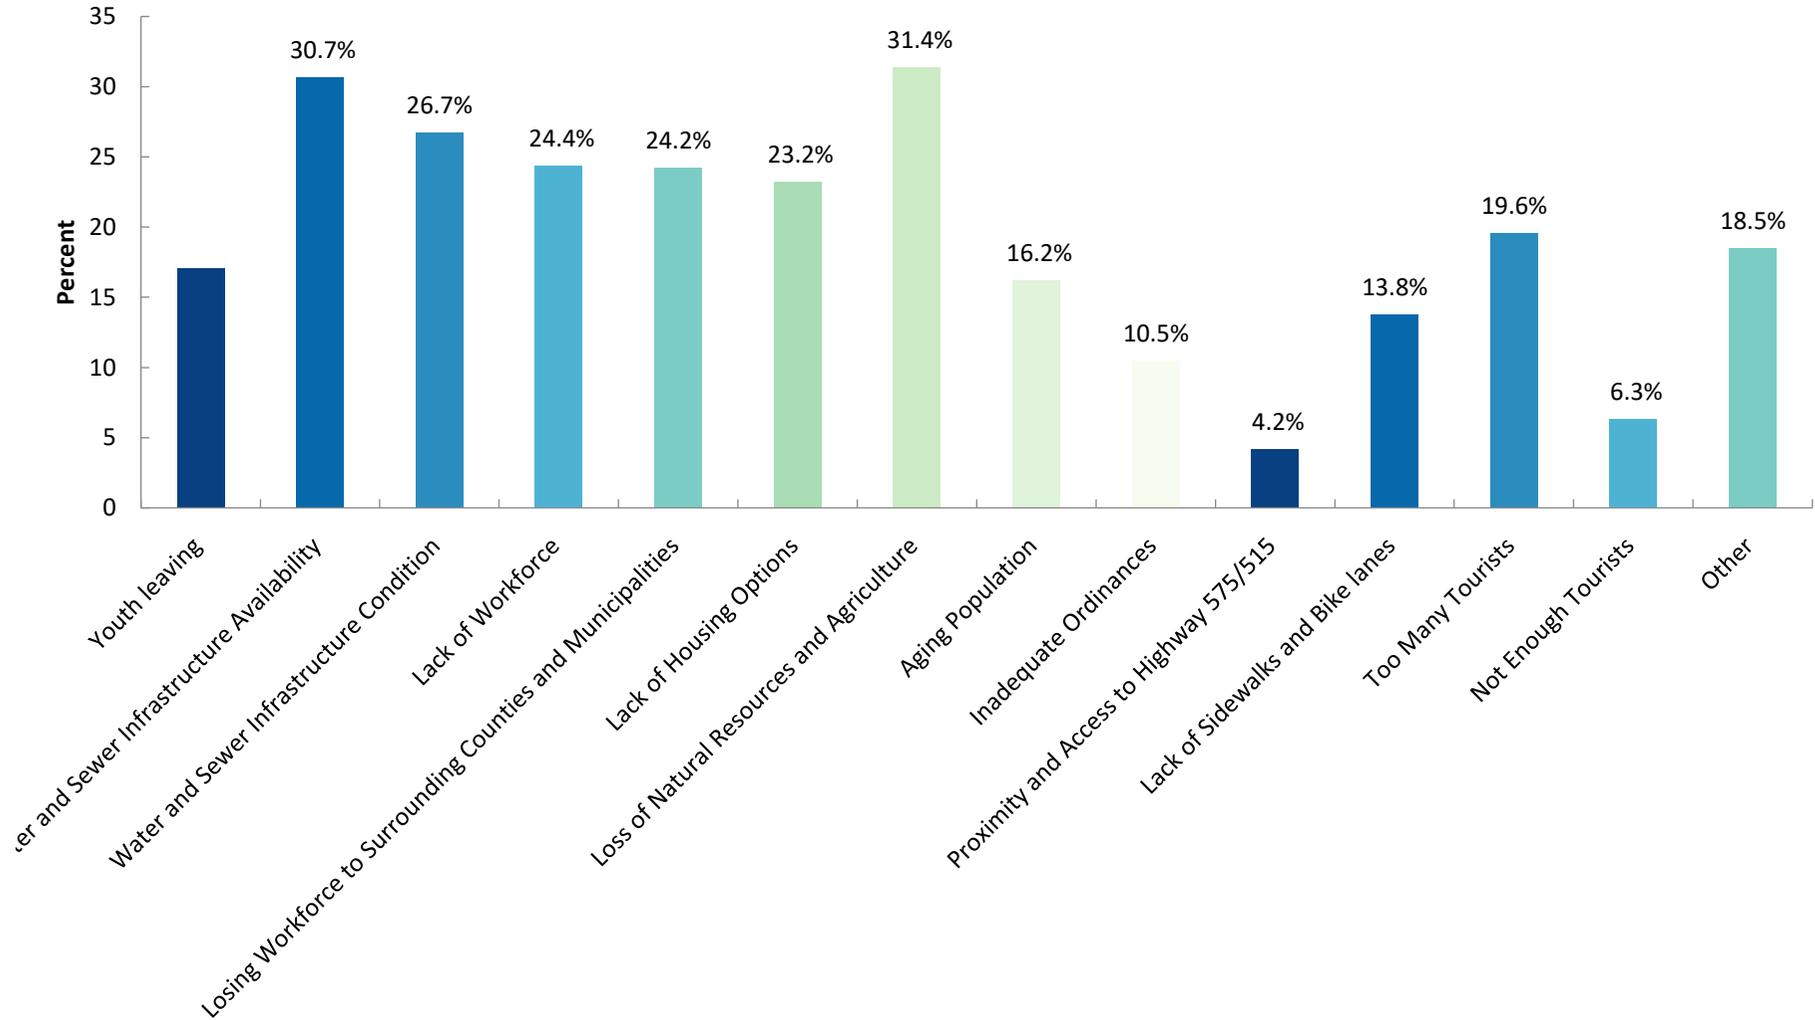

14.If other is selected for strength, please explain or hit next.

Response
the mountains
nothing
The strength of the meth and such addicts and their driving recklessly without insurance or vehicles that would pass any inspection along with their free reign, unobstructed by law enforcement.
Abundance of wildlife
I feel like there is none. Pickens County has lost its sense of home.
No strengths live in the east end with nothing beneficial
You misspelled strength, and this county has none!
Strong community service organizations
Locally owned businesses
Strength is spelled wrong
Away from major population
Proximity to Atlanta
It's not to crowded, for now!
Space, not crowded
Quiet, serene locations

Lots of woodlands and wilderness
road safety
Less population, farming, livestock
Small neighborhood with friendly people
Vacation
I don't want no more subdivision built
Possibility of growth
Quality of life
Low population density
Peaceful country living.
I didn't agree with any of the other statements
Only been here for four months.
Sense of security
Pickens has zero strengths
Family area
Close to attractions
I could only pick 3 but many factors we take for granted also add to the strength.

I live in Cherokee County
I do not live in any of these cities.
None
I live outside of Pickens County but work in Pickens County.
Live outside of Pickens County
Land
Finding a community that has golf and the beauty that surrounds us.
Great place to motorcycle
The list does not list any assets. Parks and rec is a joke, there aren't sidewalks, we don't have our own water, retirees don't qualify for a break on property taxes ever, the school system is bad with no alternative options, and there's nothing for us or our kids to do here. PLEASE HELP!!!
Nothing to do, no sidewalks, too much new home construction
501-C's within the county
Less crowded compared to cities further North or South
Agriculture

15. What do you feel are weaknesses or threats to where you live (Unincorporated Pickens County, Jasper, Nelson, Talking Rock)? (Select ONLY 3)

16.If other is selected for weakness or threat, please explain or hit next.

Response
the political environment is hateful and useless to the citizenry of the city
Parks- places to walk/run
Parks and Rec
Highway speeds on Hwy 53 west are too fast for how close it is to a large number of homes
Poor law enforcement
Lack of restaurants and shopping
to many people moving here
Roads and traffic.
Too many houses being built without roads, water, sewer and business to support it
Too many people moving into area.
Lack of business/manufacturing base.
None of any of them
Need significant investment in public safety. There are very few ambulances in the county, and they have very long response times. Fire engines are understaffed, and if there is any fire, most ambulances go out of service to fight fire.
To much new housing

Having seniors continue to pay the school portion of their homeowners tax.
Over building in a community known for its natural beauty
Too many people moving to Pickens, no housing for locals
threat of big corporations taking over farm and timber land
No parks or recreation
All of the above! This county is podunk!
AFFORDABLE housing
Not proper planning by officials for growth
Road conditions and adequate or appropriate repairs
Building a lot, people selling farms and stuff and moving
I'm concerned with our local school system. One, because of the lack of consistent leadership, and two, for the threat of losing tax revenue through a school tax exemption for residents of a certain age. That works great for a county like Cherokee with a good mix of ages, but if we exempt all older residents, even those with higher income, from school taxes, the community will die.
Lack of decent places to eat
Entertainment venues for school age children: bowling, movie theater, skate park, etc.
Local government and BOE corruption
Too much development destroying the landscape
Not enough businesses/points of interest for families with children

Too many neighborhoods being built

Unplanned and wrong kind of growth. Destruction of beautiful views.

Need more dining options/variety, need Publix, traffic control

Traffic jams

Overpopulation

Influx of people trying to change Pickens County to meet big city convenience instead of appreciating the small town we are.

Too many people moving in because of the subdivisions being built. Outsiders are trying to change the culture of the area

Poor public safety in jasper

Slow internet and no park with hiking/running trail

Lack of preparation for inevitable growth, county leadership is myopic

Out of control building

Overdevelopment

Too much growth and too quickly. No longer feeling small town. People moving in and taking roles in county government making changes to be like where they came from.

Billboards trash the highways- get the down!!

roads are dangerous and not marked correctly for travel down 53 west !

Lack of retail

Parks and recreation
Not enough retail places
Development of housing that we DON'T need
Not a lot of things for teens to do. No movies or skating rink.
Too many fast food restaurants
Bad internet service that effects ability to work. We need a water source so we don't depend upon other counties to provide the majority of our water.
Still have dirt roads in Pickens county where I live. When both ends of my road are paved and the center of it is not as much county taxes we pay. It needs to me paved or at least tar and gravel.
No accessibility for disabled!
Drugs and weak judicial system
Poor Maintenance of the roads
Too much low income housing. Losing the small town feel.
Public safety in entire county
Outsiders moving in
Stop the building, traffics a nightmare as it is. Plus losing prime farm land and the beauty of this area.
No break in school taxes for senior citizens.
Fiber internet availability

Lack of infrastructure due to growing population. Roads, highways, redlights etc.

More retail

Buliding useless buildings all over the place

Too much high density housing. School system is going down hill. Inadequate thought given to asthetics on new development.

New residents arriving and wanting area to become a large town, tourist area ie Canton, Woodstock, Blue ridge

Truck Traffic on Local Roads and Litter

Road repair needed

The town is not up to date with the rest county's near by. Dawson is built up. Cherokee is built up. That's what people are looking for

Parks and rec

Roads are ineed of repair

Ones moving in verbalize that they are more important than the residents who have always lived here.

Poor planning for developments and zoning

Approving businesses that we already have. No need to have 5 Mexican restaurants, 5 pizza places, etc. put in a chick fil a!!!!!!

Big city encroachment

Poor internet connectivity outside of city, increased traffic without proper road development (ex: need for turning lanes, traffic lights and widened roads)

Lack of businesses
Lack of parks and recs facilities
Need to keep small town feel by limiting over expanding our community
Lack of education culture—more emphasis on demanding that "our" tax-payer funded technical college provide more programs for the community and more educational opportunities at this campus.
Lack of accessible & strong internet
Our hospital system is not large enough/well equipped enough to handle the massive growth in population. Especially the growth of assisted living communities/nursing homes.
Getting gravel roads paved.
Lack of quality recreational spaces/facilities. (Aquatic center)
Parks being build over the years but not maintained.
Too much development!
Development limited to number of units per square mile
High density urbanization
New housing developments, loss of small town community feel, urban sprawl, people moving in from elsewhere and trying to change things, people pushing for growth and change where its not wanted
Fire protection. Internet speed. Concerns about growth - managing it responsibly to preserve what we all love about this area.
Political extremism

Bad schools & healthcare systems

Property taxes

Pickens is in dire need of an overall zoning plan, business conditions to operate in pickens, and sign ordinance. For example, there is a business less than a mile from Hwy 53's Foothills center with handmade spray paint signage and a parking lot full of broken down vehicles. How is this possible?

No growth for popular businesses. Example: Canton/Ellijay restaurants blow Jasper out of the water.

We need more business like shopping stores (for clothing, restaurants,)

I know just that all options which were selectable or those which would require increased "Atlanta-like" expansion. More human inflow, more development, bringing in more taxes, to be spent on providing for the influx. I know it is impossible to hold back the "system" forever but I pray that there will be a strong enough vision of the simple good life, to resist the "progress" and the profits!

New developments taking over once beautiful scenery and land

Housing developments

Not a lot of shopping availability having to go out of town to spend money for things

Too high of taxes and school taxes for people that don't have children in schools

Airport expansion not welcome

Development and slow internet for people who work from home

Road conditions - lack of pavement

Lack of new businesses to provide entertainment and dining, as well as job oppourtunites.

A lot of drug activity and lack of emphasis on education.

Places to eat/shop
Individuals moving into Jasper that are from here.
Expanding town and population
Losing our small town, to outside people moving in.
lack of decent internet
Destroying open land to develop housing with no job developments to support them
Drugs
Lines on the road need repainted in more areas. There should be a better location for physical exercise such as biking and running paths that are safe.
Too many houses being built without road conditions being considered. Growth too fast for the rest of the county. Housing prices too high for a starter family
There isn't a variety of job opportunities within the county. Most seem to be in retail or service industries.
inadequate internet options. TDS is awful and ETC will not come to my area.
I'm in the Tate district and we need a grocery store, even a Dollar General would help the older citizens to not have to drive to Ball Ground or Jasper for Milk or Bread.
Too many people moving to this area.
too much new housing
Pay for county employees inadequate, especially for those in school system. Paraprofessionals deserve more..

Traffic/Traffic lights on 515
Lack of good grocery/retail
Too much development and growth is occurring too rapidly without a solid plan in place to manage growth
More red lights are needed on 515 to protect our youth. One should be at Harmony School Road and the Racetrac.
Lack of activities within the community
Lack of businesses and inadequate tax base
The need for ordinances to not mix residential property with retail/business and to have ordinances that even residential property had to limit "junk" in the yards.
Parks/Playgrounds
Lack of retail stores
High property taxes on elderly
Lack of affordable housing options
Lack of excellent schools
no senior discount on property taxes
ALL OF THE ABOVE.
Reckless housing growth
lack of law enforcement

lack of things to do and limited dining

Lack of diverse retail/commercial opportunities

Lack of parks

worst parks and rec options in the region

High speed internet

Too much growth

Uncontrolled housing development and loss of rural landscapes important for biodiversity

Need for more schools for the growing population

Development

Overdevelopment. Also our roads are not adequate for the traffic growth.

Lack of regulation concerning building above a certain elevation

County law enforcement presence

Tripled home ins cost due to lack of adequate fire services

Lack of AFFORDABLE housing, schools not able to handle additional students

Too much building of homes that the road infrastructure and water/power cannot support.

Lack of off leash dog parks

Traffic

Too much housing development. The small town atmosphere is being lost. Our streets are becoming crowded with too much traffic.

Too much development changing the county.

City of Jasper arrogance as to city council lack of input in decision making.

Houses being built too close together, not enough land with houses, or affordable housing

Cost of living too high

gravel roads

Issuance of building permits and land development. We do not want developments and small lot neighborhoods. We do not want development like cobb, cherokee or forsyth. Stop developers and do not issue permits for homes on less than five acre tracts. Do not permit industrial or commercial in East Pickens.

Speed limit needs to be reduced. Most fly by at 15 mph over listed speed. According to paper many police stops but not nearly enough tickets given.

Lack of accountability in government

poor development planning

INCREASING TRAFFIC CONGESTION

Weak and very limited parks and rec department.

too many houses being built

Inadequate planning for growth

Recreation dept far behind other counties

The sudden increase in high density yet still unaffordable housing.
Traffic light needed at 515 and Worley Crossroad. It's extremely dangerous
Corruption. Over Development.
Growing to much with house and people but that's it nothing else
Lack of good paying jobs
Too much building with limited natural resources and too much destruction of farmland
Public safety
Too much growth and development
Over Building Our hometown community
Increasing number of event venues
515 needs improvement at the intersection of Worley Crossroads and lower dowda mill rd. With so much traffic now it takes either side to get onto 515 sometimes we sit there up to 20 minutes waiting to go north on 515 . And crossing over from Worley Crossroads and Lower Dowda Mill is getting so dangerous because you have to wait for a long time to get into 515
Too much new construction and not enough resources.
Traffic light needed on Hwy 515 at subdivision entrance
High taxes and no tax breaks for seniors
Highway safety. Too many people. Water and sewer
We need to limit the growth and destruction of the small town life

Too much nonlocal "investors"

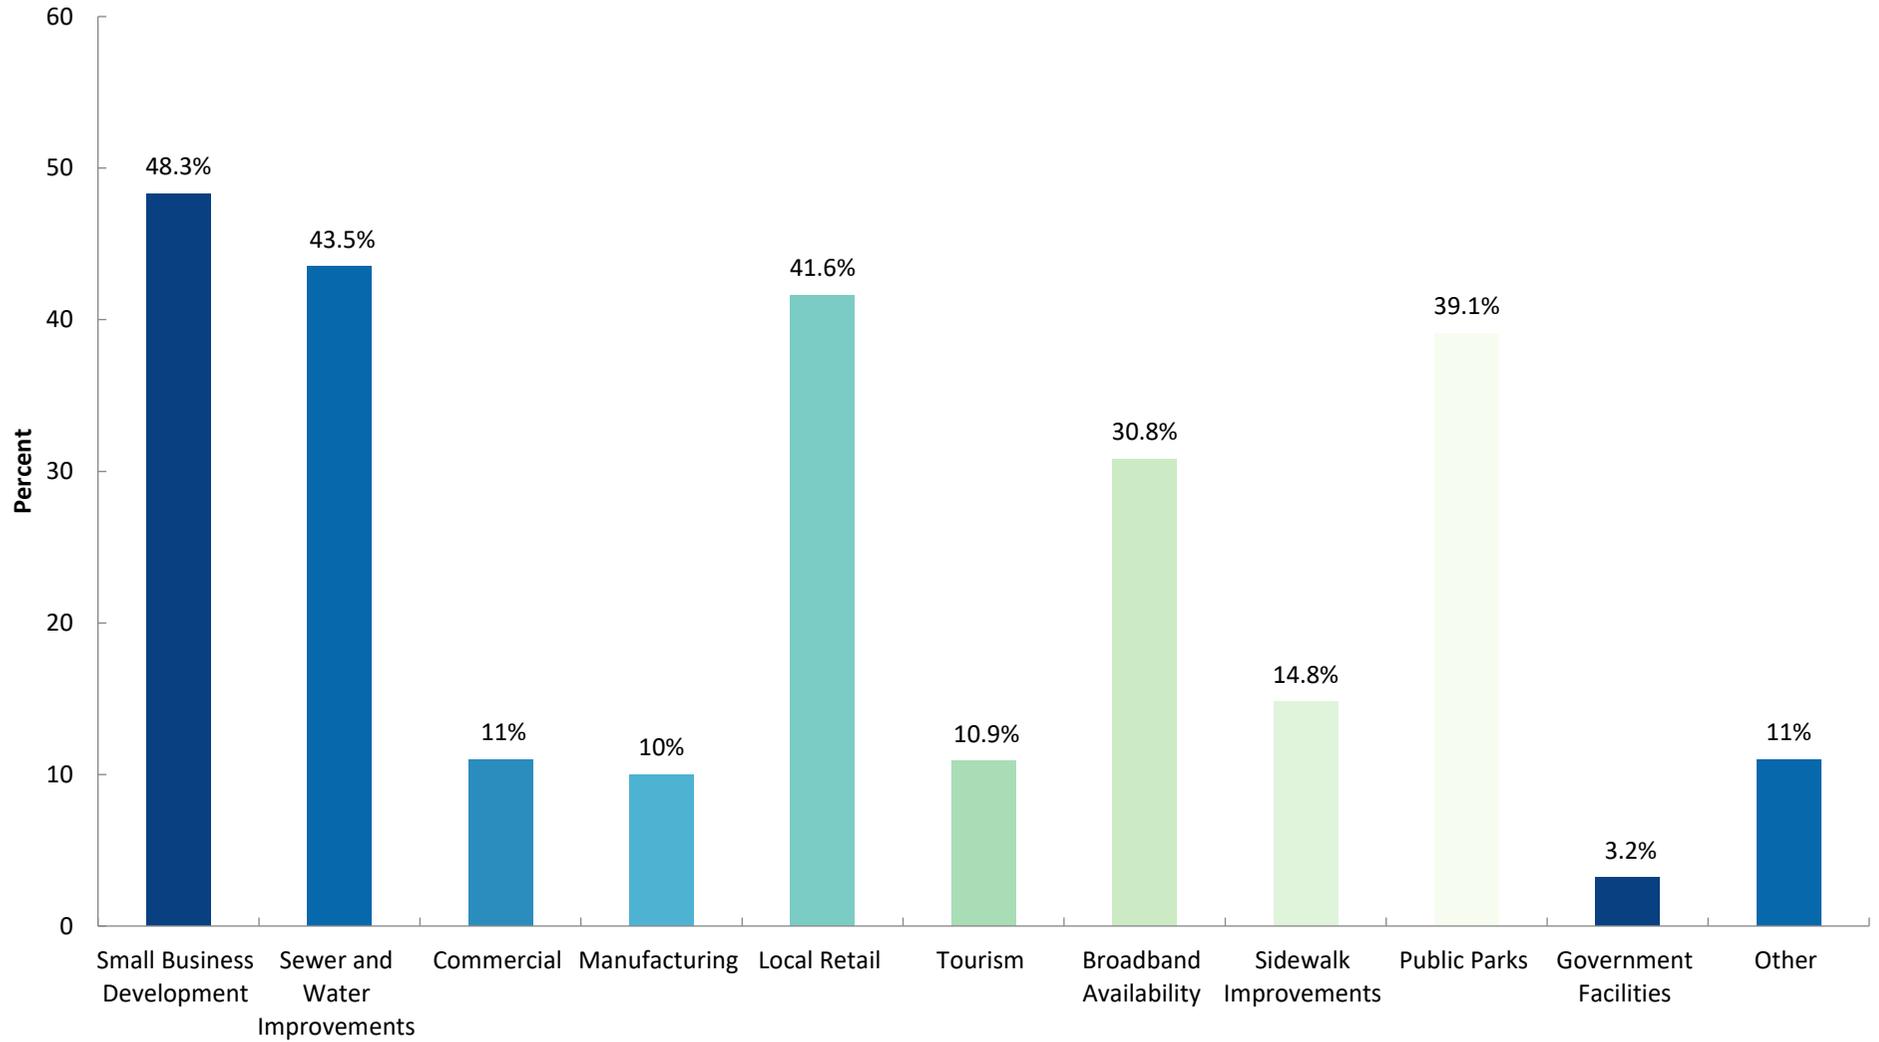

The parks are mostly single use (dont keep you coming back again and again) and/or in major disrepair

Litter along highways, side roads—very unsightly. Detracts from natural beauty!

Zoning anything other than 3 acre homes and farms

Too much destruction of land & nature to build more housing and businesses we do not need! Our small town is on its way to being every other city with crime, too many people, too many unnecessary businesses, traffic & no more small town feel. There is nothing wrong with driving to the next town for something we don't need here . If it's not here it's 10-15 minutes away, STOP DESTROYING THE LITTLE BEAUTY WE HAVE LEFT WHICH IS WHAT MADE THIS TOWN SPECIAL

17.What type of projects or growth are you interested in seeing within your community? (Check Only 3)

18.If other is selected for projects, please explain or hit next.

Response
Affordable housing
Aquatic Center
Less development
A cap on growth and development to protect large parcels of ag and undeveloped land
Road infrastructure. Highway 515 needs to be an interstate with exit ramps.
No more growth
Too much development already.
Bigger businesses that actually open nights, weekends , and don't close every other day for nonsense
More business of any kind that brings good paying jobs
None
More things that will keep our youth out of trouble, I.e. after school programs. Local things to do
Keep the community small and local
A sheriff and county commissioner that does there jobs and stops putting the little people in danger for just __and giggles
Doesn't need any development. I like the small town.
More farm land, less housing and sub divisions

Projects and development are ruining Pickens County

Too much growth.

All of the above. Bring in some tourism so the county can spend money on the residents that pay land taxes til they die. A parks and rec overhaul would also be nice. Nothing happens here. No wonder the youth want to leave. We spend all our time and money save for land taxes, outside of Pickens.

Not interested in seeing any more growth

Would like to see better ordinances for pet owners

Try to make it so young people can stay and it doesn't turn into a big city

Better Schools

Keep Pickens rural.

Better choices for restaurants

Ordinances to protect rural property from big development

A complete overhaul of local government, police, and BOE

Parks and recreation

Youth activities for free

Better roads

Affordable housing

None

road safety ! roads are not mated with double lines after hintin milling to have safety to get into our roads , they have passing lanes when we try to turn left !

Lack of care for youth (Better recreations and sports)

More restaurants

Agriculture

More agriculture

Bringing our infrastructure to meet our citizens needs that already live here. If it's not able to take care of it's residents that already live here then you can't build or bring in more people

Sidewalks exist, but that doesn't mean things are accessible. Disabled people exist.

Stop building cluster subdivisions and retirement homes

More places to eat

Manufacturing meaning eco friendly established companies.

Agriculture, dairy, tourism - so that they come and go

More availability for pickleball for active adults which would bring in more revenue and visitors.

Fix the roads to decrease congestion

Small business restaurant

Cellular service

Technology-based companies - a recruitment effort aimed at technology companies.

Aquatic center
Less development
More restaurants like surrounding towns have. A Publix store too.
Improving current parks, make bathrooms available again.
Agriculture. We need more cows, chicken houses and farms, NOT low income housing developments and subdivisions
Available housing
Fire protection.
Less fast food restaurants and more real food. Publix. TJMaxx
Roads need repairs and widened
independent restaurants
Pickens needs an overarching plan for the way businesses and residential develop looks (signage, lighting, and landscape ordinances) and improved enforcement of conditions.
Historic preservation
Restaurant or market off Hwy 53 West
No more development. We can drive to anything we want. Last thing we need is a bunch of traffic
An aquatic center
None

better business choices
Restaurants
We need to make a plan to improve roads and get gravel roads paved and safe.
Outside activities readily available to kids and convenient for parents dealing with transportation issues
Other than the Rec department, more inexpensive facilities with indoor rooms and plumbing are needed for families to gather and for parties with something to do besides sit in a big room.
The county does not offer incentives for things that young teens, adults can do in our city. They go to other counties for food, entertainment and work.
Roads are not ready for all this new traffic. We have to have additional traffic lights for schools and buses, especially at Harmony School
Places for our youth to attend other than sports. Ex: Theatre, Bowling, Skating, activities for them to enjoy.
None of the above
Restaurants
We need to attract better Restaurants and ones that are opened for dinner.
a comeback of farm land and hunting land
Affordable Housing
DISC GOLF COURSES
Publix

Restaurants

More development and restaurants

All of the above. Pickens needs HELP! Bring in tourism, beef up parks and rec, create some things up here so residents and guests WANT to spend their money here. We all leave the county to spend because no one is welcome to set up businesses here. They're not welcome, so we spend elsewhere. Pickens is incredibly backward! I hope there's an overhaul. We hate it here!!

Restaurants

Police and fire: better pay and more staff

Better options for restaurants & grocery stores

Saving current businesses who need better sewer and infrastructure

Gov't programs to assist ALL of the community's population

Food policy council to support small farms and give consumers incentives to purchase locally. As Pickens county becomes the recycling hub of North Georgia, we could also be more proactive in building a local food economy. Appalachian sustainable agricultural project (ASAP) even includes Pickens County in the North Georgia region. But, most importantly, we do need to limit large housing developments as turning into Cherokee county is not appealing.

None

Work to protect what we have through designation as green space, protected habitate, historical preservation, or whatever else we need to do to stop development unless it is to preserve what we have. Jasper could use a big city sight like ballground has if you have to build something.

A little leniency with changing rural plots

Improved fire services in Talking Rock.

An adequate fire department with local fire fighters

Recreation department sports areas available

Reduced school taxes for seniors

Tate Elementary is not suitable for the numbers of students and if we keep building/bringing in more families, where will be put them school wise?

Higher paying jobs

Development of avenues of input by local business owners and getting away from 3 people deciding the fate of our community.

Homeless shelter, domestic violence shelter, etc

Better Restaurant Chains

pave roads

Restaurants.

Light industry

MANAGE TRAFFIC BETTER SO WE CAN ATTRACT HIGHER END JOBS, SAY TECH JOBS OR ECO FRIENDLY MANUFACTURING WHILE INCREASING OUR WATER RESOURCES, THEN INCREASE FIRST RESPONDERS THAT WILL BE NEEDED, NOT BIG CITY ALPHARETTA TYPE OF GROWTH,QUALITY OF LIFE TYPE OF GROWTH

More developed parks and rec facilities, sports, and activities for kids/families

More restaurants with something different. A Chick-fil-A would be nice!

More preservation of greenspace for State or natural parks, for hiking, picnicking, & camping. Too much natural beauty here to destroy it all.

Nothing

A YMCA would be great. Better parks and recreation

I would be glad to see a storage of growth.

We love the peace & quiet, the natural beauty.

affordable housing, 1200 a month

Entertainment and decent hotels are severely lacking

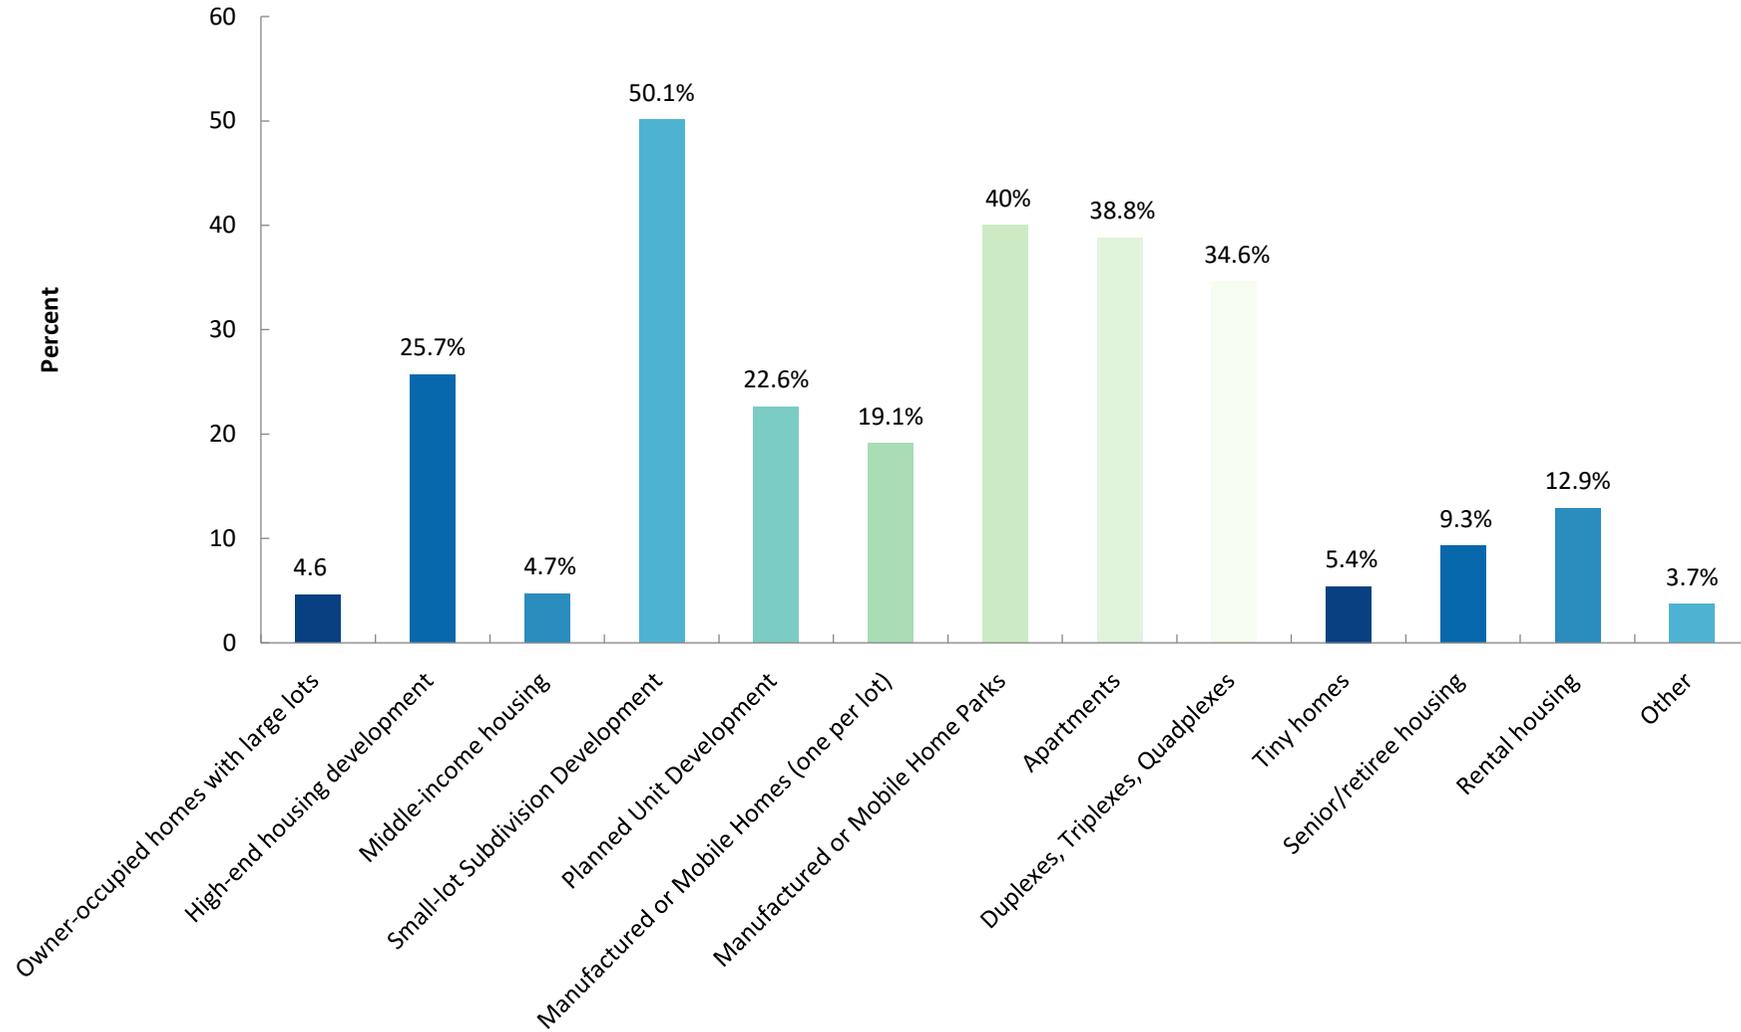

Grocery store with gas station (food city, kroger, etc)

Beautification—litter of roadways cleaned up on a routine basis

Stop zoning, stop growth

NONE!!! Leave this town alone! We have enough crap we don't need here! We don't need to draw in more people, crime & traffic!

19. What type of new residential developments do you most consider as a threat? (Select Only 3)

20.If other housing development is selected, please explain or hit next.

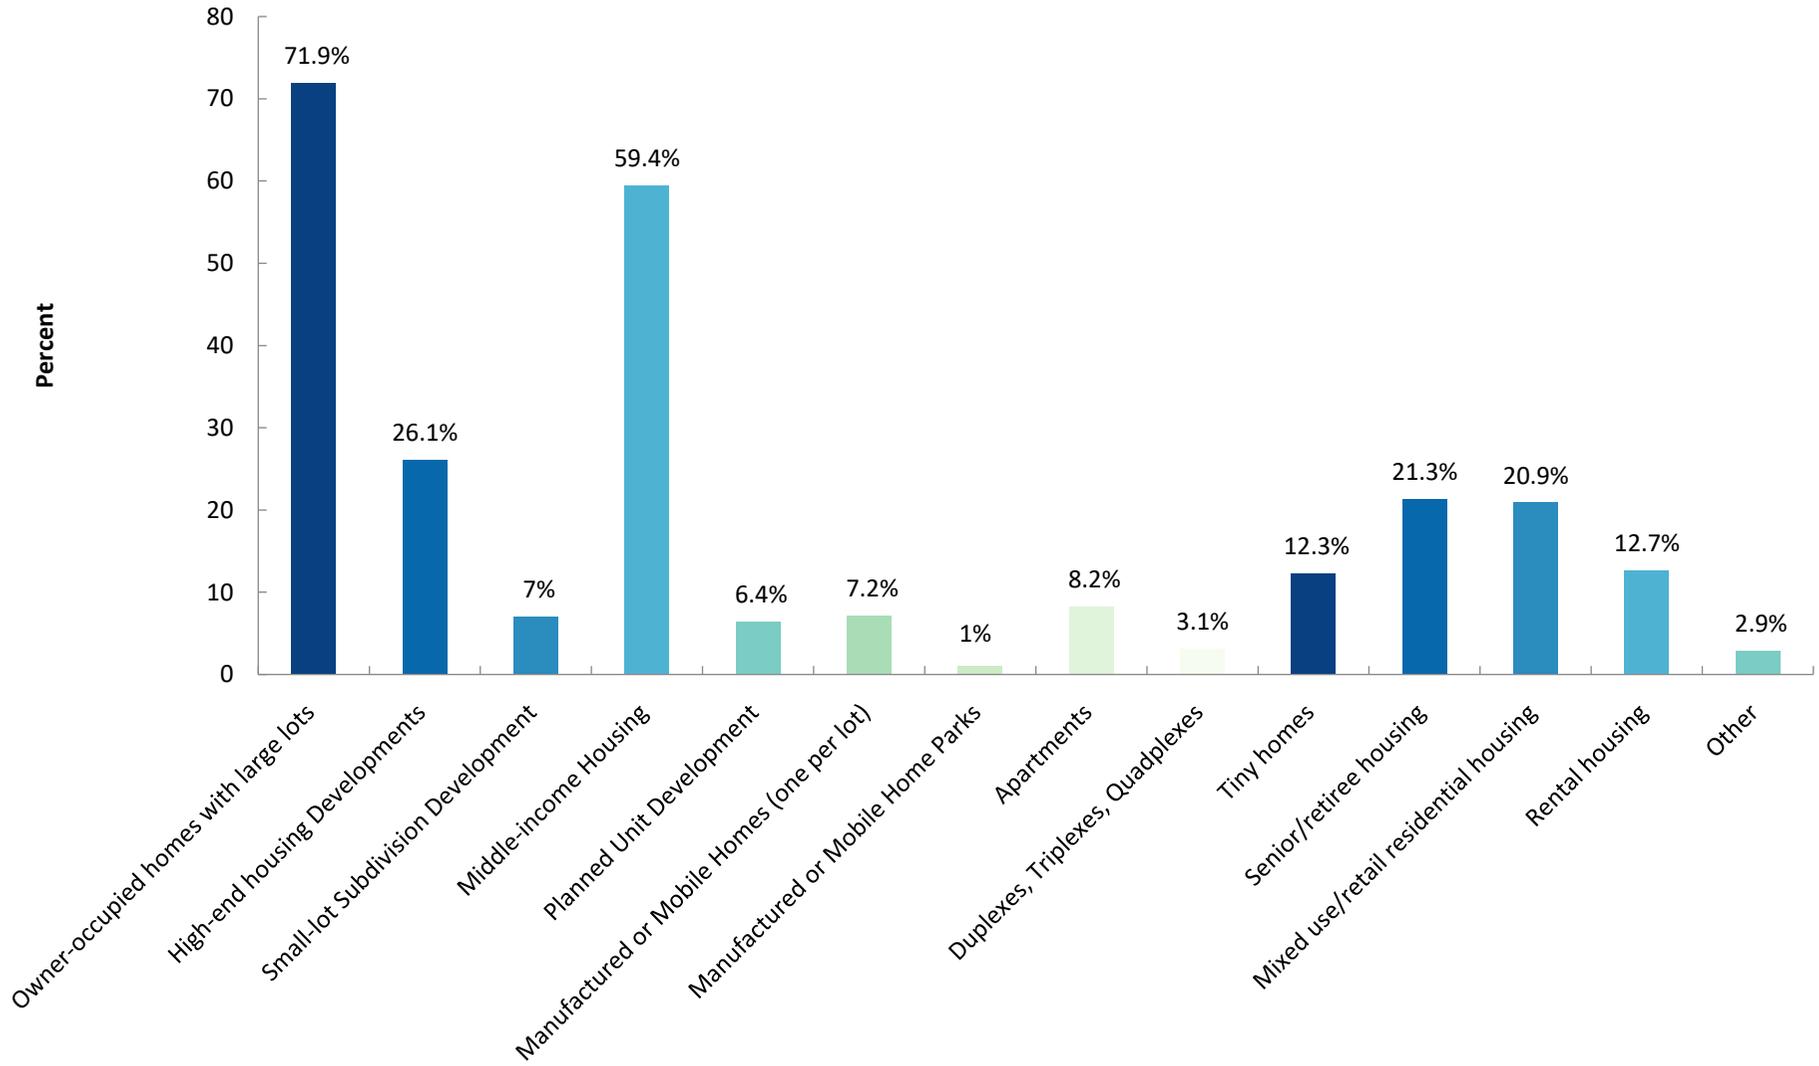

Response
Chicken houses
I don't consider any of them a threat if the planning is on point and infrastructure can handle it.
Townhouse
I'd say all of the above; I can't choose just three
Too many people potentially moving here
Subsidized housing
Storage facilities trashing highways
Town houses
Single family, with about 1acre
Anything that takes away large amounts of land like the cow fields on Philadelphia
Low income housing/apartments
Low income housing
Government subsidized housing
Air B&Bs
Water prices are a huge threat!

Habitat Housing
I would say any large developments that do not encourage long-term occupancy.
More affordable housing
None
No of these are a threat
I don't see any threats other than people thinking there's nothing out here so there's no reason to move out this way.
Lack of county ordinances, too many redneck shacks
Ones that destroy or block the beautiful views for those who already live here.
Sprawling development rather than smart growth
I live off Twin Oaks trace and hood rd , since the industrial building and Chem building went up across the street I have barely enough water pressure to shower .
Any clear cutting, new homes being built on previously primitive land, especially as second homes
Affordable housing for existing homes. Rich retirees running out families
Housing without proper planning.
Low income/Section 8
APARTMENTS, DUPLEXS ETC WILL BECOME A DRAIN ON FIRST RESPONDER SERVICES WHICH YOU NEITHER HAVE OR ARE PLANNING FOR THAT INCREASE, TO MY KNOWLEDGE,
Nursing homes

Too many of any type without the infrastructure to support them.

Camping Facilities

21.What type of residential development do you consider as assets? (Select ONLY 3)

22.If other housing development is selected, please explain in 10 words or less.

Response
tent cities
Farmland and undeveloped timber
Large subdivision with high end homes
Agriculture land
Agriculture developments. Farm centered, horse centered, etc
Townhouse
Farm
Rentals
More people equals more issues. No.
Subsidized housing
Don't need more homes or traffic
Had no other choice
Agriculture

Farms and such
Homeless Veterans Housing
With aesthetics ,landscaping and green spaces,trails conducive to nature
Need to attract people who can pay taxes and contribute to tax base
Air B&Bs
No more. More=higher prices and more traffic
None
Habitat for Humanity Housing
I would say any large developments that do not encourage long-term occupancy.
Slow down growrh
none
N/A
To many moving here. Will not keep small town vibe They are bringing to much from city life
All of this applies
Less development and keeping the natural environment
Too much traffic in our area with no way out!

Need zoning rules and enforcement

Leave the farms, parks undeveloped mountain lands alone!

Too much development is happening in this county. Keep it rural

Leave the woods alone!

To many houses

No housing developments

Farms

Responsible and sustainable building

Already too many housing developments. They need to stop.

Don't kill the green space with multiple housing units

Low income/Section 8

Arbor Hills is a prime example of a successful housing dev, two apt complexes here are trashed, hospital and hood rd examples

Nursing homes

I don't want any more people to come to Jasper. I came here 10 years ago to get away from people

A place to park campers

Expensive homes few can afford

No more building

No more new housing
